

PROGRAMMING INSTRUCTIONS

GEM-P3200 CONTROL PANEL/COMMUNICATOR

Programming the GEM-P3200 Control Panel with the "Classic" GEM-RP1CAe2 Keypad and the "K Series" GEM-K1CA Keypad

"Classic" GEM-RP1CAe2

"K Series" GEM-K1CA

Quick Start (for "Classic" GEM-RP1CAe2)

1. Refer to the wiring diagram, connect Siren, Aux. Power, PGM Output, Remote Bus, Earth ground, Zone and Telephone wiring. NOTE: See Installation Instructions (WI817).
2. Connect AC power first and then the battery.
3. Configure the keypad (see page 34).
4. Access the Easy Menu Driven (Dealer Program) Mode:

Press NO (**INSTANT**) until "ACTIVATE PROGRAM Y/N" appears on the keypad display.

Press YES (**INTERIOR**) to Enter Dealer Program Mode. Go to page 5.

Quick Start (for "K-Series" GEM-K1CA)

1. Refer to the wiring diagram, connect Siren, Aux. Power, PGM Output, Remote Bus, Earth ground, Zone and Telephone wiring. NOTE: See Installation Instructions (WI817).
2. Connect AC power first and then the battery.
3. Configure the keypad (see page 34).
4. Access the Easy Menu Driven (Dealer Program) Mode:

Press NO (**AWAY**) until "ACTIVATE PROGRAM Y/N" appears on the keypad display.

Press YES (**STAY**) to Enter Dealer Program Mode. Go to page 5.

THIS MANUAL INCLUDES FEATURES WHICH ARE ONLY AVAILABLE IN CONTROL PANEL FIRMWARE VERSION 20 OR LATER.

IMPORTANT NOTE

This manual supports the keypad programming of the GEM-P3200 control panel with the NAPCO "classic" GEM-RP1CAe2 keypad as well as the GEM-K1CA "K Series" keypad. The new "K Series" GEM-K1CA model offers the new STAY and AWAY buttons with simplified functionality, along with the new MENU and ENTER buttons. **Note:** While the instructions in this manual are depicted using the GEM-K1CA keypad, the manual applies to both the "classic" and the "K Series" keypads.

Program Mode is the same for both keypads--**only the button names have changed**, as follows:

- The  button and the  button operate identically (in Program Mode) for both keypads.
- The  button and the  button operate identically (in Program Mode) for both keypads.
- The  button and the  button operate identically (in Program Mode) for both keypads. The words "NEXT/YES button" are used in this manual.
- The  button and the  button operate identically (in Program Mode) for both keypads. The words "PRIOR/NO button" are used in this manual.

CHANGES FROM PREVIOUS EDITION

The following changes have been made to this manual (W1818E) since the previous edition (W1818D).

Pages 6-13: Easy Program Menu includes new selections: 24 Hour Zones in Area 1, Chime Zones in Area 1, Chime 2 Zones in Area 1, Exit/Entry2 Zones in Area 1, 50 mS Loop Response Zones, Aux Output Activated on Alarm Zones, Sensor Watch Zones, Keypad Sounder On Alarm Zones, Auto Bypass Re-entry Zones, Enable No EOLR Zones, Enable Telco Line Fault Test, Enable Burg Output Chirp on KeyFob, Enable SIA CP-01 Features.

Pages 19-53: Direct Address Program Mode has been modified to accommodate new "user friendly" address displays for the GEM-K1CA and GEM-RP1CAe2 keypads, allowing easier programming. Programming information for other keypads such as the GEM-RP2ASe2, GEM-RP3DGTL, GEM-RP4FRC, GEM-K2AS, GEM-K3DGTL, and the GEM-K4RF have been placed into W11185.

Page 39, added "Telco Answering Service Override" name changed to "2nd Call Answering Machine Override".

Page 38, added address 2417, bit 5, "Lug E4 Armed Away Only".

Panel includes added features to accommodate the SIA CP-01 False Alarm Reduction Standard. Therefore Direct Address Program Mode addresses have been modified or added, as follows:

- Page 39, modified address 2422, bit 6, Enable Bell Output on Keyfob Arming
- Page 39, added address 2421, bit 3, Aux. Output Chirp on Keyfob Arm/Disarm
- Page 39, added address 2421, bit 4, Don't Clear Aux. Relay with Disarm
- Page 39, added address 3905, bit 1, Exit Time Restart
- Page 39, added address 3905, bit 2, Sound Alarm on Exit Error
- Page 39, added address 3905, bit 3, Rpt Exit Err/Recent Close
- Page 39, added address 3905, bit 4, Digital Dialer Rpt Enter/Exit Test Mode
- Page 39, added address 3905, bit 5, Enable CP-01 Limits
- Page 39, added address 3905, bit 6, Disable Call Waiting on First Attempt
- Page 20, modified address 4082, Report Cancel Window.

Address Number Index added at end of manual.

Page 4, the following statement added: **Note:** Unattended downloading from a computer is not allowed for Fire Alarm or UL installations."

Pages 4, 5, and 7, "50mS Loop Response Zones", since the time of 50 mS does not meet the UL listing requirement of the panel, the following notation is made: "750 mS is required for Loop Response time in UL installations".

Page 7, "Auto Bypass Re-entry Zones" notation added: "Not evaluated by UL".

Page 10, "Enter User Codes", instructions modified to enter a code from "3 to 6" digits.

Area Options/Explanation chart at the top of page 11: the following information added: "Ambush: Allows user code to send Ambush signal to Central Station".

In Zone Options (pages 31-36) and the wiring diagram (page 68), the following notation added: "Disable Auto-Reset on non-fire zones for SIA CP-01 installations".

Added to Zone Options (pages 31-36) and on page 39, address 2422, bit 0: "In UL installations, all Fire Zones must also be programmed for 'Pulsed Burg Output' and 'Fire Output Cadence' (Address 2422, bit zero)".

Page 51, Table 4: the following notation added: "Keypad Tamper must be enabled in UL installations".

Pages 31-36, added to Zone Options, "Interior (STAY) Bypass", addresses 1284, 1384, 1484, 1584, 1684, 1784, 1884, 1984, 2084, 2184, 2284, 2384.

Page 38, notation added to address 2419, bit 0: ""Do not use on systems with "K Series" keypads".

Page 39, address 2422, bit 5, "Disable Exit/Entry Urgency Tone at Keypad" changed to "Disable Entry Urgency Tone at Keypad".

Page 57, added Program Control Message information.

Refer to accompanying GEM-P3200 Installation Instructions (WI817) for installation information.

SYSTEM PROGRAMMING OPTIONS

INTRODUCTION

The GEM-P3200 control panel may be programmed by various means, each of which will be covered in detail in the sections that follow. Keypad displays shown are for a GEM-K1CA (v.8), the recommended keypad for programming. For Programming Instructions with the GEM-RP2ASe2/GEM-K2AS, GEM-RP3DGTL/GEM-K3DGTL and GEM-RP4RFC/K4RF series, see WI1184.

✓ **Downloading From a Computer.** This is the preferred method of programming. The panel may be downloaded from (or uploaded to) an IBM PC-compatible computer, either locally or remotely. Napco's PCD3000 and PCD Windows Quickloader software feature context-sensitive help screens as well as an error-checking utility that prevents programming of incompatible or conflicting data to ensure proper panel operation. **Note: Unattended downloading from a computer is not allowed for Fire Alarm or UL installations.**

✓ **Easy Menu-Driven Program (Dealer Program) Mode - Keypad Programming.** The Easy Menu-Driven Program Mode allows keypad programming of number of zones in area 1 and 2, number of fire zones (both 4-wire and 2-wire), local or Central Station reporting, number of exit/entry zones, number of interior zones, number of 24 hour zones, number of chime zones, Chime 2 zones, Exit/Entry2 zones, 50ms loop response zones (**Note: 750mS is required for Loop Response time in UL installations**), aux output activated on alarm zones, sensor watch zones, keypad sounder on alarm zones, auto bypass re-entry zones, EOLR zones, number of keypads in area 1 and 2, Central Station telephone number, Central Station account number, Central Station receiver format, User Codes, RF transmitter points, RF keyfob transmitters, zone descriptions, date/time, dealer code, Telco line fault test, Burg output chirp on keyfob, keypad time/date display, enable CP-01 programming, and clear dealer program/cold start. For new panels, a custom default program may be created at the keypad. A menu-driven utility prompts the installer to configure the system. Further detailed customization is accomplished in the Direct Address Program Mode.

✓ **Direct Address (Dealer Program) Program Mode - Keypad Programming.** The Direct Address Program Mode is an extension of the Dealer Program Mode wherein data is entered at the keypad by location. This mode is accessed from the Easy Menu Driven Program Mode by pressing the  button at any time.

✓ **User Program Mode - Keypad Programming.** The User Program Mode is intended for authorized users and is limited to keypad programming of User Codes, Time, Date and Zone Descriptions.

DOWNLOADING FROM A COMPUTER

The control-panel program may be downloaded from the computer by any of the following methods.

Local Downloading

(**Note:** This procedure should be used after installation, after peripheral devices are connected).

