

# TouchCenter

First Alert Professional's innovative TouchCenter keypad makes operating your system easier than ever.

A simple touch on the screen, and you can arm and disarm your system, bypass zones or control lights and appliances. With easy to understand icons and menu-driven prompts, you are walked through the system operation every step of the way.

The built-in message center feature allows users to record and play back voice messages right from the keypad. No more missed messages or loose pieces of paper flying around!

## Features:

- **Arm System**
  - Away
  - Stay
  - Night
- **Exit/Entry**
- **User Codes**
  - Authorized users can add or delete codes
- **Bypass option**
  - If system is not ready to arm, displays any open zones with:
    - Zone number
    - Zone description
    - Status
- **Event Log**
  - The TouchCenter conveniently stores the most recent actions involving system use.
    - View when the system was used and who used it
    - Keep tabs on family members (i.e., checking if a child has armed the system upon returning home from school)
- **Message Center**
  - The TouchCenter includes a microphone and speaker so users can record and playback messages. Features include:
    - Volume control
    - Message recording time
    - Message forward
    - Message reverse
    - Message delete
