LYNXR-ISIA Summary of Connections Diagram	24

Refer to the Installation and Setup Guide for detailed information on programming the LYNXR-ISIA system. The Installation and Setup Guide includes full descriptions of all data fields.

UL

LYNXR-ISIA is not intended for UL985 Household Fire applications unless a 24-hour backup battery (P/N LYNXRCHKIT-HC or LYNXRCHKIT-SHA) is installed.

### TO ENTER PROGRAMMING MODE:

- 1. Power up, then depress **[\*] and [#]** both at once, within 50 seconds of powering up. OR
- For factory defaulted system, enter: Installer Code (4 + 1 + 1 + 2) plus 8 + 0 + 0. OR If different Installer Code is programmed, enter: New Installer Code + 8 + 0 + 0. (if \*98 was used to exit previously, method 1 above must be used to enter the program mode again)
- 3. Upon entry into Program mode, data field \*20 will be displayed (the first data field in the system) and both keypad LEDs will flash.

### TO PROGRAM THE DATA FIELDS:

- 1. Press [\*] followed by the desired field number (e.g., \*21), then make the required entry.
- 2. The keypad beeps three times after entering data, then displays the next data field in sequence.
- 3. For phone number and account number fields, press [\*] to end the entry if less than number maximum number of digits is entered.
- 4. To delete an entry, simply press [\*] plus that field number and reenter the correct data. For phone number and account number fields \*40-\*44, \*88 and \*94, press [\*] + field number + [\*].

### INTERACTIVE MENU MODES:

There are six interactive menu modes as listed below. To enter these modes, first enter Program mode. While in Program mode, press [\*] plus the mode number desired (e.g., \*56).

- \*80 Device Programming......For programming Powerline Carrier Devices
- \*83 Enhanced Sequential Mode ......For entering transmitter serial numbers
- \*84 Assign Zone Voice Descriptors ......For assigning voice descriptors to zones
- \*85 Record Custom Voice Descriptors ...... For recording custom voice descriptors

### TO LOAD A DEFAULT SET:

While in Program mode, press \*97, then enter a number 1-4 corresponding to the default table desired. See the Installation Instructions for the default tables. Enter 0 if you are not selecting a default table.

## TO EXIT PROGRAMMING MODE:

-

- \*98 Exits programming mode and *prevents* re-entry by: Installer Code + 8+ 0 + 0. If \*98 is used to exit programming mode, system must be powered down, then press [\*] and [#] within 50 seconds of power up to re-enter programming mode.
- \*99 Exits programming mode and *allows* re-entry by: Installer Code + 8 + 0 + 0 or: Power-up, then press [\*] and [#] within 50 seconds of power up.

			3 minute, 45 seconds n *39 is set to "0" Zone List 2 can b n is not for use in UL installations.	e used for other purposes.
In fields	R PROGRAMMING (* 40– * 53) s *40, *41, *42, enter up to the numbe	er of digits sho	wn. Enter 0–9; #+11 for '*'; ;	#+12 for '#'; #+13 for
a paus <b>*40</b>	e. PABX ACCESS CODE/CALL WAITING DISABLE			

Enter 6 digits. If fewer than 6 digits are entered, pressing \* advances to the next field. To clear entries from field, press \*40\*

#### Or

Enter"# + 11 + 7 + 0" to program the touch-tone sequence "\*70" and cancel call waiting.

If Call Waiting Cancel is enabled in Field \*47, Call Waiting Cancel command (\*70 or similar depending on a phone service provider) should be entered in Field \*40. Otherwise PABX access code should be entered in the field.

#### Important Note:

If Call Wait Cancel is disabled in Field  $\pm$ 47, and Call Wait Disable command is entered in Field  $\pm$ 40, this will prevent successful communication to the central station when used on a non-call waiting line.

Note: PABX number and operation of the control panel with a PBX system cannot be used if the Call Waiting Cancel Disable option has been enabled in Field \*47.

				]
				]

Enter up to 20 digits; Do not fill unused spaces. If fewer than 20 digits entered, pressing \*advances to the next field. To clear entries from field, press \*41\*.

					٦

Enter up to 24 digits; Do not fill unused spaces. If fewer than 24 digits entered, pressing \*advances to the next field. To clear entries from field, press \*41\*.