For direct high-speed data transfer to the control panel from a desktop computer, connect the download jack (JP2) on the panel to the LOCAL jack (J3) on the Napco PCI2000/3000 computer interface using the supplied 6-conductor cable. (Refer to PCI2000/3000 Installation Instructions WI443 for wiring diagram and procedures).

Similarly, a high-speed local download may be made in the field using a notebook or laptop computer. Connect JP2 on the control panel to a Napco PCI-MINI computer interface using the 6-conductor cable supplied. (Refer to PCI-MINI Installation Instructions WI767).

Remote Downloading

(Also see PCI2000/3000 Installation Instructions WI443).

Function Mode

Start by establishing a telco connection between the computer operator and the installer. During this procedure, voice contact will be lost, therefore both the installer and the computer operator should be familiar with the operation. When a steady high-pitched tone is heard at the site phone, access the "ACTIVATE DOWNLOAD" Function (see Keypad Programming Modes), then press the  or  button or the **NEXT/YES** button; the site phone will go dead.

Hang up the phone and wait for a call from the central station confirming a successful download.

Callback Method

An installed, unattended panel may be programmed or reprogrammed remotely using the Callback-Method Download feature of the PCD-Windows Quickloader software. Remote downloading requires a modem compatible with the PCI2000/3000. Upon answering the call from the computer, the panel will verify the Download Security Code and, if confirmed, will establish a connection. If a Callback Number is programmed into the panel, the panel will automatically disconnect and call the computer at this number before establishing a connection.

EASY MENU DRIVEN PROGRAM MODE

DEALER PROGRAM - PRELIMINARY INFORMATION

-  Only Keypad #1 may be used for both dealer and user programming, however this keypad may be located in any area.
-  The Master Security Code is *printed on the panel's microprocessor can*. Use this code to enter the Dealer Program Mode to program a custom Dealer Security Code. Record the number, then remove the code label to prevent unauthorized access to the panel. If you forget your Dealer Security Code, use the Master Security Code to enter programming.
-  After entering codes or data, press the save  button. Data will not be stored into memory unless it is pressed.
-  If the keypad is in the Program Mode and no activity is detected for longer than 4 minutes, a steady tone will sound.
-  Silence the sounder by pressing the  button to continue, or by pressing the  button to exit.
-  A panel that has been COLD STARTED (Address Location 4093) performs identically to a new panel.
-  When programming more than 2 areas, Direct Address Programming Mode must be used to complete the program.
-  If a GEM-RP2ASe2/GEM-K2AS (Version 6) is used, configure address jumpers as Keypad #1 (see WI1184).

KEYPAD #1: For ease of programming, it is recommended that a GEM-K1CA (Version 8) be used as Keypad #1. (Regardless of which keypad is selected, all *new* keypads are configured as Keypad #1 out of the box).

ACCESSING DEALER PROGRAM MODE

1. Press   Master Security Code (on microshield)

2. Press  Until "ACTIVATE PROGRAM Y/N" (GEM-RP1CAe2) appears on the keypad display.

3. Press  To Enter Dealer Program Mode.

4. Press   To Exit Dealer Program Mode when finished.

CUSTOMIZING A DEFAULT PROGRAM

For new panels, you can design a default program that will best suit your application. Using this procedure, you will configure the panel for:

- Number of Zones in Area 1
- Number of Zones in Area 2
- Fire Zones in Area 1
- 2-Wire Fire Zones in Area 1
- Local or Central Station Reporting System
- Exit/Entry Zones in Area 1
- Interior Zones in Area 1
- 24 Hour Zones in Area 1
- Chime Zones in Area 1
- Chime 2 Zones in Area 1
- Exit/Entry2 Zones in Area 1
- 50mS Loop Response Zones (Note: 750mS is required for Loop Response time in UL installations).
- Aux Output Activated on Alarm Zones
- Sensor Watch Zones
- Keypad Sounder on Alarm Zones
- Auto Bypass re-entry Zones
- Enable no EOLR Zones
- Number of Keypads in Area 1 and 2
- Central Station Receiver 1 Tel. Number
- Central Station Receiver 1 Account Number
- Central Station Receiver 1 Format
- Enter User Codes
- RF Transmitter Points
- Quick Method
- Key Fob Transmitters
- Enter Zone Descriptions
- Dealer Code
- Enable Telco Line Fault Test
- Enable Burg Output Chirp on Keyfob
- Enable CP-01
- Clear Dealer Program
- Cold Start

This procedure will automatically set up system keypads, EZMs, wireless transmitters, etc. After your basic default program has been loaded, you may alter it as necessary in the Direct Address Program Mode.

NEW PANELS: The custom default program may be created for new panels only. Once the panel has been programmed by any means, the number of areas, number of zones, fire zones, entry/exit zones and interior zones will be suppressed and cannot be changed. Should it be necessary to create a new custom default program, (a) from the Dealer Program Mode, press the  button to enter the Direct Address Program Mode; (b) access Location 4091 (Clear Program); (c) press the  button and start over.

GEM-RP1CAe2/GEM-K1CA Keypad Easy Program Menu

To create a custom program using the GEM-RP1CAe2/GEM-K1CA keypad, simply answer the following questions and record your information on the *Easy Menu Programming Worksheet*. In each of the following steps, press **MENU** to set cursor, the NEXT/YES button to go forwards, the PRIOR/NO button to go backwards, **SAVE** to save and **RESET** twice to exit at any time.

#of Zns in Area1
Enter # Zones XX

(Direct Entry)

Total Number of Zones in Area 1 (New Program Only)

- Enter the total number of zones to be programmed for Area 1.
- Valid entries are from 01 to 48. Directly enter the total number of zones, including leading zeros.
- The system is based on groups of 4 zones each (after the first 8 zones), and will automatically round up to the next group of 4. For example, if you enter 18, it will automatically convert this to 20 zones. Press **SAVE** to save. Press the NEXT/YES button to proceed.

#of Zns in Area2
Enter # Zones XX

(Direct Entry)

Total Number of Zones in Area 2 (New Program Only)

- Enter the total number of zones to be programmed for Area 2.
- Valid entries are from 01 to 48. Directly enter the total number of zones, including leading zeros.
- The system is based on groups of 4 zones each (after the first 8 zones), and will automatically round up to the next group of 4. For example, if you enter 18, it will automatically convert this to 20 zones. Press **SAVE** to save. Press the NEXT/YES button to proceed.

Fire Zones
Enter Zone # **

(Direct Entry)

Fire Zones in Area 1 (New Program Only)

- Enter the zone number of any Fire Zones (including 2-wire, 4-wire or wireless).
- Valid entries are from 01 to 48.
- Directly enter each zone number, including leading zeros, and press **SAVE** to save, and then repeat for any additional zone(s). Press the NEXT/YES button to proceed.

2-Wire Fire Zns
Enter Zone # **

(Direct Entry)

2-Wire Fire Zones in Area 1 (New Program Only)

- Enter the zone number of any Fire Zone (from previous question) to be used with 2-wire smoke detectors.
- Valid entries are 07 and 08. Directly enter each zone number, including leading zeros.
- Press **SAVE** to save, and repeat for any additional zone(s); press NEXT to proceed.

NOTE: Only zones which have been designated as Fire Zones can be programmed as 2 Wire Fire zones. JP3 must be set to "2-WF" position for 2-wire fire. (refer to Installation Instructions).

Report All Zones
To Central? Y/N

(Press YES or NO)

Local or Central Station Reporting System (New Program Only)

Press the NEXT/YES button for all zones to report; press the PRIOR/NO button for local system.

Exit/Entry Zones
Enter Zone # XX

(Direct Entry)

Exit/Entry Zones in Area 1 (New Program Only)

- Enter the zone numbers of zones to be used as Exit/Entry zones.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press **SAVE** to save and repeat for any additional zone(s); press the NEXT/YES button to proceed.

NOTE: Exit/Entry Entry time of 30 seconds will automatically be programmed.

Interior Zones
Enter Zone # XX

(Direct Entry)

Interior Zones in Area 1 (New Program Only)

- Enter the zone numbers to be used as Interior Zones.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press **SAVE** to save and then repeat for any additional zone(s).
- Press the NEXT/YES button to proceed.
- All Interior zones will also be automatically programmed as "Exit/Entry Follower" and as "Power Up Delay" zones.

24 Hour Zones
Enter Zone # **

(Direct Entry)

24 Hour Zones in Area 1 (New Program Only)

- Enter the zone numbers of zones to be used as 24 Hour zones.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press **SAVE** to save and repeat for any additional zone(s); press the NEXT/YES button to proceed.

NOTE: 24 Hour Zones will automatically be programmed as audible (Burg Output).

Chime Zones
Enter Zone # **

(Direct Entry)

Chime Zones in Area 1 (New Program Only)

- Enter the zone numbers which are to be used as Chime Zones.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press **SAVE** to save and then repeat for any additional zone(s), press the NEXT/YES button to proceed.

NOTE: A chime time of 2 seconds will be automatically programmed.

