## **Direct Connection**

For a direct connection you must connect a Null Modem Cable (Serial Cable) between the external port in the unit (see the following diagram) and the RS232 port of the PC. In **Control Panel > phone and modems > Modems.** Add a modem, select don't detect. Choose "communications cable between two computers" as the modem type.

Click add, and select "don't detect.

Choose "communications cable between two computers" as the type.
