

## PD4-CB - Power Distribution Module

### Overview:

The PD4-CB Power Distribution Unit is a convenient way to convert a single DC or AC output power supply to four (4) individually circuit breaker outputs.

### Specifications:

- Conveniently converts a single AC or DC input into four (4) individually circuit breaker outputs
- Surge protected outputs
- Handles up to 28VAC/VDC
- Power output LED indicator
- Power ON / OFF switch

Board dimensions: 5.25"L x 3.25"W x 1"H

### Installation Instructions:

1. Mount PD4-CB in desired location.
2. Connect the power supply output to input terminals marked [1] and [2] terminal [1] is NEG. (-) terminal [2] is POS. (+).  
Note: If using DC take care to follow polarity indicated on above diagram.
3. Connect devices to be powered to terminal pairs 1 to 4, marked [1P-1N thru 4P - 4N].  
**Note:** Is good operating practice to measure output voltage before connecting devices. All terminals with common suffix P 1P, 2P..." are same polarity.
4. Slide switch on board turns output power ON and OFF.