Chime 2 Zones
Enter Zone # **

(Direct Entry)

Chime 2 Zones in Area 1 (New Program Only)

- Enter the zone numbers which are to be used as Chime 2 Zones.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press  to save and then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

NOTE: A chime time of 2 seconds will be automatically programmed.
Chime 2 zones give a distinct pulsating tone when zone is faulted.

Exit/Entry2 Zones
Enter Zone # **

(Direct Entry)

Exit/Entry2 Zones in Area 1 (New Program Only)

- Enter the zone numbers of zones to be used as Exit/Entry zones.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press  to save and repeat for any additional zone(s); press the NEXT/YES button to proceed.

NOTE: An Exit/Entry 2 Entry Time of 30 seconds will automatically be programmed.

50mS Loop Zones
Enter Zone # **

(Direct Entry)

50 mS Loop Response Zones (New Program Only)

- Enter the zone numbers of zones to have a 50mS loop response.
- Valid entries are from 01 to 08. Directly enter each zone number, including leading zeros.
- Press  to save and then repeat for any additional zone(s), Press the NEXT/YES button to proceed. **Note:** Only panel zones 01-08 can be programmed for Quick Loop Response. All other zones can be programmed via their respective EZM's (hardwire). **Note: 750mS is required for Loop Response time in UL installations.**

Aux Output Zones
Enter Zone # **

(Direct Entry)

Aux Output Activated on Alarm Zones (New Program Only)

- Enter the zone numbers of zones to activate the Aux Output upon alarm.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press  to save and then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

NOTE: An Aux Output Timeout of 15 minutes will automatically be programmed.

Sensor Watch Zns
Enter Zone # **

(Direct Entry)

Sensor Watch Zones (New Program Only)

- Enter the zone numbers of zones to be Sensor Watch zones.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press  to save and then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

NOTE: A Sensor Watch Time of 24 hours will automatically be programmed.

KP Sndr Alrm Zns
Enter Zone # **

(Direct Entry)

Keypad Sounder On Alarm Zones (New Program Only)

- Enter the zone numbers of all zones to activate the Keypad Sounder upon alarm.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press  to save and then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

Auto Byp REnt Zn
Enter Zone # **

(Direct Entry)

Auto Bypass Re-entry Zones (New Program Only) **(Not evaluated by UL)**

- Enter the zone numbers of zones to be Auto Bypass Re-entry zones.
- Valid entries are from 01 to 48. Directly enter each zone number, including leading zeros.
- Press  to save and then repeat for any additional zone(s), Press the NEXT/YES button to proceed.
- Auto Bypass Re-entry Zones allow the system to be armed with the zone faulted but come back into the system (armed) when the zone is subsequently closed.

Enable No EOLR
Zones Y/N

(Press YES or NO)

Enable No EOLR Zones (New Program Only)

- Press YES to program all zones except 24 Hr & fire zones for No End Of Line Resistor. Press NO to continue.
- Do not program this feature for UL Installations.

Enable Telco
Line Test? Y/N

(Press YES or NO)

Enable Telco Line Fault Test?

- Press YES to enable Telco Line Fault Test.
- Press NO to continue. **NOTE: If enabled, a Telco Line Fault Test Delay of 60 sec. will automatically be programmed.**

Enable Burg Out
Chirp? Y/N

(Press YES or NO)

Enable Burg Output Chirp on KeyFob?

- Press the NEXT/YES button to enable Burg Output Chirp on KeyFob Arm / Disarm.
 - Press the PRIOR/NO button to continue.
- NOTE:** The Burg Output will chirp once on Keyfob Arm and twice on Keyfob Disarm.

Enable SIA CP-01?
Y/N

(Press YES or NO)

Enable SIA CP-01 Features?

- Press the NEXT/YES button to enable.
- Press the PRIOR/NO button to continue.

The SIA CP-01 Features are designed to reduce the incidence of false alarms. **NOTE:** Do not enable unless reporting, otherwise system trouble *Fail to Communicate* may occur.

Area 1 Keypads
Enter # KPs 01

(Direct Entry)

Number of Keypads in Area 1

- Enter the total number of Keypads to be installed in Area 1.
 - Valid entries are from 01 to 15. Directly enter the number of keypads, including leading zeros.
- Press  to save. Press the NEXT/YES button to proceed.

Area 1 Keypads
Enter # KPs 01

(Direct Entry)

Number of Keypads in Area 2

- Enter the total number of Keypads to be installed in Area 2.
 - Valid entries are from 01 to 15. Directly enter the number of keypads, including leading zeros.
- Press  to save. Press the NEXT/YES button to proceed.

Central Phone #

(Direct Entry)

Central Station Receiver 1 Telephone Number

- Enter telephone number of up to 16 digits.
- Press through for digits 1-9; for a zero and for a blank (*).
- Press through for letters B-F, respectively.
- Pre-Dial Delay = "D" (); Dial-Tone Detection = "E" (.
- Press  to save and press the NEXT/YES button to proceed.

NOTE: Central Station Receiver 2 and 3 Telephone Numbers must be entered in Direct Address Programming. See CS Receiver Options.

Easy Programming of Auto download ID #'s and PC Preset Callback Numbers (GEM-RP1CAe2 only)

For unattended PC Preset downloading, it is now possible to set the Auto download ID #'s and PC Preset Callback from the Keypad Easy Program Mode.

- At the field for CENTRAL PHONE #, program an "F" followed by the Auto Download ID # (2 digits) and then the Callback Telco # (up to 13 digits).
- Press  to save.
- Exit Program Mode (.
- Enter Master Code
- Press
- Go to Function "ACTIVATE DOWNLOAD Y/N" and press YES (.
- The panel will automatically call the PC Preset computer and download the program on the specified Auto Download line # of PC Preset.

CENTRAL PHONE #
F0715168429400

Example: Program an Auto download ID # of 07 and a PC Preset Callback # of 1-516-842-9400

- Go to Central Phone # input screen and press: [*] [5] [0] [7] [1] [5] [1] [6] [8] [4] [2] [9] [4] [0] [0] [ON/OFF]

**Central Station
Account # (____)**

(Direct Entry)

Central Station Receiver 1 Account Number

- Enter an account number of up to four digits.
- Press through for digits 0–9, and for a blank (*).
- Press to save and press the NEXT/YES button to proceed.

NOTE: Central Station Receiver 2 and 3 Account Numbers must be entered in Direct Address Programming. See CS Reporting Options.

**See WI for Info
Rcvr Format (0)**

(Direct Entry)

Central Station Receiver 1 Format

- From the table at the right enter the receiver format.
- Press through , and for blank (*).
- Press through for letters B–E.
- Press to save and press the NEXT/YES button to proceed.

DATA ENTRY	CS RECEIVER 1 FORMAT
blank(*)	Ademco Slow, Silent Knight Slow
1	Sescoa, Vertex, DCI, Franklin Fast
2	Radionics Fast
3	Silent Knight Fast
4	Radionics, DCI, Franklin Slow
5	Universal High Speed
8	Radionics BFSK

DATA ENTRY	CS RECEIVER 1 FORMAT
9	FBI 4/3/1
0	Radionics Modem 2
B	SIA
C	Ademco Point ID
D	Ademco Express
E	Pager

NOTE: Modem IIe is available only in Direct Address Programming. Central Station Receiver 2 and 3 Formats can only be entered in Direct Address Programming. See CS Receiver Options.

Enter user code			
U01 123 - 9-			
User#	User Code	Area 1	OPT

Enter User Codes (Press the **MENU** button to set cursor.)

Enter up to 48 User Codes with User Options, Authority Level and Access Control Options (if necessary) for each code. Refer to the tables below and on the next page for available data entries for User Options, Authority Level and Access Control Options. **Note:** All 48 Users must be assigned to areas in "Enable User Code by Area" (Address 2500-2595) in Direct Address Programming. By default, only User 1 is enabled in Area 1 and Area 2. User 2 - 8 are enabled in Area 1 and user 9 - 16 are enabled in Area 2.

- Press the **MENU** button to set the cursor to the User Code. Use the number buttons **1** through **9P** to enter a **code from 3 to 6 digits**. Enter up to 6 digits in the first six boxes from left to right for each user code. Valid entries are: 0-9. **Note:** Press the **0** button for a zero. No blank spaces in between; leave blank (*) any trailing boxes. If an "Ambush Code" (Address 0495) is entered, *do not* program the first two digits of ANY User Code as the same digits entered for the "Ambush Code".
- If the programmed code is less than 6 digits, press the **MENU** button to set the cursor to the OPTION/LEVEL.
- Refer to the tables below for the available User Option and User Level data entries. Enter the user options data in the left digit. Enter the level data (with arming options, if any, added) in the right digit. **Note:** For entries greater than 9, press the *** 1** buttons through the *** 5** buttons for B through F, respectively.
- For Keypad Access Control, press the **MENU** button once again to program applicable keypads. Refer to the tables below, use the number buttons to enter the data for Keypad 1-4 in the right digit; and the data for Keypad 5-7 data in the left digit. (Press the **0** buttons for blank).

Example: Enter a code of "123456" as "123456" (from left to right).