\*41

\*42

PRIMARY PHONE NUMBER

SECONDARY PHONE NUMBER

All four digits of the subscriber account number must be entered in Fields **\*43** and **\*44**. If ten digit format is selected in **\*48** (option 5), all ten digits of the Subscriber Account number must be entered.

\*77 DYNAMIC SIGNALING DELAY/ DYNAMIC SIGNALING PRIORITY

[0, 0]

1st Entry (delay before switch CS reporting path)

0 = Redundant reporting	7 = 105 seconds
on dialer and LRR/IP	8 = 120 seconds
device	9 = 135 seconds
1 = 15 seconds	#10 = 150 seconds
2 = 30 seconds	#11 = 165 seconds
3 = 45 seconds	#12 = 180 seconds
4 = 60 seconds	#13 = 195 seconds
5 = 75 seconds	#14 = 210 seconds
6 = 90 seconds	#15 = 225 seconds

#### 2nd Entry

- 0 = Primary Dialer Preferred Channel
- 1 = LRR/IP Preferred Channel
- 2 = LRR/IP reporting only

### OUTPUT AND SYSTEM SETUP (\*80-\*92)

- \*80 **DEVICE PROGRAMMING MENU** MODE
- \*81 ZONE LISTS MENU MODE
- \*83 ENHANCED SEQUENTIAL MODE
- \*84 ASSIGN ZONE VOICE DESCRIPTOR
- \*85 RECORD CUSTOM VOICE DESCRIPTOR
- AUX FUNCTION/ 1-BUTTON PAGING \*87

Program \*80 and \*81 only if Powerline Carrier Devices or chime by zone are to be used. See procedure later in this manual.

[0]

0 = Aux key performs defined function (macro):

1 = Aux key sends message to pager or voice message to follow me system phone number.

If 1, you must also select an option 6-9 in field \*49 for the pager or 10-13 for the follow me system announcement.

#### \*88 PAC

PAGER CHARACTERS	
	Up to 16 digits can be entered that will appear in front of the 7-digit pager message sent by the control (either upon system event or upon pressing AUX key [if programmed for paging]; see field *87 and *49 for other options regarding the paging feature). See the Installation Instructions (fields *87, *88 and *49) for full descriptions of the paging feature. You do not need to fill all 16 digits (press [*] to advance to next field). To clear entries, enter *88*.
	To enter "朱" = [#] + [11]; To enter "#" = [#] + 12]
	To enter 2-second pause = [#] + [13] (some pagers require an additional delay [pause] in order to receive the entire message)
EVENT LOG 80% FULL RPT CODE	[0,0]

\*90 **EVENT LOGGING** 

\*89

[3]

0 = None; 1 = Alarm/Alarm Restore; 2 = Trouble/Trouble Restore; 4 = Bypass/Bypass Restore; 8 = Open/Close.

Example: To select "Alarm/Alarm Restore", and "Open/Close", enter 9 (1 + 8); To select all, enter #15.

Note: System messages are logged when any non-zero selection is made.

Field	Function	Programmed Values[ ] = Table 1 Default Value

	(ALLOWS RE-ENTRY)	or:				
		Power-up, then press "*" and "#" within 50 seconds of pow up or from exiting Programming mode.		•		
		Note:	After exiting Program mode, To bypass the reset delay, p	the system takes up to 1 minute to reset. press [#] + [0].		

## **\*56 ENHANCED ZONE PROGRAMMING PROCEDURE**

Use this mode to program zone information. Press \*56 while in programming mode.

- **Notes:** (1) Entering a number other than the one specified may give unpredictable results.
  - (2) You may find it convenient to adjust the volume setting before entering the Programming Mode. This will allow you to clearly hear feedback announcements or system beeps.

#### ZONE NUMBER

Enter the 2-digit zone number to be programmed. The system will announce the Voice Descriptor for the selected zone, if it is programmed.

- [\*] = Continue
- 00 = exit zone programming mode;
  - upon exiting, the prompt "56" blinks; press
- [\*] + any field number to go to that field.
- Zones 2-25 = RF transmitter zones (only)
- Zone 26-41 = RF button zones (only)
  - Zone 92 = Duress
  - Zone 95, 96, 99 = Panic zones

#### ZONE TYPE

Enter the 2-digit zone type (*zt*) for this zone (see table of zone types on worksheet).

- [\*] = Continue [if 00 is entered the system will skip to DELETE ZONE PARAMETERS prompt (F)].
- [#] = Return to previous prompt

## REPORT CODE

Enter the report code (rc) for this zone.

