

FIre-LITe®ALarms Incorporated

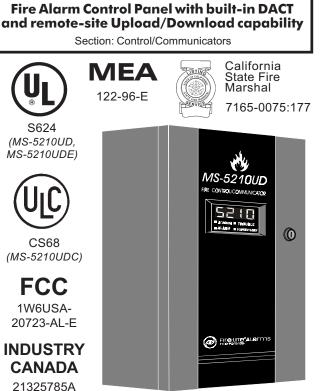

GENERAL

The Fire-Lite MS-5210UD is a 24-volt, ten-zone fire alarm control panel with built-in communicator and remote-site Upload/Download capability (requires panel software revision #MS52103.0 or greater). The integral communicator transmits event information (alarms, troubles, supervisories, faults, etc.) to a UL listed central station. Selectable transmission formats allow the MS-5210UD to communicate to virtually all central stations.

FEATURES

- Ten programmable Initiating Device Circuits (zones). Each zone may be programmed for:
 - ✓ Two-wire smoke detectors.
 - ✓ N.O. contact devices (pull, heat).
 - ✓ Four-wire smoke detectors.
 - ✓ Waterflow operation (silenceable or nonsilenceable).
 - ✓ Supervisory operation.
 - ✓ Auto-reset supervisory operation.
 - ✓ Remote switch for Reset, Drill, Silence and Acknowledae.
 - ✓ Auto-reset or latching, critical and noncritical process monitoring.
- · Zones programmed for process monitoring require a contact closure for activation and can be used to monitor:
 - ✓ Temperature (high/low temp). ✓ Loss of air flow.
 - ✓ Water level. ✓ Gas detection. ✓ Open/Close.
 - ✓ Refrigeration. ✓ Tamper (non-fire).
- Two built-in, Class B (Style Y) Notification Appliance Circuits (NACs) — expandable to four.
- Notification Appliance Circuits may be programmed: ✓ Silenceable.
 - ✓ Non-Silenceable (a strobe circuit can keep flashing after the panel is silenced).
 - ✓ Auto-Silence (program 5 to 30 minutes).
 - ✓ Silence Inhibit (60 seconds).
 - ✓ Coding (March Time, Temporal, California).
- 3.0 Amps of Notification Appliance power, expandable to 6.0 amps (meets the critical power requirements for ADA and UL-1971 devices).
- · Two built-in, fully programmable Form-A relays expandable to four with two Form-C relays.
- Dual-line rotary- or Touch-Tone®-dial DACT interfaces to public telephone network (leased phone lines are not required).
- · 24-Volt operation.
- · Built-in voltmeter measures:
 - ✓ Zone voltage.
 - ✓ Primary AC line voltage.
 - ✓ Battery voltage.
 - ✓ Notification Appliance Circuit(s) voltage.
 - ✓ Resettable 24-volt power.

February 13, 1998

MS-5210UD

A3-400

- Surface Mount Technology (SMT).
- Fully programmable via built-in keypad (no costly external programmers necessary).
- · Complies with NFPA 72-1993 edition (Local, Central Station and Remote Station [DACT only - not polarity reversal] Fire Alarm Systems).
- Reporting Formats include Ademco Contact ID and 14 others.
- Integral battery charger for up to 60 hours of standby power.
- · Fuseless, power-limited technology meets new UL power- limiting requirements, effective May 1, 1995.
- · Programmable Alarm Presignal Timer, Alarm Verification Timer and Optional Trouble Reminder.
- · Single-person walk test with 256-event walk-test buffer.
- · Fire drill function.
- · Zone disable capability (software).
- 256-Event history buffer with time and date stamp, stored in permanent memory.
- Accurate real-time clock/calendar.
- Electronics and operational controls fully enclosed in a • lockable cabinet capable of housing up to 12 AH batteries.
- Optional LED-10 Series Remote Annunciators operate off serial two-wire EIA-485 interface.
- Optional contact-by-zone module and printer interface for on- or off-line printing.
- 230 VAC. 50 Hz international version available.

This document is not intended to be used for installation purposes. We try to keep our product information up-to-date and accurate. We cannot cover all specific applications or anticipate all requirements. All specifications are subject to change without notice. For more information, contact Fire-Lite. ISO-9001

Engineering and Manufacturing Quality System Certified to International Standard ISO-9001

FIRE LITE ALARMS \odot

MS-5210UD(C/E)

Remote Site Upload/Download

The MS-5210UD may be downloaded or uploaded (*requires panel software revision #MS52103.0 or greater*) without compromising the system fire protection at the protected premises.

- · Download system programming.
- Upload key system information:
 - \checkmark Current system status, history + walk test files. \checkmark Zone, AC line, NAC1, 2, 3 and 4, resettable power
 - and battery voltages. ✓ System programming.
 - System programming.
- Upload or download within one minute without affecting normal fire panel functions.
- · Multiple security techniques.
- Requires **PK-5210UD** programming kit, which works with most Hayes-compatible modems (consult factory for listing).

Specifications

Single PC board design using Surface Mount Technology (SMT). Two modular telephone jacks for connection to RJ31X/Modules.

AC Power

- 120 VAC, 50/60 Hz, 2.3 amps.
- 230 VAC, 50 Hz, 1.2 amps ("E" suffix).
- Wire size: minimum 14 AWG with 600-volt insulation.
- Built-in brownout circuitry.
- Built-in voltmeter.