NOTES:

- * Minimum Level required to access function
- ** Level-3 Code with appropriate user option
- *** Requires Dealer Code

USER OPTIONS	
OPTIONS	EXPLANATION
Disabled	User Code not active in this area.
Blocked View	Allows User Code to block another code from being viewed by another user. An unblocked code cannot view a blocked code, but a blocked code can view all codes. The master user code and the dealer program code can view all codes.
User Program	User Program Option is enabled for Keypad 1 only, wherever it is connected (any area). If enabled, Level 3 must also be enabled.
Bypass	Allows User Code to bypass zones.
Overview	This option, along with Level 3 Authorization, enables selection of OVERVIEW mode at a keypad. This Mode provides a system status display of all areas at a glance.
Arm Only	Prevents User Code from disarming this area.
Service	A Service Code has restricted arm/disarm rights; if an area is armed with a Service Code, a "SERVICE ON" appears on the GEM-RP2ASe2 keypad (a "S" on the GEM-RP1CAe2 keypad) and the area can be disarmed with any valid User Code, including a Service Code. If the area is armed with OTHER than a Service Code, it CANNOT be disarmed with a Service Code. This is typically used to allow tradesmen access to premises under control of the owner.
Ambush	Allows User Code to send Ambush signal to Central Station.
Access	This is normally used to activate a door striker while an area is disarmed. A code with the access option will not function as an arm/disarm code. When the code is entered, the keypad will display "ENTER NOW" and the Brown Wire on the keypad will become Active Low (Ground Potential) for 7 seconds.

Related User Options: "Ambush Code" (Address 0495), "Panel Access Code" (Address 0490), "Dealer Security Code" (Address 0500) & "Enable User Code by Area" (Address 2500-2595).

Press  to save each code.

To proceed to the next User Code, set the cursor to the User Number and change it using the number buttons. Program a new User Code as previously described. Press NEXT  button to proceed.

Example: Program a code of "2222" for user 02, with User Option of "User Program", User "Level 3" and Access Control Option "Keypad No. 1". Enter "2222" for a user code, "2 3" for user option and "blank(*) 1" for access control option.

CHANGING OR CANCELING A CODE: To change any code, merely program over the existing code as described above and press  to save. Similarly, to cancel a code, blank out each number of the code and press  to save to save.

ZN#	XMIT#+CS	P
Zn01-	000000:	0-0

Zone # Mapped to	Xmitter ID	Check Sum	Point #
---------------------	---------------	--------------	------------

RF Transmitter Points (Press **MENU** to set cursor.)

For each transmitter enter: (For wireless systems only. Also see Quick Method, which follows)

- The **zone number** (01–48) to which the transmitter will be mapped.
- The **6-digit RF ID #** and **1-digit checksum number** printed on the transmitter and box,
- The **point number** (1–2); enter "9" for unsupervised (all points).
- Press **ENTER** to save and **NEXT/YES** button to proceed when all transmitters have been entered.

NOTE: When programming the ID Code number, "0" through "9" = through ; A = ; B = ; C = ; D = ; E = and "F" = .

ZN#	XMIT#+CS	P
Zn01-	000000:	0-0

ZN#	XMIT#+CS	P
ZN01-	ENROLL:A--	

Quick Method. If a receiver is already installed in the panel, transmitter wireless points can be programmed automatically ("enrolled") using the following procedure. **NOTE:** The transmitter point will be enrolled only if the signal strength is 3 or greater.

1. Enter the zone number to which the transmitter point will be mapped.
2. Press **BYPASS** to enter the Enroll Mode. The red and green LEDs on the keypad will flash and the window will display as shown at left.
3. Open the loop of the point that is to be programmed (GEM-TRANS2 only).
4. Install the transmitter battery. The keypad will beep to indicate that the point has been successfully enrolled. Multi-point transmitters can be mapped to successive zones simultaneously.

<p><i>Example. A 2-point transmitter has the RF ID number 287613:1. Map point 1 to Zone 6 and point 2 to Zone 9.</i></p> <ol style="list-style-type: none"> 1. Enter the Enroll mode as described above. 2. Enter Zone "06". 3. Open point-1 loop. 4. Install the battery. The keypad will beep once to indicate that one point has been programmed. (Transmitter 287613:1, point 1 will be mapped 	<ol style="list-style-type: none"> 5. Enter Zone "09". 6. Close point-1 loop and open point-2 loop. 7. Remove the transmitter battery, then re-install it. The keypad will beep once to indicate that one point has been programmed. (Transmitter 287613:1, point 2 is mapped to Zone 9).
--	--

KEY FOB ZONE ASSIGNMENT: Key fobs can also be assigned to zones to allow multiple wireless panic buttons on one alarm system, each reporting to a central station, a pager or having a description on the keypad that describes the person holding the key fob, the location where the person holding the key fob is stationed, or the special purpose of the key fob button being depressed. See the next page on Key Fob Transmitters as Zone Input Devices .

KF	A	XMIT#+CS	OP
01-	0	000000:	0 00

KF #	Area	Xmitter ID	Check Sum	Aux 1&2
------	------	------------	-----------	---------

Key Fob Transmitters as Arm/Disarm & Control Devices (Press **MENU** to set cursor).

Key fobs can be programmed as "Arm/Disarm" devices using their On/Off buttons (refer to WI752). For each Key Fob Transmitter, enter:

- The **Key Fob Transmitter number** (01–08).
- The **area number** to which transmitter is assigned (0 to disable keyfob, 1 or 2).
- The **6-digit RF ID #** and **1-digit checksum number** printed on the transmitter and box,
- The **Aux 1 Option** (see key fob aux 1 & aux 2 options).
- The **Aux 2 Option** (see key fob aux 1 & aux 2 options).
- Press **ENTER** to save and **NEXT/YES** button to proceed when all key fobs have been entered.

NOTE: When programming the ID Code number, "0" through "9" = through ; A = ; B = ; C = ; D = ; E = and "F" = .

Key Fob Transmitters as Zone Input Devices

(Refer to display above: press the PRIOR button to go backwards).

Each of the 4 key fob buttons can be assigned to a zone. For example, On button = point 1; Off button = point 2; A1 = point 3; A2 = point 4. Up to 48 key fobs (using 1 button) or 24 key fobs (using 2 buttons) or 14 key fobs (using all 4 buttons) or any combination up to a maximum of 48 controlled zones can be assigned, providing multiple wireless panic buttons on a system, each reporting to the Central Station or a pager and/or annunciating on a keypad the key fob zone number with description/location. To assign a key fob to a zone: program the key fob as you would a transmitter, entering the key fob's ID code, check sum and point number at the appropriate zone. The "Quick Method" is not allowed. The zone may be hardwired to a sensor as well as assigned to a key fob (either one will activate the zone alarm output). **NOTE:** If assigning a key fob to a zone, the "ON/OFF" buttons on the key fob will no longer arm/disarm the system. The key fob is converted to a "panic only" device.

(Direct Entry)

Enter Zone Descriptions

- Press  and  to place the cursor and; press  and  to select the character.
- For each zone, enter a description of up to two lines.
- Press  to save each description.

- To proceed to the next description, place the cursor under the Zone Number (e.g. "01") and change the Zone Number using  and .
- **NOTE:** Zone Descriptions can only be entered through the GEM-RP1CAe2/GEM-K1CA Keypad or by using the Napco Quickloader Software. See Easy Menu Programming Worksheet for available zone description characters.

(Direct Entry)

Enter Date (Press  to set cursor).

- Enter the current date in the format MM/DD/YY. (MM = month, DD = day and YY = year.
- Press  to save. Press the NEXT/YES button to proceed.

(Direct Entry)

Enter Time (Press  to set cursor.)

- Enter the current time in format HH:MM/A/P, where HH=hours (01–12); MM=minutes (00–59).
- Select AM or PM by pressing any number button.
- Press  to save. Press the NEXT/YES button to proceed.

Dealer Code

- Directly enter the Dealer Code (default = 456789), using  through  buttons.
- Press  to save.

- Re-enter the Dealer Code to verify the previous code.
- Press  to save.
- Press the NEXT/YES button to proceed.

EXIT DEALER PROGRAM MODE: This completes the custom default program. Press  to enter the Direct Address Program Mode for further programming or press  once again to end all programming and resume normal keypad operation.

CLEAR PROGRAM: Should it be necessary to create a new custom default program, (a) from the Dealer Program Mode, press  to enter the Address Program Mode; (b) access Location 4091 (Clear Program) or 4093 (Cold Start); (c) press  and then (d) press  to exit the Dealer Program Mode. A "SYSTEM TROUBLE/E09-00 SERVICE" will occur. Press  to silence the keypad.

Clear Dealer Program (Erases Dealer Program)

Use this feature to erase the Panel Program, while maintaining Scheduled Data and Zone Descriptions. Access address 4091 and press . Data entry is not allowed. **NOTE:** Enter Easy Menu Driven Program Mode to reprogram system.

Cold Start (Erases Entire Program)

This erases all programmed data (Dealer Program, Zone Description Data and Schedules). Access address 4093 and press . Data entry is not allowed. **NOTE:** Some features (schedules) can only be programmed again with the Downloading Software.