Report consists of 2 hexadecimal digits, each composed of 2 numerical digits (A = 10, B = 11, C = 12, D = 13, E = 14, F = 15; see Report Code description for explanation of codes). [\*] = Continue; If this is zone 95, 96 or 99, the system skips to the VOICE DESCRIPTOR prompt (1C) [#] = Return to previous prompt

#### INPUT TYPE

Enter the input type (i) for the transm	itter assigned to this zone as follows:	Zo
3 = Supervised RF (RF)	[*] = Continue	as
4 = Unsupervised RF (UR)	<pre>[#] = Return to previous prompt</pre>	26
5 = Button type (BR)		Ту

#### Note Zones 2-25 should be assigned as Input Type 3 or 4 and Zones 26-41 should be assigned as Type 5 only.

d

i

### LOOP NUMBER or LOOP AND SERIAL NUMBER (if using RF Learning)

Note: It is not necessary to manually enter a Loop Number if using the RF Learning Mode.

**RF Learning** - Two (2) transmissions (two key depressions at least five seconds apart) will be required for BR type devices (device type 5). Two beeps will sound after the second transmission, confirming that the loop number and serial number have been learned.

For all other device types, four (4) transmissions are required (fault, restore and fault, restore). A single beep will sound after the second transmission confirming that the loop and serial number have been captured. Following the fourth transmission the system will confirm that the loop and serial number have been learned by announcing the Voice Descriptor for the zone, if it is programmed, followed by two beeps.

**Note:** BR type devices cannot be enrolled by using UR or RF type. Likewise, UR or RF type devices cannot be enrolled by using a BR type device. There is a 52-second time-out for RF enrolling. At the end of the time-out, the system returns to the INPUT TYPE prompt (d). If enrolled, loop number and "L" are displayed.

**Manual Entry** - Enter the desired loop number and press [\*] to continue (see the transmitter's Installation Instructions for specific loop designations). If "L" is displayed the zone's serial number has already been enrolled.

- **Note**: The loop number can be changed even if the zone has already been entered. Care should be taken when using this feature as it has the capability to make zones inoperable by creating a mismatch of a working serial number/loop number combination. This should be re-confirmed if the loop number is changed.
- 0 + [\*] = to Delete Serial Number prompt (F)
- [\*] = Continue to the ENROLL MODE prompt (1A) if not enrolled, or VOICE DESCRIPTOR prompt (1C) if already enrolled.
- [#] = Return to previous prompt
- 1-4 = Loop number for the zone of the transmitter being entered or learned

## **\*56 ENHANCED ZONE PROGRAMMING PROCEDURE**

F

18

lb

LC

## DELETE ZONE PARAMETERS

0 = Discard the delete request.

1 = Confirm the requested delete.

If 00 is entered in the zone type, confirmation of the delete request will delete all information associated with zone currently being programmed.

If 0 is entered in the loop number, confirmation of the delete request will delete the serial number associated with zone currently being programmed.

Note: 00 was entered as a zone type in prompt (b), 00 will be retained and system will advance to prompt (1C).

#### **ENROLL MODE**

0 = Skip to the VOICE DESCRIPTOR prompt (1C). If zone type is "00," then skips to DELETE SERIAL NUMBER prompt instead.

- 1 = Enroll now and proceed to SERIAL NUMBER prompt (1b) (If "L" is not displayed).
- 2 = Copy the last serial number from the local memory buffer (If "L" is not displayed).
- 3 = View existing serial number. (Only if "L" is displayed).
- 9 = Delete existing serial number. (Only if "L" is displayed).
- [\*] = Advance to the VOICE DESCRIPTOR prompt (1C). This will save all zone parameters.
- [#] = Return to the loop number prompt (E).
- Notes: (1) "L" will be displayed only if transmitter was already learned.
  - (2) The system will announce the Voice Descriptor for the selected zone, if it is programmed, followed by three beeps and "C" will be displayed only after confirmation.

#### SERIAL NUMBER

Manually enter the transmitter's 7-digit serial number (printed on the transmitter). If an incorrect digit is entered, press the [#] key to return to prompt (1A).

Note: In order for all parameters to be accepted, you must advance to prompt (1C).

When all 7 digits are entered, press the [\*] key. The serial number will be copied into EEROM and the local memory buffer and the system will return to the (1A) prompt and "L" will be displayed. If 52 seconds pass and no entry is been made, the system will return to prompt (1A).

