

Trim Ring

Product Installation Drawing

Document Number: 50108 Rev: B

ECN: 95-076 4/26/95

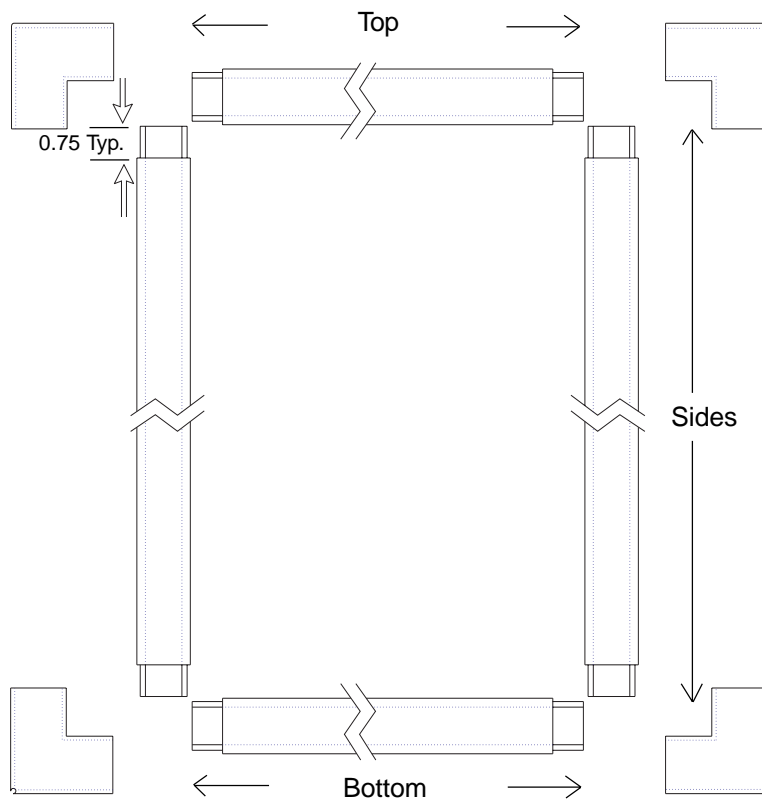

This Product Installation Drawing is to be used for installing the following Trim Ring Model Numbers:

TR-A3N, TR-B3N, TR-C3N, TR-D3N and TR-ABS4DN.

The trim ring consists of eight pieces:

- ✓ Top and bottom pieces which are symmetrical.
- ✓ Left and right pieces which are symmetrical.
- ✓ Four corner pieces which are identical.

No hardware is needed for securing the trim ring. It's made of a grey molded plastic with an adhesive backing.

Installation Instructions

The top and the two sides should be put together first. Take one of the four corner pieces, and laying it over the top and side tab, press into place. Do the same for the other corner. Then peel the plastic strip off the back, and press the adhesive backing to the wall, lining up the trim ring over the box. Mount bottom piece to the wall at bottom of box, then apply corner pieces.

The distance from the front of the box to the face of the wall should be at least two inches, to allow room for the key to fit in once the trim ring is installed.