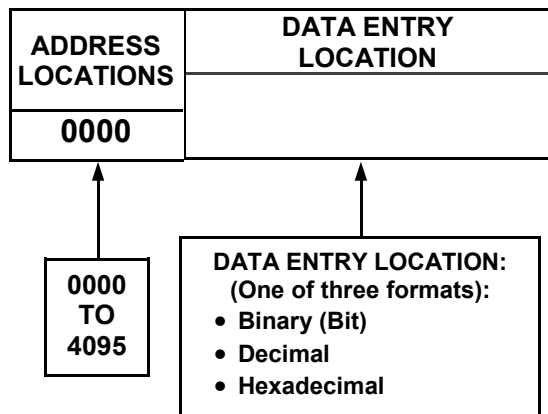

THIS PAGE INTENTIONALLY LEFT BLANK

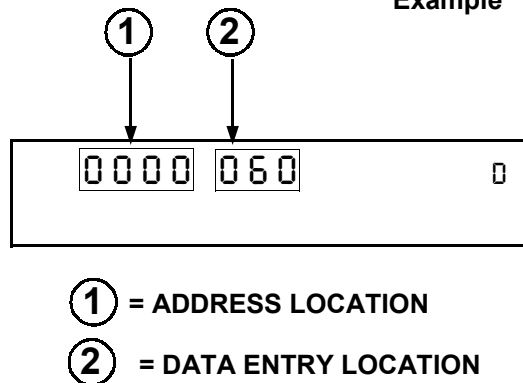

DIRECT ADDRESS PROGRAM MODE

DIRECT ADDRESS OVERVIEW

Direct Address Programming allows you to go directly to the address locations (up to 4095) and change the data entries manually in order to customize your control panel options. Whereas the Easy Menu Program Mode guides you through limited selections to get you started, **Direct Address Program Mode** allows you to change all options directly. It consists of up to 4095 address locations each with data entry locations as shown in the following diagram (below left). The data entry location accepts data in one of three formats: Binary, Decimal and Hexadecimal (explained below in "Address Mode Displays"). The following diagram (below right) illustrates a *Decimal* format data entry location (using a GEM-RP1CAe2/GEM-K1CA keypad).

GEM-RP1CAe2/GEM-K1CA Keypad Display Example

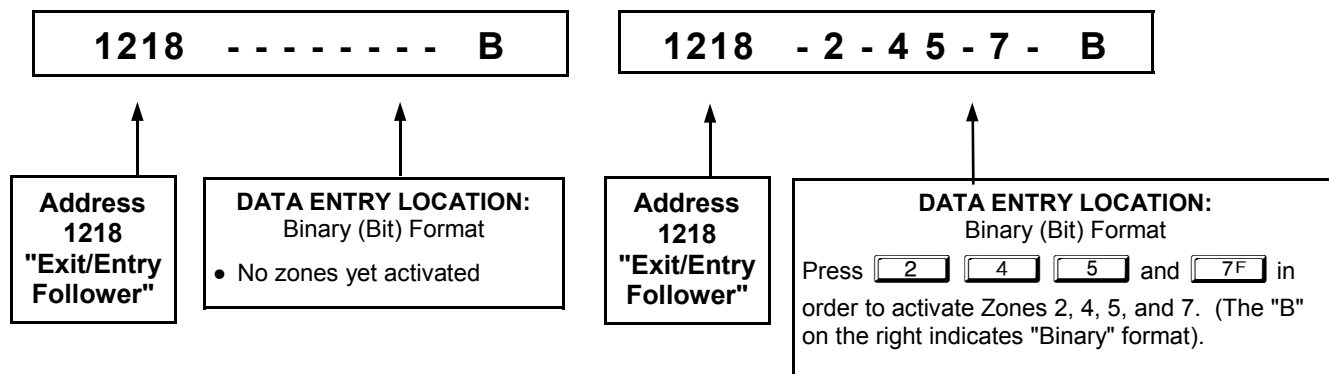

ADDRESS MODE DISPLAYS

There are three types of address displays when programming in Direct Entry Program Mode, as follows:

A) Binary (Bit) Format

Settings (such as Zone Features) display and accept data in "number" format. For example, Zone Features are turned on by the pressing of keypad buttons 1 through 8, with the activated Zone(s) displaying the corresponding decimal digit (replacing deactivated zones which are signified by dashes).

EXAMPLE: BIT Format with the GEM-RP1CAe2/GEM-K1CA: Program Zones 2, 4, 5 and 7 as *Exit/Entry Follower Zones*.

DETERMINE THE DATA ENTRIES

Referring to ZONE FEATURES in the Programming Worksheets that follow, the Exit/Entry Follower for Zones 1 through 8 are located at address 1218.

ZONE FEATURES	ADDR	ZONES 1 → 8								ADDR	ZONES 9 → 16							
		Z1	Z2	Z3	Z4	Z5	Z6	Z7	Z8		Z9	Z10	Z11	Z12	Z13	Z14	Z15	Z16
		1	2	3	4	5	6	7	8		1	2	3	4	5	6	7	8
Exit/Entry Follower	1218						6	7	8	1318								

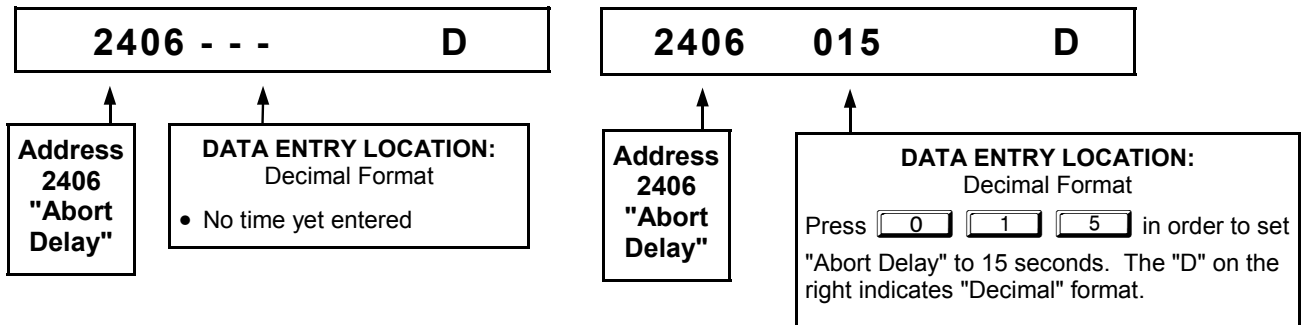

PROGRAM THE DATA ENTRIES

1. Enter the panel's Dealer Security Code, then press **[MENU]**.
2. Answer NO to all questions until "ACTIVATE PROGRAM Y/N" is displayed; then press YES. **NOTE:** If you pass "ACTIVATE PROGRAM", scroll backward using **[BYPASS]**.
3. Press **[RESET]** to enter the Address Program Mode. Address "0000" will display.
4. Press **[1] [2] [1] [8A]** to access Address 1218. *The existing data will display and the cursor will advance to the data field.*
5. Press **[6] [7F] [8A]**. The numbers 6,7 and 8 will appear on the keypad display indicating the zones activated.
6. Press **[ENTER]** to save. Address 1218 is now programmed with "6,7,8".
7. Enter another 4-digit address to continue programming or press **[RESET]** to exit and resume normal keypad operation.

B) Decimal Format

Settings (such as Entry and Exit Delay) display and accept data in decimal format, as a 3 digit number. Data is entered directly, by pressing keys 0 – 9, with the cursor automatically moving to the right upon each key press.

EXAMPLE: DECIMAL Format with the GEM-RP1CAe2/GEM-K1CA: Program *Abort Delay* to be 15 seconds.

DETERMINE THE DATA ENTRIES

Referring to SYSTEM DELAYS & TIMEOUTS in the Programming Worksheets that follow, the Abort Delay is located at address 2406:

ABORT DELAY (sec.)	ADDRESS 2406		

[Default = 000]

PROGRAM THE DATA ENTRIES

1. Enter the panel's Dealer Security Code, then press **[MENU]**.
2. Answer NO to all questions until "ACTIVATE PROGRAM Y/N" is displayed; then press YES. **NOTE:** If you pass "ACTIVATE PROGRAM", scroll backward using **[BYPASS]**.
3. Press **[RESET]** to enter the Address Program Mode. Address "0000" will display.
4. Press **[2] [4] [0] [6]** to access Address 2406. *The existing data will display and the cursor will*

advance to the data field.

