

# INTRODUCING

## THE *Linear* DUAL 824 SUPERVISED HYBRID SECURITY CONTROL

The **DUAL 824** isn't just another four- or six-zone hardwire panel with an add-on receiver. It's the complete package. Other hybrid panels are just hardwire panels with an add-on radio receiver. You've got to assemble the package. The **DUAL 824** is a wireless panel with eight hardwire zones. It's completely assembled.

The **DUAL 824!** It's a fully loaded hybrid, built for speed—specifically, at installation. The built-in superheterodyne receiver eliminates the need for your installer to take time to find a radio and a separate place to mount it. Need a detection device that just isn't available in a wireless configuration? Well, with up to eight hardwire zones, you have complete system flexibility in the **DUAL 824**.

# **TYPICAL APPLICATIONS**

## **TRACT HOUSING DEVELOPMENTS**

The **DUAL 824** provides total flexibility at a fraction of the cost of other hybrid systems. Now your installer can pre-wire the basic system and meet the additional needs of your client with wireless devices for the other security points.

## **REPLACEMENT SYSTEMS**

Need more zones? Can't run wires? Replace the existing system with the **DUAL 824** and use radio transmitters for the additional zones.

## **RETROFIT MARKET**

Now, you can change out a system at an economical price and have up sell potential too. The **DUAL 824** gives you more than enough hardwire zones and wireless capabilities too.
