Important Information

To enable remote access on the Escort4580 v1.2, you must:

1. turn on the **DLS Enabled** toggle option in the DLS Toggles section (reference number [000300]) of the PC4010/4020 control panel, AND

2. turn on the **Remote Access Enabled** toggle option in the Escort4580 Telephone Access Options section (programming section [021]).

Refer to the Escort4580 v1.2 *Installation Manual* and *Programming Worksheets* for more information.