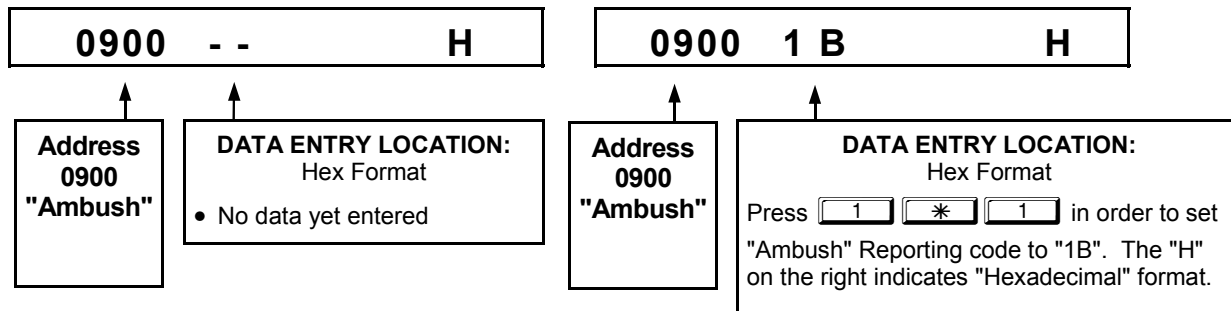

5. Press . The numbers 015 will appear on the keypad display indicating the number of seconds entered.
6. Press to save. Address 2406 is now programmed with a 15-second Abort Delay.
7. Enter another 4-digit address to continue programming or press to exit and resume normal keypad operation.

C) Hexadecimal Format

Data such as Report Codes displays, accepts data by means of a Hexadecimal display. Data is entered directly, by pressing keys 1 – 9, for zero, and through for hex B through F (11-15), with the cursor automatically moving to the right upon key press. See table below.

HEXADECIMAL ENTRIES					
ENTRY TOTAL	PRESS 	KEYPAD DISPLAYS	ENTRY TOTAL	PRESS 	KEYPAD DISPLAYS
blank	<input type="text" value="0"/>	•	8	<input type="text" value="8"/> <input type="text" value="A"/>	8
1	<input type="text" value="1"/>	1	9	<input type="text" value="9"/> <input type="text" value="P"/>	9
2	<input type="text" value="2"/>	2	10	<input type="text" value="*"/> <input type="text" value="0"/>	0
3	<input type="text" value="3"/>	3	11	<input type="text" value="*"/> <input type="text" value="1"/>	B
4	<input type="text" value="4"/>	4	12	<input type="text" value="*"/> <input type="text" value="2"/>	C
5	<input type="text" value="5"/>	5	13	<input type="text" value="*"/> <input type="text" value="3"/>	D
6	<input type="text" value="6"/>	6	14	<input type="text" value="*"/> <input type="text" value="4"/>	E
7	<input type="text" value="7"/> <input type="text" value="F"/>	7	15	<input type="text" value="*"/> <input type="text" value="5"/>	F

EXAMPLE: HEXADECIMAL Format with the GEM-RP1CAe2/GEM-K1CA: Program an Ambush CS Reporting Code to be "1B".

DETERMINE THE DATA ENTRIES

Referring to CS REPORTING CODES in the Programming Worksheets that follow, Ambush is located at address 0900. In the "Keypad Reporting Codes" table, the data entries needed to assign a code of "1B" are " " and " ".

KEYPAD REPORTING CODES	ADDRESS 0900-0904		
	LEFT	ADDR	RIGHT
Ambush	1	0900	B
Panic		0901	
Fire		0902	
Auxiliary		0903	
Tamper		0904	

PROGRAM THE DATA ENTRIES

1. Enter the panel's Dealer Security Code, then press **MENU**.
2. Answer NO to all questions until "ACTIVATE PROGRAM Y/N" is displayed; then press YES. **NOTE:** If you pass "ACTIVATE PROGRAM", scroll backward using **BYPASS**.
3. Press **RESET** to enter the Address Program Mode. Address "0000" will display.
4. Press **0** **9P** **0** **0** to access Address 0900. *The existing data will display and the cursor will advance to the data field.*
5. Since you wish the reporting code to be "1B", press **1** to enter a "1" in the display, and press ***** **1** to enter a "B" in the display. **NOTE:** The right address is reported first, therefore, in the address table, the right digit is the 1st digit of the reporting code ("1" in this example).
6. Press **SAVE** to save. Address 0900 is now programmed with an Ambush reporting code of "1B".
7. Enter another 4-digit address to continue programming or press **RESET** to exit and resume normal keypad operation.

PROGRAMMING CONVENTIONS USED IN THIS MANUAL

The Keypad Programming Worksheets in the back are provided as an address-programming reference to help the installer modify his custom default program or to make minor field alterations to an existing panel program. It is recommended that the panel be uploaded to NAPCO's PCD-Windows software following any keypad programming and that the PCD-Windows's error-check feature be utilized to reduce the possibility of programming omissions or conflicts.

Keep the Keypad Programming Worksheets on file for future reference.

General Programming Steps

1. Contact the central station to ascertain receiver format, data format, event codes, subscriber numbers and telephone number(s).
2. Select the desired features by circling the respective "address" boxes. Refer to the Programming Options and Worksheets for guidance in selecting the "data" to be entered into those boxes.
3. Program the data entered in the boxes on the worksheets into the respective addresses. The display will show the entry numerically, but if hexadecimal format will display "0" for the number 10, and letters "B", "C", "D", "E", and "F" for the numbers 11 through 15, respectively. To program a 10, press ***** **0**. To program 11 through 15, press ***** **1** through ***** **5**, respectively.

The displays will appear after a brief delay.

- Use **MENU** to toggle the cursor between the 4-digit address field and the data entry locations.
- Enter the address directly using the number buttons.
- The contents of the address will be read automatically, along with the feature name and programming information. The cursor will advance to the data field. Enter the required data directly using the number buttons.
- IMPORTANT:** Press **SAVE** or **OFF** to save the contents of each address.

EXIT DIRECT ADDRESS PROGRAM MODE: When done, press **RESET** to exit and resume normal keypad operation.

SYSTEM DELAYS & TIMEOUTS (ADDRESS 0000-0002, 2402, 2406, 2414 & 3902)

EXIT DELAY (sec.)	ADDRESS 0000			
[Default = 060]				

ENTRY DELAY 1 (sec.)	ADDRESS 0001			
[Default = 030]				

ENTRY DELAY 2 (sec.)	ADDRESS 0002			
[Default = 030]				

Aux. Output Access Control Timeout (sec.)	ADDRESS 2402			
[Default = 000]				

ABORT DELAY (sec.)	ADDRESS 2406			
[Default = 000]				

Telephone Line Test Delay (sec.)	ADDRESS 2414			
[Default = 015]				

CS Telco 3 Report Delay (sec.)	ADDRESS 3902			
[Default = 000]				

 Select delay/timeout (0-255 seconds).

EXIT/ENTRY DELAYS: Apply only to zones programmed with the following options "Exit/Entry 1, Exit/Entry 2, Exit/Entry Follower". For UL Installations, the maximum exit delay is 60 seconds and the maximum entry delay is 45 seconds. **NOTE:** Sensor Watch Time Options are similar to above table, except in hours.

 Press  or  to save.

WARNING: Timers have uncertainty of +/-1 sec, so a "time" of 1 second may actually timeout IMMEDIATELY.

SYSTEM DELAYS & TIMEOUTS (ADDRESS 2407, 2408 & 4088)

CHIME TIMEOUT (¼sec.)	ADDRESS 2407			
[Default = 008 x ¼ sec. = 2 sec.]				

AC Fail Report Delay (min.)	ADDRESS 2408			
[Default = 010]				

Sensor Watch Delay (Hr.)	ADDRESS 4088			
[Default = 060]				

-  1. Enter delay/timeout in corresponding address locations above.
Note: All entries for address 0716 are in quarter seconds (.25 seconds).
 Therefore, the default of 008 results in a 2 second timeout.

 2. Press  or  to save.

SYSTEM DELAYS & TIMEOUTS (ADDRESS 2400, 2401, 2403-2405, 4082 & 4083)

Reset Output Timeout (min.)	ADDRESS 2400		

[Default = 000]

Aux. Output Timeout (min.)	ADDRESS 2401		

[Default = 000]

Burg. Alarm Output Timeout (min.)	ADDRESS 2403		

[Default = 016]

Pulse Alarm Output Timeout (min.)	ADDRESS 2404		

[Default = 001]

Fire Output Timeout (min.)	ADDRESS 2405		

[Default = 000]

1. Select delay/timeout (0-255 min.).
2. Enter in corresponding address locations above and right.
3. Press  or  to save.

Report Cancel Window (min or sec.)	ADDRESS 4082		

[Default = 000]

V.20 or less = sec.
V.30 or greater = min.

Program for at least 5 minutes in a CP-01 installation.*

Auto Disarm Rearm Delay (min.)	ADDRESS 4083		

[Default = 000]

OUTPUT TIMEOUTS: If a timeout of "0 min." is selected, then the output will remain active (ON) until the system is reset or disarmed. For UL Residential Installations, the minimum timeout is 4 minutes. For UL Commercial Installations, the minimum timeout is 15 minutes.

*Address 4082: When "Enable CP-01 Features" is selected in the Easy Program menu, this time is set to 7 minutes.

KEYPAD SYSTEM CODES (ADDRESS 0490-0495 & 0500-0502)

Panel Access Code	ADDRESS 0490-0492					
	0490		0491		0492	
	L	R	L	R	L	R

[Default = blank (*) blank (*) from address 0490-0492]

PANEL ACCESS CODE: Enter up to 6 digits to activate a door strike while the area is disarmed.

