AlarmNet® 7847i-LInternet Communications Module

This supplement provides updated instructions for installing the Alarmnet 7847i-L in the LYNX PLUS Series Controls and an alternate configuration for the LYNXR-2 Series Controls.

Installing the 7847i-L in the Lynx Plus Series Controls

The 7847i-L Internet Communications Module must be programmed with the 7720P before it can be mounted in the LYNXR-2 OR Lynx Plus Series case.

Ethernet Connections

- 1. For UL installations, the Cat. 5 Ethernet connection between the 7847i-L and the router cannot exceed 12 feet with both the 7847i-L and the router located within the same room.
- 2. A UL listed cable/DSL router suited for the application should be used.

Electrical/Ethernet Connections

- 1. Connect one end of the Ethernet cable (Category 5) to the RJ45 Ethernet connector and the other end to a cable/DSL router as shown in Figure 1.
- 2. Connect the provided ECP
 Power/Communications cable PN
 900-00801 between the device
 and the ECP/Communications
 receptacle on the Lynx Plus as
 shown in Figure 1.
- 3. When programming the module, plug the programming cable from the 7720P Programming Tool into the programming connector on the 7847i-L module (Refer to the 7847i-L Installation Instructions for Programming Details.)

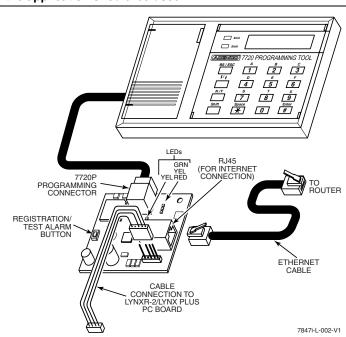

Figure 1 – Electrical/Ethernet Connections

Installing the 7847i-L in the Lynx Plus Series Controls

Mounting and Connecting

- Install the module into the Lynx Plus Series back case as shown in Figure 2 and secure it with the two provided screws.
- 2. Connect the provided ECP
 Power/Communications cable PN
 900-00801between the module
 and the PC board as shown in
 Figure 2. This cable provides DC
 power and ground and data
 in/out connections for the module.

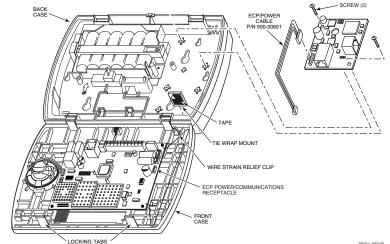

Figure 2 - Mounting the 7847i-L

Cable Routing

1. To ensure proper communications, route the cables as shown in Figure 3.

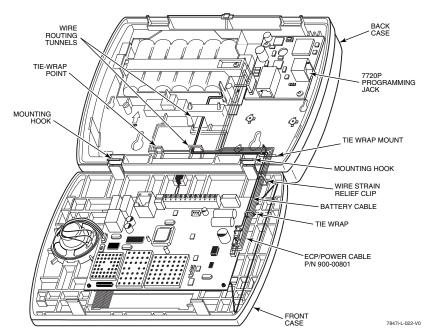

Figure 3 - Lynx Plus Cable Routing

Installing the 7847i-L in the LYNXR-2 Series Controls

Mounting and Connecting

1. Install the module into the LYNXR-2 Series back casee as shown in Figure 4 and secure it with the two provided screws.

Connect the provided ECP Power/Communications cable PN 900-00801between the module and the PC board as shown in Figure 4. This cable provides DC power and ground and data in/out connections for the module.