Communicator

- One line-active indicator for each of two phone lines.
- "Kiss-Off" signal LED.
- Dual "low telephone voltage detect" circuitry.
- Programmable event codes per each format.
- Up to 100 transmitted events/messages.
- · Selectable/deselectable transmissions of 100 events.

Communication Formats

Express and Ademco Contact ID formats allow complete transaction to be communicated in under five seconds.

- · Ademco Contact ID.
- 20 PPS, 3+1 standard and expanded.
- 20 PPS, 4+1 standard and expanded.
- 20 PPS, 4+2 standard and expanded.
- 4+1 and 4+2 Ademco Express.

Initiating Device Circuits (zones)

The MS-5210UD includes ten programmable Class B Initiating Device Circuits (zones). Use the CAC-10F Class A converter module to convert **all** Class B IDC's/NAC's to Class A.

Each zone may support two-wire smoke detectors. Programming options include:

- Normally Open Contact devices (pull, heat).
- · Four-wire smoke detectors.
- Waterflow (silenceable/non-silenceable) operation.
- Supervisory (standard/auto-reset) operation.
- Remote switch for Reset, Drill, Silence, Acknowledge.
- Critical and Noncritical Process Monitoring (standard/ auto-reset).

All circuits are power-limited and fully supervised. They allow up to 100 ohms of line resistance and allow for use of 12 to 18 AWG wire.

Notification Appliance Circuits

- Two Style Y (Class B) @ 3.0 amps each. Use the CAC-10F Class A Converter Module to convert *all* Class B NAC's and IDC's to Class A.
- Option module adds two Style Z (Class A) NACs @ 1.5 amps each.
- All circuits are fully power-limited and meet the new UL power-limiting requirements effective May 1, 1995, using fuseless technology.

Auxiliary Outputs

- Resettable four-wire smoke detector power @ 500 mA.
- Non-resettable power @ 500 mA.
- Two fully programmable Form-A/B relays.
- Option module adds two fully programmable Form-C relays.

Compatible Devices, EIA-485 Port

LED-10IM: EIA-485 Interface Module. Provides MS-5210UD with EIA-485 output, capable of supporting up to 32 compatible EIA-485 devices (listed below).

LED-10 Series: LED-type fire annunciators capable of displaying Alarm (red) and Trouble (yellow) LEDs for all ten Initiating Device Circuits (IDCs). *NOTE:* For Canadian Supervisory Service, use LED-10LS2 only.

AFM-16AF: LED-type fire annunciator capable of providing up to 16 zones of Alarm (red) annunciation and common system trouble LED. Mounts to 4-gang electrical box *ONLY*.

LDM Series: Lamp Driver Module series for use with custom graphic annunciators.

ACM-8RF: Remote Form-C relay module. Provides eight mappable Form-C relays driven by EIA-485 for contact-by-zone capability (two minimum required for contact-by-zone). Each requires ABS-8RF for mounting.

NOTE: For more detailed information on **Compatible EIA-485 Devices** for use with the MS-5210UD, please refer to the **LED-10, AFM/AFM-X, LDM** or **ACM-8RF** data sheets, document numbers DF-51500, DF-51465, DF-51384, and DF-51555 respectively.

Cabinet Specifications

The cabinet is red with a dark blue overlay. Knockouts on the top, sides, and back provide ease of wire entry. The cabinet can be surface or semi-flush mounted and is compact in design.

Dimensions:

oor:	17.11" high x 14.71" wide
	(43.46 cm high x 37.36 cm wide).

- Backbox: 16.90" high x 14.50" wide x 4.50" deep (42.93 cm high x 36.83 cm wide x 11.43 cm deep).
- Trim Ring: *Part # TR-4-R,* 20.020" high x 17.620" wide (50.85 cm high x 44.75 cm wide).

PRODUCT LINE INFORMATION

Model	Description

- **MS-5210UD** Ten-zone, 24-volt Fire Alarm Control Communicator (includes backbox, transformer, technical manual, and a frame & post operating instruction sheet).
- **MS-5210UDC** Same as above with ULC listing and DP-5210UD dress panel included.

PRODUCT LINE INFORMATION, cont'd

MS-5210UDI	Same as MS-5210UD with 230 VAC, 50 Hz transformer (UL listed).					
XRM-24	120 VAC, 100 VA transformer. Expands NAC power from 3.0 to 6.0 amps and system power from 3.6 amps to 6.6 amps.					
NAC-REM	Notification Appliance (Signal) Circuit, Relay Expander Module. Adds two (Class A) NACs and two Form-C relays.					
CAC-10F	Class A Converter Module. Converts all Class B Initiating Device Circuits (zones) and stan- dard Notification Appliance Circuits to Class A					
PRT-24	Printer Interface Module. Provides an EIA-232 printer output. Includes cable, DB9F and DB25 adapter.					

PK-5210UD Upload/download utility includes: programming software (3.5" IBM-compatible, highdensity disks) and instruction manual. DP-5210UD Internal Dress Panel (included when ordering MS-5210UDC). MCBL-7 DACT phone cord, 7 feet long (two required). UL listed battery backbox. Required for bat-**BB-17F** teries over 12 AH. ABS-8RF Metal enclosure for mounting each ACM-8RF module. TR-4-R Trim ring. PS-1270 Battery, 12 volt, 7.0 AH (two required). PS-12120 Battery, 12 volt, 12.0 AH (two required). PS-12170 Battery, 12 volt, 17.0 AH (two required, requires BB-17F backbox).