1. Enter in both left and right digits of address locations.
2. Valid entries are: 0-9.

Note: Also, "Access Control on Aux. Output" (Address 2418) and "Aux. Output Access Control Timeout" (Address 2402) must both be enabled.

Ambush Code	ADDRESS 0495	
	LEFT	RIGHT

[Default = 99]

AMBUSH CODE: Enter a 2-digit code used just prior to disarming and will activate an Ambush Condition, causing a SILENT report to be sent to the central station.

1. Enter in both left and right digits of address locations.
2. Valid entries are: 0-9.

Note: Also, "Enable Keypad Ambush" (Address 2440-2446), "Report on Ambush Alarm" (Address 1125, 1127, 1135 & 1137) and "Ambush Code" (Address 0900) must all be enabled.

Dealer Security Code	ADDRESS 0500-0502					
	0500		0501		0502	
	L	R	L	R	L	R

[Default = blank (*) blank (*) from address 0500-0502]

DEALER SECURITY CODE: Enter up to 6 digits to be used by the dealer to enter programming.

1. Enter in both left and right digits of address locations.
2. Valid entries are: 0-9.

Note: If left blank, the Master Security Code must then be used to enter programming.

CS RECEIVER FORMAT OPTIONS (ADDRESS 0520, 0521, 0525, 0526, 0550, 0551, 0575 & 0576)

CS Receiver 1 Format	ADDRESS 0525		
-----------------------------	---------------------	--	--

CS Receiver 2 Format	ADDRESS 0550		
-----------------------------	---------------------	--	--

CS Receiver 3 Format	ADDRESS 0575		
-----------------------------	---------------------	--	--

Default for CS Receiver 1 Format depends on Easy Menu Question "RCVR FORMAT". [Default = •(blank) •(blank)] for CS Receivers 2 and 3 Formats.

DATA ENTRIES		CS RECEIVER FORMATS
LEFT	RIGHT	
blank (*)	blank (*)	Ademco Slow, Silent Knight Slow
blank (*)	1	Sescoa, Vertex, DCI, Franklin Fast
blank (*)	2	Radionics Fast
blank (*)	3	Silent Knight Fast
blank (*)	4	Radionics, DCI, Franklin Slow
blank (*)	5	Universal High Speed
blank (*)	8	Radionics BFSK
blank (*)	9	FBI 4/3/1
blank (*)	0	Radionics Modem 2
blank (*)	B	SIA
blank (*)	C	Ademco Point ID
blank (*)	D	Ademco Express
blank (*)	E	Pager
1	blank (*)	Radionics Modem IIe

CS RECEIVER FORMATS: Up to 3 CS Formats may be programmed.

1. Select the desired CS Receiver Format from the table shown.
2. Enter in the corresponding digit address locations for each CS Receiver.

NOTE: Dark shaded data value box shows option not available.

Leading Digits for Pager Format (1st Digit)	ADDRESS 0520		
--	---------------------	--	--

[Default = blank (*) blank (*)]

Leading Digits for Pager Format (2nd Digit)	ADDRESS 0521		
--	---------------------	--	--

[Default = blank (*) blank (*)]

LEADING DIGITS FOR PAGER FORMAT: In Pager Format reporting, the message typically begins with "00". However, for some pager services, this will cause the Pager's Voice Mail feature to activate. This option allows you to program these digits to any number desired. Typical Pager report is "003 022 1234", where 3 is the Event, 22 is the zone, and 1234 is the Subscriber ID number. For example, if the Leading Digits are programmed as "98", the Pager report will now appear as "983 022 1234".

1. Enter in 1st and 2nd Leading Digits in right digit only (left digit is not used) as shown.
2. Valid entries are: 0-9. Press  or  to save

0526	CS Receiver 1 Options

CS ZONE REPORTING CODES

Default for Group Zone Report Codes depends on Easy Menu Question "RCVR. FORMAT".

ZONE REPORT CODE OPTIONS	
DATA ENTRIES	

NOTE: Zones 1-8 are included in the control panel and **Zones 9-32 are EZM Zones**. Zones 33-48 are wireless. See Address 2600-2605 to enable "EZM Zone Groups".

DATA ENTRIES	MODEM CODE
1	Fire *
2	Panic
3	Burglary
4	Hold up
7	Gas Alarm
8	Heat Alarm
0	Auxiliary Alarm
B	24 Hour Auxiliary

PULSE EVENT CODE will be the first digit of the 2 digit reporting code. The second digit will be the second digit of the reporting zone. For example, for zone 9 (address 0918), if the right digit is "3", then the reporting code is "39". With another example, for zone 15 (address 0924), if the right digit is "4", then the reporting code is "45".

MODEM CODES determine the zone types reported for the following formats: SIA and ADEMCO Point ID.

1. Select the desired Modem Code for each zone from the table shown.

2. Press or to save.

THIS PAGE INTENTIONALLY LEFT BLANK

ZONE OPTIONS / ZONES 1-48 (ADDRESS 1200-1786)

ZONE OPTIONS: Select zone options for any zone.

1. Select the desired zone option by entering the option number (1-8) for each selected zone.
2. Enter corresponding option number in address location, in Binary (Bit) Format.

NOTE: Dark shaded data value box shows option not available. Press  or  to save

NOTE: See Direct Address Programming Example on [page 15](#).

NOTES: (A) 50ms & 20 ms Loop Response only available for zones 1-8.

(B) 2-wire Smoke Detectors only available for zones 1-8. Refer to Installation Instructions (WI817) for more details.

(C) If Fire Alarm Verification is selected, then Fire must also be selected.

DEFAULTS: The zone options indicated are automatically set after exiting the Easy Menu Driven Mode.

- ✓ *Priority, Selective Bypass, Alarm Output, Auto Reset, Swinger Shutdown, Zone Area 1 and Zone Area 2* are enabled for the total number of zones entered in "AREA 1 # ZONES = 08" and "AREA 2 # ZONES = 00".
- ✓ *Alarm Telco 1* is enabled for the zones if [YES] is entered for "REPORT ALL ZONES TO CENTRAL ZONES? Y/N".
- ✓ *Entry/Exit 1 and Chime* are enabled for zone numbers entered in "EXIT / ENTRY ZONES".
- ✓ *Exit/Entry Follower and Interior Bypass* are enabled for zone numbers entered in "INTERIOR ZONES".
- ✓ *Fire, Pulse Alarm Output and Fire Verification* is enabled for the zone numbers entered in "FIRE ZONES".
- ✓ 2-Wire Smoke Detector is enabled for zone numbers entered in "2 WIRE FIRE ZONES".

Note: See "Number of Zones & Keypads per Area" in Easy Menu Driven program Mode.

[Default = blank (•) blank (•) from address 2500-2595]

USER AREA OPTIONS:

1. Each address corresponds to a specific User, numbered 1-48. For each User, select the desired Area by marking the desired Area number (1-2) in the above table.
2. Enter the corresponding Area number in each the address location, in Binary (Bit) Format.
3. Press  or  to save.

NOTE: See Direct Address Programming Example on [page 15](#).

USER AREA OPTIONS

EZM GROUP OPTIONS (ADDRESS 2600-2605)

EZM Group 1	EZM Group 2	EZM Group 3	EZM Group 4	EZM Group 5	EZM Group 6
ZONES 9-12	ZONES 13-16	ZONES 17-20	ZONES 21-24	ZONES 25-28	ZONES 29-32
ADDRESS 2600	ADDRESS 2601	ADDRESS 2602	ADDRESS 2603	ADDRESS 2604	ADDRESS 2605

Default depends on Easy Menu Question
 “# OF ZNS IN AREA1
 and “# OF ZNS IN AREA2

For example, If 32 zones are used, then all 6 groups will be automatically enabled. If only 8 zones are used, then groups 1-6 will be automatically disabled.

NOTE: Zones 1-8 are included in the control panel and Zones 9-32 (Groups 1-6) are EZM Zones (either Wireless or Hardwired). Zones 33-48 are wireless only.

EZM TYPE	
DATA ENTRIES RIGHT	OPTION
blank (*)	Not used (No EZM present)
1	4-Zone EZM

EZM GROUP OPTIONS: Up to 6 Groups of 4 Zones each may be programmed depending on the number of zones used and which EZM modules are connected. Each group represents 4 zones.

1. Select EZM type from the table shown.
2. Enter either blank (*) or "1" in corresponding address locations above.
3. Press  or  to save

GROUP NUMBER	ADDRESS	EZM PGM TERMINAL CONTROL	
		A1	A2
1	2622	1	2
2	2623		
3	2624		
4	2625		
5	2626		
6	2627		

[Default = blank (*) blank (*) from address 2622-2632]

EZM PGM ARMED TERMINAL CONTROL: For each zone group select the area(s) which, when armed, will activate the PGM Lug on the corresponding EZM modules. Each zone group corresponds to 4 zones. If 8-Zone EZMs are used each one is treated as TWO zone groups. **NOTE:** Lug goes ACTIVE (low) when ANY selected area is armed. When activated, the PGM Lug goes negative (to Ground).