### **VOICE DESCRIPTOR**

0 =Skip to next zone (A)

1 = Enter descriptor mode (existing zone descriptor will be announced, then descriptor 1 will be repeated)

### **DESCRIPTOR 1**

Enter [#] + 2-digit vocabulary index<sup>†</sup> number (*vi*) of first descriptor word for this zone. To change the entered index number, press [#] + desired index number. 6 = accept word and advance to descriptor 2 (descriptor 2 will be announced) 8 = accept word and advance to next zone (prompt A) – zone descriptor will be announced Press any other key to repeat the selected word

#### **DESCRIPTOR 2**

Enter [#] + 2-digit vocabulary index<sup>†</sup> number (*vi*) of second descriptor word for this zone. To change the entered index number, press [#] + desired index number. 6 = accept word and advance to descriptor 3 (descriptor 3 will be announced)

8 = accept word and advance to next zone (prompt A) – zone descriptor will be announced
 Press any other key to repeat the selected word

### **DESCRIPTOR 3**

Enter [#] + 2-digit vocabulary index<sup>†</sup> number (*vi*) of third descriptor word for this zone. To change the entered index number, press [#] + desired index number. 6 or 8 = accept word and advance to next zone (prompt A) – zone descriptor will be announced Press any other key to repeat the selected word

<sup>†</sup> See \*84 ASSIGN ZONE VOICE DESCRIPTORS section for Vocabulary Index.

programming m							
<b>Note:</b> Entering a	a number other than the one specified may give unpredictable results. <b>Device Programming</b> 0 = Exit mode, upon which this prompt blinks. 1 = Enter mode						
<i>R 01</i>	DEVICE NUMBER Enter the 2-digit device number (01-08) to be programmed [*] = Continue 00 = Exit Device Programming mode (displays blinking 80; enter * + desired data field or menu mode number)						
b aa	DEVICE ACTIONEnter the 1-digit action, 0-3, for the device being programmed (current action is displayed).0 = No response3 = Pulse on and off1 = Close for 2 seconds[*] = Continue2 = Close and stay closed[#] = Return to previous prompt						
L et	START EVENT TYPE (if applicable)Enter the 1-digit start event type, 0-3, for the device being programmed.0 = Not used3 = Trouble1 = Alarm[*] = Continue2 = Fault[#] = Return to previous prompt						
d zl	<b>START ZONE LIST</b> (if applicable) Enter the 1-digit zone list number, 1-3, or 0 if not used, for the device being programmed. [*] = Continue [#] = Return to previous prompt						
E zt	<b>START ZONE TYPE</b> (if applicable) Enter the 2-digit start zone type for the device being programmed (see Powerline Carrier Device Worksheet for zone type/system operation codes later in this manual). [*] = Continue [#] = Return to previous prompt						
F zl	<b>STOP ZONE LIST</b> (if applicable) Enter the 1-digit zone list number, 1-3, or 0 if not used, for the device being programmed. [*] = Continue [#] = Return to previous prompt						
IR zt	<b>STOP ZONE TYPE</b> (if applicable) Enter the 2-digit stop zone type for the device being programmed (see Powerline Carrier Device Worksheet for zone type/system operation codes later in this manual). [*] = Return to Device Number prompt (A)						

ואן = הפנערח נס Device Number prompt (A) [#] = Return to previous prompt

# **\*81 ZONE LISTS**

Use this mode to define zone lists for Powerline Carrier Devices and/or for the chime by zone feature. Press \*81 while in programming mode.

- Notes: (1) Entering a number other than one specified will give unpredictable results.
  - (2) Do not assign zones with zone types 20, 21 or 22 to a zone list.

(3) Zone List 2 should be used for Cross Zoning. When creating zone list 2 for cross zoning, include only zones assigned to zone types 3, 4, or 5. Do not include ones that have delays (entry/exit zones, interior w/delay) or 24-hour zones, as these zone types may produce unpredictable operation and may not function as intended. If field \*69 has been set to "0" (no cross zoning), then Zone List 2 can be used for other purposes.

#### ZONE LIST PROGRAMMING

0 = Exit mode, upon which this prompt blinks.

