

AFP-400 Analog Fire Panel
Addendum for Release 2.0 Software
Document 50536 ECN96-238 8/22/96

This addendum applies to the following manuals:

Summary of new AFP-400 features in Release 2.0 Software:

- Support for New Smoke Detectors – The NOTIFIER LPX-751 VIEW™ (Very Intelligent Early Warning) Laser Detector and the IPX-751 intelligent multisensor detector.
- Increased Photodetector sensitivity range.
- New software type codes that provide special functions for MMX Monitor Modules, CMX Control Modules, and Panel Output circuits.
- Nine new ACS annunciator addresses (A11-A19) for annunciating UDACT information or displaying additional ACS addresses.
- Increased Soak Timer range and new software type codes for low pressure CO2 applications.
- Support for a Combination Waterflow/Supervisory Valve Monitor.
