PROFESSIONAL
SECURITY SYSTEMS®
A Honeywell Company

You work hard so you can enjoy the best that life has to offer. From state-of-the-art entertainment products to appliances, your home is equipped with the latest technology. When selecting a security system that complements these enhancements, the Symphony from First Alert Professional is the perfect choice. This unique system provides you with the latest security and convenience options so you can create a more melodious lifestyle for your family.

What Symphony Would You Like to Hear?

Your authorized First Alert Professional dealer will create a system that is just the right tempo for your family. Whether you want a soothing quartet or a booming orchestra, the Symphony will be composed of the pieces you select. Let's take a look at the players that make up this revolutionary product.

One-Touch SECURITY

Symphony Keeps You in Touch

The Symphony's maestro is a revolutionary touch-screen interface that keeps your family in sync. The full-color screen allows you to enter your security information with one touch. There are no complicated commands to remember! Whether arming or disarming or bypassing zones, the easy-to-use touch-screen makes it simple.

For areas outside the home, you may want to use our innovative wireless products. These portable devices let you open a garage door or turn on a light with the touch of a button. So whether you are coming home from work or relaxing in the yard, you can operate the Symphony with one of these easy-to-use products.

Lighting the Way

Now that your home is secure, let's lighten up the place with another player in the orchestra. With an additional option, you can turn on a porch light for arriving guests or open the garage door. You can even turn on a pool pump or lawn sprinklers right from the Symphony. It's little touches like these that make life a little easier.

The Wonders of the Web

Symphony can be arranged to give you as much information as you desire. For today's families, that means incorporating the Internet option. Each family member can view a personalized screen, which contains valuable Internet information right at the door. What can you see? Anything from the latest sports scores for an avid athlete or stock prices for an involved investor. You can even view your personal e-mail from any non-proprietary service so you know the subject and sender of your latest messages.

Keeping Connected

With Symphony and a broadband connection, you can control system functions such as security and lighting remotely from any Web browser. Did you leave for work and forget to arm the system? No problem. Just visit our secure website to arm your system remotely.
