

Optiflex

A whole new way to
look at security.

Honeywell

A security solution worth looking into.

Introducing Optiflex—a security solution from Honeywell that's worth looking into. The state-of-the-art video controller lets you view cameras around your business right at the video monitor, integrated television or on your computer anywhere over the Internet, with the assurance that your privacy is protected with the highest level of data security available.

For the ultimate peace of mind, look no further than Optiflex—the cost-effective surveillance solution that provides the benefits of next-generation digital video technology. It's going to change the way you look at security.

Optiflex makes it easy to:

- Screen visitors at the entranceway

- Keep your eye on valuable assets, inventory and important records

- View delivery docks and parking lots

- Check on a stock room or view lobby entrances from the Symphony screen or any television connected to any Optiflex video output

Protected... and Connected

Whether you're traveling for business, away on vacation or at home, Optiflex can help you keep tabs on your business from any remote location. You can view cameras and recorded video in and around the workplace via a laptop or desktop computer with the most highly secure Internet connection available!

Always on Guard

Ideal for guard stations and security offices, Optiflex lets authorized personnel view secure guard tours in and around your business.

Additional Digital Video Storage

Optiflex can be integrated with DVRs to deliver a more efficient and cost-effective way to watch over your business. "Live" site visits are conducted electronically while the system simultaneously records video in time lapse mode—granting you instant access to, and easy search and retrieval of important information. There is no VCR maintenance to contend with, no tapes to change and no scanning through endless hours of video.

Optiflex

One-Touch Security Solution

An ideal complement to Optiflex, Honeywell's Symphony Touchscreen Interface lets you view up to four cameras at a time, control security and operate lights and relays directly at the display or remotely from any Web browser. Simple one-touch icons and menu-driven prompts cut down on employee training time and reduce false alarms. Symphony also lets you view opening and closing reports and can be customized to schedule events and control lighting and select appliances to improve security, maximize profitability and save money.
