TABLE OF CONTENTS

The purpose of this document is to provide a quick and easy way to programme your VISTA-120 system. A recommended programming procedure is included, followed by a list of programme fields with the corresponding programme group they belong to (Systemwide, partition-specific, scheduling, etc.).

Following the programme forms are system layout worksheets. We recommend that you use these sheets to plan your system before programming is performed. If you need further information about specific programming options, see the VISTA-120 INSTALLATION INSTRUCTIONS.

Single Partition System
- The system default is for a single partition system. If you are setting up a single-partition system, the partition-specific fields become Systemwide fields. Follow the steps outlined on page 3 of this document for proper programming procedure.

Multiple-Partition System
- If you are setting up a multi-partition system, you must enter the number of partitions you are using in data field 2*00. Follow the steps outlined on page 3 of this document for proper programming procedure.

> **Make sure that one keypad is connected to the control and is set to device address "00."**

RECOMMENDED PROGRAMMING PROCEDURE

The following is a step-by-step procedure recommended for programming your VISTA-120 system.

1. **Set the keypads (and other peripheral devices) to the appropriate addresses.**

2. **Set factory defaults by pressing *97.**
This will automatically enable keypad addresses 00-03, so be sure at least one keypad is set to one of these addresses.

3. **Programme Systemwide (global) data fields.**
Using the programming form as a guide, enter programme mode and programme all systemwide programming fields. These options affect the entire system, regardless of partitions. They include control options, downloader and dialler options, RF options, event logging options, etc.
Note that field 2*00 (number of partitions) & field 1*32 (RF expander type) must be programmed before continuing.

4. **Programme partition-specific fields.**
Partition-specific fields can have different values for each partition. When the systemwide fields have been programmed, programme all partition-specific programming fields by first pressing *91 to select a partition (while still in data field programme mode). Then enter the first partition-specific field number *09. The next partition-specific field will automatically be displayed when you are finished entering the value for field *09. To programme the fields for the next partition, press *91, enter the desired partition number, then enter field *09.

5. **Use #93 Menu Mode for device programming.**
Refer to the DEVICE PROGRAMMING section of the Installation Instructions to assign keypad ID numbers and default partitions for each keypad, and to selectively suppress certain keypad sounding options. Also use this mode to assign RF receivers, relay modules, and the VIP module.

6. **Use #93 Menu Mode for zone programming.**
Refer to the ZONE PROGRAMMING section of the Installation Instructions to programme zone response types, assign right loop zones and wireless zones, assign zones to partitions, and to programme alarm report codes.

7. **Use #93 Menu Mode for programming relays.**
Refer to the RELAY PROGRAMMING section of the Installation Instructions to programme desired relay operation.

8. **Programme Communication options.**
Refer to the COMMUNICATION PROGRAMMING section of the Installation Instructions to load communication defaults and to programme related fields. Then use #93 mode to programme report codes if necessary.

9. **Use #93 Menu Mode for programming alpha descriptors.**
Refer to the ALPHA PROGRAMMING section of the Installation Instructions to enter zone and partition descriptors and a custom installer's message.

10. **Use #93 Menu Mode for programming relay voice descriptors and custom word substitutes.**
Refer to the RELAY VOICE DESCRIPTORS section of the Installation Instructions for further instructions for programming relay descriptors to be annunciated by the 4285 VIP module, as well as the CUSTOM INDEX section for custom word substitutes.

11. **Use #80 Mode for programming schedules.**
Refer to the SCHEDULING section of the Installation Instructions to programme open/close schedules, temporary and holiday schedules, limitation of access schedules, and time driven events.

1**2.** **Define user access codes.**
Refer to SECURITY ACCESS CODES section of the Installation Instructions to programme authority level, O/C reporting option, partition assignments, and wireless key assignments for each user.

13. **Exit Programming Mode**
Exit programming mode by pressing either *98 or *99. A second entry of *99 is required if the exit is being done from fields 1*00 and above.

To prevent re-access to Programming mode using the Installer's code, use *98. The only way to re-access Programming mode is by depressing both the [*] and [#] keys at the same time within 30 seconds of power up.

Exiting by using *99 always allows reentry into Programming mode using the Installer's code. Either way of exiting will allow access via downloading. Note that if local programming lockout is set via downloading, programming mode cannot be entered at the keypad.

SUMMARY OF PROGRAMMING COMMANDS

- **To enter programme mode,** enter installer code + [8] + [0] + [0] + [0]
- **To set standard defaults,** press *97
- **To set communication defaults,** press *94 + one of the following: *80=low speed; *81=Ademco Express; *82=Ademco Expanded High Speed; *83=Ademco Contact ID
- **To change to next page of programme fields,** press *94
- **To return to previous set of fields,** press *99
- **To erase account & phone number field entries,** press [*] + field number + [*]
- **To assign zone descriptors,** press #93 + follow menu prompts
- **To add custom words,** press #93 + follow menu prompts
- **To enter Installer's Message,** press #93 + follow menu prompts
- **To exit programme mode,** press *99 OR *98: *99 allows re-access to programming mode by installer code. *98 prevents re-access to programming mode by installer code.

PARTITION-SPECIFIC FIELDS

(Duplicate these pages for each partition in the installation.)

