"START" ZONE LIST: Upon alarm, fault, or trouble of ANY zone on this list, device action will START.

"STOP" RESTORE of ZONE LIST: Upon restore of ALL zones on this list, device action will STOP. It need not be same list as used for START.

NOTE: Do not use input type "BR" transmitters in a zone list to STOP a relay action, since these transmitters do not send restores.

ZT = ZONE TYPE/SYSTEM OPERATION

Choices for Zone Types are:

00 = Not Used	06 = 24-Hr Silent
01 = Entry/Exit #1	07 = 24-Hr Audible
02 = Entry/Exit #2	08 = 24-Hr Aux
03 = Perimeter	09 = Fire
04 = Interior Follower	10 = Interior w/Delay
05 = Trouble Day/Alarm Night	24 = Silent Burglary

Note: *Any* zone in "ZT" going into alarm, fault, or trouble will actuate relay. *Any* zone of that type that restores will stop relay action.

Choices for System Operation are:

20 = Arming–Stay	39 = Any Fire Alarm
21 = Arming–Away	40 = Bypassing
22 = Disarming (Code + OFF)	41 = AC Power Failure
31 = End of Exit Time	42 = System Battery Low
32 = Start of Entry Time	43 = Communication Failure
33 = Any Burglary Alarm	52 = Kissoff
36 = At Bell Timeout**	58 = Duress
38 = Chime	

Note: In normal operation mode: Code + # + 7 + N Key Entry starts Device N. Code + # + 8 + N Key Entry stops Device N.

** Or at Disarming, whichever occurs first.

∗**81**   **ZONE LISTS FOR OUTPUT DEVICES** (01 - 03); Cross Zones (04); and Night-Stay Zones (05). This is an interactive mode. Fill in the required data on the worksheet below and follow the procedure in the installation manual as you enter the data in response to the displays and prompts that appear in sequence.

Note: Record desired zone numbers below. More or fewer boxes than shown may be needed, since any list may include *any* or *all* of system's zone numbers.

Zone List 01: Started or stopped by zone numbers (enter 00 to end entries).

☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ ...etc.

Zone List 02: Started or stopped by zone numbers (enter 00 to end entries).

☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ ...etc.

Zone List 03: Started or stopped by zone numbers AND/OR assignment of Chime zones (enter 00 to end entries).

☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ ...etc.

Zone List 04: Cross Zone list: An alarm will occur if the system is armed and two or more of these active burglary zones (Entry/Exit 1 or 2, Interior Follower, Perimeter, Trouble Day/Alarm, Night, or Interior w/ Delay) remain faulted after Cross Zone time has expired, and this mode is enabled.

☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ ...etc.

NOTE: This Zone List 04 is not to used in UL installations.

Zone List 05: Night Stay Zones: These interior zones (Interior Follower or Interior w/ delay) will be armed when arming the system in the Night-Stay mode.

☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ , ☐☐ ...etc.

NOTE: Zone 92, DURESS, must **not** be programmed into any Zone List.

SPECIAL MESSAGES

OC = OPEN CIRCUIT (no communication between console and control).

EE or **ENTRY ERROR** = ERROR (invalid field number entered; re-enter valid field number).

After powering up, "**AC, dl**" (disabled) or "**Busy Standby**" and "**NOT READY**" will be displayed after approximately 4 seconds. This will revert to **READY** in approximately. 1 minute, which allows PIRS, etc. to stabilize.
To bypass this delay, press: # + 0.

If **E4** or **E8** appears, more zones than the expansion units can handle have been programmed. Correct the programming and then completely de-power and re-power the control to clear this indication and remove the disable indication.

TO ENTER PROGRAMMING MODE:
   1. POWER UP, then press ✶ and **#** both at once, within 50 seconds of powering up.
   OR
   2. Initially, key: **Installer Code** (**4 + 1 + 1 + 2)** plus **8 + 0 + 0.**
   OR
   3. If different **Installer Code** is programmed, key: **New Installer Code + 8 + 0 + 0.**
      (If ✶ 98 was used to exit previously, method 1 above must be used to enter the program mode again.)

TO EXIT PROGRAMMING MODE:
   ✶**98**   Exits programming mode and *prevents* re-entry by keying Installer Code + 8 + 0 + 0. If ✶**98** is used to exit programming mode, system must be powered down, and method 1 above used to enter the programming mode.
   ✶**99**   Exits programming mode and *allows* re-entry by keying Installer Code + 8 + 0 + 0; or by powering up, then pressing ✶ and # within 50 seconds of power-up.