1 = Enter mode

#### ZONE LIST NUMBER

Enter the 2-digit zone list number (01-03) to be programmed (use zone list 03 for chime by zone feature). [\*] = Continue

00 = Exit mode (displays blinking 81; enter \* + desired data field or menu mode number)

#### **ZONE ENTRY TO LIST**

Enter the 2-digit zone number (zz) to be added to this zone list. The system will announce the Voice Descriptor for the selected zone, if it is programmed. [\*] = Accept zone number and enter the next zone number 00 = Accept zone number and continue to next prompt

#### DELETE ENTIRE ZONE LIST?

- 0 = Don't delete; continue to next prompt
- 1 = Delete the current zone list

#### DELETE SPECIFIC ZONES FROM LIST?

- 0 = Don't delete; continue to next zone list number (prompt A 01)
- 1 = Continue to delete zones prompt

r	
E	

#### DELETE ZONES

Enter the 2-digit zone number to be deleted from the current zone list. When deleting a zone(s) from the zone list, if the selected zone has a Voice Descriptor programmed, upon deletion it will be announced as a confirmation that it has been deleted.

[\*] = Delete zone and enter next zone to be deleted

00 =Return to next zone list number (prompt A 01)

Use this mode to enter transmitter serial numbers. Press \*83 while in programming mode.

#### ZONE NUMBER

Enter the 2-digit zone number of the first transmitter to have its serial number entered. The system will announce the Voice Descriptor for the selected zone if it has been programmed. [\*] = Continue; system searches for zones not yet entered, (for zones 2 to 25 a zone type must be entered) then advances to ENROLL SERIAL NUMBER prompt (1b). 00 = Exit Sequential mode, upon which the prompt "83" blinks.

IR zz

LE

!R

0 = Advance to next unlearned zone.

1 = Enter now and proceed to SERIAL NUMER prompt (1b). For 4-button keys (zones 26-29, 30-33, 34-37 and 38-41) the serial number will be learned to all four buttons.

2 = copy the previous serial number entry from the buffer.

**Note:** Before you can copy a serial number you must first enter a serial number. If no serial is stored in the buffer and a copy is attempted the panel will emit a long beep indicating an invalid operation.

3 = View existing serial number. (Only if "L" is displayed. If "L" is not displayed, panel will emit a long beep. Each digit will be displayed and the keypad will beep once for digits 1-6 and three times for last digit.

4 = Copy the 4-button key template set for zones 26 - 29 (includes all zone parameters except serial numbers). Only valid on 4-button key zones 30-33, 34-37 and 38-41 that do not have serial numbers learned. (Template acceptance is indicated by two beeps after copying. A single long beep emitted when copying templates indicates the template is not valid.)

9 = Delete existing serial number. Go to the (1A) prompt. (For 4-button key zones 26-29, 30-33, 34-37 and 38-41, deletes all four at once.)

[\*] = Advance to the next unlearned zone.

[#] = Return to previous prompt (1A).

#### SERIAL NUMBER

This prompt can be used to enroll the transmitter serial number via RF transmission or manually.

**RF Learning -** Two (2) transmissions (two key depressions at least five second apart) will be required for BR type or four (4) transmissions (fault, restore and fault, restore) for UR or RF type. BR type devices can be enrolled only by transmission from BR devices. Likewise, UR and RF devices can only be enrolled by transmission from a UR or RF device.

If the learned serial number has a different loop number than that entered in  $\pm 56$  the system will announce the Voice Descriptor, if it is programmed, followed by two beeps and will return to Prompt (1A) and "L" will be displayed.

If the loop number captured by RF transmission and that entered in \*56 mode match, the system will announce the Voice Descriptor, if it is programmed, followed by three beeps and return to Prompt (1A) and "LC" will be displayed. No additional transmissions are needed for confirmation.

**Manual Entry** - Enter the 7-digit serial number printed on the transmitter. If you enter an incorrect digit, press the [#] key to backup to prompt (1A) and start over. When all 7 digits are entered, press the [\*] key. If less than 7 digits are entered, the keypad will emit a single long beep and return to the (1A) prompt without displaying the "L". If more than 7 digits have been entered, the first 6 digits will be saved along with the last digit that was entered (entering 123456789 yields the serial number 1234569).

Note: If 52 seconds passes and no entry has been made, the system returns to prompt (1A).

#### **DELETE ZONE PARAMETERS CONFIRMATION**

1 = Confirm requested delete.

# **\*84 ASSIGN ZONE VOICE DESCRIPTORS**