To programme these fields,

1. Press *91 to select a partition.
2. Enter a partition-specific field number (ex. *09).
3. Make the required entry.
4. Repeat steps 1-3 for each partition in the system.

PARTITION-SPECIFIC FIELDS

(Duplicate these pages for each partition in the installation.)

1*19 ARMS COMMON AREA 3   ☐ [0]

Enter 1 if arming this partition attempts to arm area 3; enter 0 if not.

1*26 PANIC BUTTON
OR SPEED KEY

☐	☐	☐	☐
A	B	C	D

Enter 00 if the key will be used for a panic function or 01-32 for the number of the macro that will be executed when the key is pressed.

1*43 PERM. KEYPAD BACKLIGHT   ☐ [0]

1=enable; 0=disable When disabled, display lights when any key is pressed, and turns off after period of keypad inactivity.

1*45 EXIT DELAY SOUNDING   ☐ [0]

1*76 ACCESS CONTROL RELAY
FOR PART.   ☐ [00]

Relay will be pulsed for 2 seconds whenever code + [0] is pressed.
Enter 01-96; 00=none.

2*05 AUTO-ARM DELAY   ☐ [15]

Enter the time between the end of the arming window and the start of auto-arming warning period, in values of 1-14 times 4 minutes; 00=instant; [15=no auto arm at all]. When this delay expires, the Auto-Arm Warning Period begins.

2*06 AUTO-ARM WARNING PERIOD   ☐ [00]

This is the time during which the user is warned to exit the premises prior to the auto-arming of the system (beeps every 15 seconds; "ALERT" displayed). Enter 01-15 minutes. 00=instant at end of arming delay .

2*07 AUTO-DISARM DELAY   ☐ [15]

This is the time between the end of the disarming window and the start of auto-disarming. Enter 01-14 times 4 minutes; 00=instant at end of window; 15=no auto-disarm.

2*08 ENABLE FORCE ARM
FOR AUTO-ARM   ☐ [0]

0=disable; 1=enable

2*09 OPEN/CLOSE REPORTS
BY EXCEPTION   ☐ [0]

1=enable; 0=disable; If enabled, only openings and closings occurring outside the scheduled opening/closing windows will trigger dialler reports. Opening reports will also be suppressed during the closing window, in order to prevent false reports when the user arms the system and then reenters the premises to retrieve a forgotten item.

2*10 ALLOW DISARMING ONLY DURING
ARMING/DISARMING WINDOWS   ☐ [0]

0=disable; 1=enable; See Systemwide field 2*11 if enabling field 2*10. This feature adds high security to the installation.

2*18 ENABLE GOTO FOR THIS PARTITION   ☐ [0]

PROGRAMMING WITH #93 MENU MODE

NOTE: The following fields should be preset before beginning: 2*00 Number of Partitions; 1*32 receiver type. In addition, receivers should be programmed via Device programming.

After programming all system related programming fields in the usual way, press #93 while still in programming mode to display the first choice of the menu driven programming functions. Press 0 (NO) or 1 (YES) in response to the displayed menu selection. Pressing 0 will display the next choice in sequence. Menu selections are as follows:

ZONE PROG? 0=No 1=Yes	For programming the following: • Zone Number • Zone Response Type • Wired zone • RF Zone • Right/left Loop Zone • Serial number RPM zone • Partition Number for Zone • Dialler report code for zone
SEQUENTIAL LEARN? 0=no 1=yes	For entering (enrolling) 5800 transmitter & serial number polling loop device serial numbers into the system.
REPORT CODE PROG 0 = no; 1 = yes	For entering report codes for zones and all system conditions.
ALPHA PROG? 0=no 1=yes	For entering alpha descriptors for the following: • Zone Descriptors • Installer's Message • Custom Words • Partition Descriptors • Relay Descriptors
DEVICE PROG? 0=no 1=yes	For defining the following device characteristics for addressable devices, including keypads, RF receivers (4281/5881/5882), 4285 voice module and 4204 output relay modules: • Device Address • Device Type • Device's Home Partition • Keypad Options • Voice Module
RELAY PROG? 0=no 1=yes	For defining output relay functions.
RLY VOICE DESCR? 0=no 1=yes	For entering voice descriptors to be used with voice module functions.
CUSTOM INDEX #? 0=no 1=yes	For creating custom word substitutes for voice module annunciation.
CLEAR RF SERIAL #? 0=no 1=yes	For deleting all RF serial numbers presently enrolled in the system.

#93 MENU MODE KEY COMMANDS

The following is a list of commands used while in the menu mode.

#93	Enters Menu mode
[✶]	Serves as ENTER key. Press to have keypad accept entry.
[#]	Backs up to previous screen.
0	Press to answer NO
1	Press to answer YES
01-09	All data entries are 2-digit entries.
00	Escapes from menu mode, back into field programming mode, when entered at the first question for each category.

SYSTEM LAYOUT WORKSHEETS

As with any security system, you should first define the installation. This includes determining how many partitions will be used, how many zones per partition, and how many users per partition. You will also need to determine what peripheral devices will be needed, and basic system options such as exit/entry delays, etc. The control panel itself should be located in an area that will facilitate wire runs to all partitions, and will allow access to power and telephone circuits.

To help you layout a partitioned system, use the following worksheet. This will further simplify the programming process.
