PRT-24 Printer Interface Module Cable
The purpose of this supplement is to inform installers about a color change for one of the wires in the PRT-24 cable. The *yellow* wire has been replaced with a *white* wire. Refer to the section of the manual with the heading **Optional Module Installation** and the subheading **Printer Interface Module/Installation**. An illustration shows the PRT-24 module wired to the DB-25P connector. Replace the *yellow* label in the illustration with *white* as shown in the following illustration. The actual connections remain unchanged.

PRT-24 Printer Interface Module

yellow wire has been changed to *white*