1. Select the desired group number.
2. Enter the corresponding Area number in each the address location, in Binary (Bit) Format. **NOTE:** See Direct Address Programming Example on [page 15](#).
3. Press  or  to save.

EZM GROUP OPTIONS

AREA ARMING OPTIONS (ADDRESS 2650-2651)

ARMING AREA	ADDRESS	PRIORITY AREA ARMING	
		A1	A2
		1	2650
2	2651	1	2

[Default = blank (*) blank (*) from address 2650-2657]

PRIORITY AREA ARMING:

1. Select the desired arming area.
2. Enter the corresponding Area number in each the address location, in Binary (Bit) Format. **NOTE:** See Direct Address Programming Example on [page 15](#).
3. Press  or  to save.

NOTE: Dark shaded data value box shows option not available.

REMOTE ACCESS LOGGING (ADDRESS 3184)

3184 System Options		
Default		Option
OFF	1	Enable Keypad 1
OFF	2	Enable Keypad 2
OFF	3	Enable Keypad 3
OFF	4	Enable Keypad 4
OFF	5	Enable Keypad 5
OFF	6	Enable Keypad 6
OFF	7	Enable Keypad 7

REMOTE ACCESS LOGGING: Enable logging of every keypad access event.

1. Select the desired option entering the option number (1-7) for each digit.
2. Enter corresponding option number in address location.
3. Press  or  to save.

AREA OUTPUT CONTROL OPTIONS (ADDRESS 2700-2733)

OUTPUT SILENCED (TURNED OFF)	ADDR	DISARMING AREA 1 TURNS OFF AREA OUTPUT	
		A1	A2
		1	2
Burglary Output	2700	D	
Pulsed Burg. Output	2708	D	
Fire Output	2716		
Reset Relay	2724		
Auxiliary Relay	2732		

OUTPUT SILENCED (TURNED OFF)	ADDR	DISARMING AREA 2 TURNS OFF AREA OUTPUT	
		A1	A2
		1	2
Burglary Output	2701		
Pulsed Burg. Output	2709		
Fire Output	2717		
Reset Relay	2725		
Auxiliary Relay	2733		

[Default = Noted above with "D" = Address 2700 (1); Address 2708

AREA OUTPUT TURNS OFF UPON DISARM: Select options for any of the 5 Outputs per area when disarming a particular area.

 1. Select the desired option.

 2. Enter the corresponding Area number in each the address location, in Binary (Bit) Format. **NOTE:** See Direct Address Programming Example on [page 15](#).

 3. Press  or  to save.

RF RECEIVERS & SUPERVISORY TIMER OPTIONS (ADDRESS 3776 & 3760-3775)

Number of RF Receivers	ADDRESS 3776	
	0	0

Default for Number of Receivers depends on Easy Menu Question for RF Transmitters.

DATA ENTRIES	RF RECEIVER(S)
0	None
1	1
2	2
3	3
4	4

RF RECEIVERS: Up to 4 RF Receivers may be programmed. **NOTE:** This adds wireless capability to the system, increasing up to 96 the number of zones.

- Select the number of receivers (1-4).
- Enter the corresponding decimal number (1-4) into the right-most location. Press or to save.

4	4	680 min.
4	5	690 min.
4	6	700 min.
F	F	2550 min. = 42 Hr., 30 min.

RF SUPERVISORY TIMERS: RF Supervisory Timers may be programmed for each type of transmitter used. A transmitter will send a transmission every time it is tripped, when there is NO activity, the transmitter sends a status transmission about once an hour. If the receiver does NOT receive ANY signal (a trip or a status) from a transmitter in the time specified for transmitter type, a system trouble "E-04-NN" will be displayed at the keypad.

- Select timer delay from the table shown. Timers are programmed in increments of 10 minutes each. Valid entries are (*)8-FF (80 minutes-2550 min) (2550 minutes = 42 hr,30 min). **WARNING:** Timers have uncertainty of +/-30 minutes.
- Enter in corresponding address locations above (left and right digits).
- For a desired *timer not* listed do the following:

- Choose a desired timer (intervals of 10), ex: 1440 min. (24 Hours)
- Divide it by 10, ex: 1440/10 = 144
- Divide it by 16

NOTE: These timers apply only to Supervised RF Transmitters (see RF Transmitters in Easy Menu Driven Mode Programming).

EXTERNAL RELAY CONTROL

EXTERNAL RELAY CONTROL

[Default = blank (•) blank (•) from address 3778-3801 & 2800-2895]

To program, follow the 5 steps below:
STEP 1: RELAY # OPTIONS: Each relay/entry can be assigned to any of the 96 available external relays from Relay Module RM3008. Multiple entries can drive the same External Relay.
 Select the relay number from **Table 1 (shown on next page)**; enter in corresponding left and right digit address locations.
Note: Entries 01-24 correspond to relays 1 through 24. If entries are zero, zero (00), then relay number is identical to the relay/entry address table number, in the selected address table(s) above.

STEP 2: AREA OPTIONS: Each relay/entry can be assigned to Area 1 or 2 or all areas.
 Select the area from **Table 2 (shown on next page)**; enter in corresponding left and right digit address locations.

STEP 3: TIMEOUTS: Each relay event can be assigned a timeout depending on Alarm Type option.
 If Alarm Type is selected for timeout in minutes or seconds, enter the 3-digit **timeout duration** in corresponding address location. To choose seconds or minutes, see step 5A below. 254 is maximum entry.

STEP 4: EVENT ID CODES: Each relay event can be assigned any of the available event IDs from the table.
 Select 2-digit Event ID from **Table 4 (see page 50)**; enter in corresponding address locations (left and right digit).

STEP 5: RELAY EVENT CONDITION OPTIONS: Each relay event can be assigned an alarm type; and an activation condition; also, select a timeout type for each.
 5A. Select Alarm Type and Timeout Type from **Table 5A (see page 51)**; enter in corresponding address location (left digit).
NOTE: Select Timeout from Step 3.
 5B. Select Activation from from **Table 5B (see page 51)**; enter in corresponding address location (right digit).

RELAY EVENT OPTIONS									
RELAY #		AREA		Timeout		Event ID		COND.	
L	R	L	R			L	R	L	R

RELAY EVENT OPTIONS				
RELAY #	AREA	TIMEOUT	EVENT ID	COND.
See Table 1 below	See Table 2 below	See Table 3 below	See Table 4 on page 50	See Tables 5A & 5B on page 51

1	6	22
1	7	23
1	8	24

* **Note:** [blank (*) blank (*)] option affects the relay with the same entry number. All other options affect the relay number specified. Ex: Suppose Relay/Entry 1 is mapped to External Relay 1 and Relay/Entry 2 is mapped to External Relay 24. The data entries are as follows: Address 3778 = [blank (*) blank (*)] and Address 3779 = [1C].

Areas
1-2

RIGHT DATA ENTRY	AREA 1	AREA 2
blank (*)	NONE	
1	Y	
2		Y
3	Y	Y

Note: "Y" indicates option is enabled.

TIMEOUTS: Each relay event can be assigned a timeout depending on Alarm Type option.
 If Alarm Type is selected for timeout in minutes or seconds, enter the 3-digit **time-out duration** in corresponding address location. To choose seconds or minutes, see step 5A on page 51. Maximum entry is 254.

EXTERNAL RELAY CONTROL

For a desired relay not listed:
 A. Choose a desired relay, ex: 60
 B. Divide it by 16

STEP 4: EVENT ID CODES: Each relay event can be assigned any of the available event IDs from the table.

Select 2-digit Event ID from **Table 4** (below); enter in corresponding address locations (left and right digit).

WARNING

This erases the entire program (codes, schedules, foreign language configuration, etc), leaving the panel as it came right out of the box.

4093XX

Access address 4093, then press the  button. Data entry is not allowed.

NOTE: Some features (schedules, language configuration) can only be re-programmed with the Downloading Software.

USER PROGRAM MODE

PRELIMINARY INFORMATION

The User Program Mode is covered in detail in the operating instructions for the keypad in use.

-  Only Keypad #1 may be used for programming, however this keypad may be located in any area.
-  The Program Mode cannot be accessed while the communicator is transmitting except during the first three minutes after power-up.
-  After entering codes or data, press the save  button. *Data will not be stored into memory unless this button is pressed.*
-  If the keypad is in the Program Mode and no activity is detected for longer than 4 minutes, a steady tone will sound.

NOTE: For ease of programming, it is recommended that a GEM K1CA (or GEM-RP1CAe2) be used as Keypad #1. A new GEM-K1CA and a new GEM-RP1CAe2 are automatically configured as Keypad #1. See Keypad Configuration Mode.

-  Press the  button to silence the sounder and exit the User Program Mode.
- If a GEM-RP2ASe2/GEM-K2AS keypad is used, configure address jumpers as Keypad #1 (See WI1184).

ACCESSING USER PROGRAM MODE

1. Press
 ← New Panel (Default User Code = 123) →
 Existing Panel (Any Code with User Program Option Enabled)

2. Press **Until "ACTIVATE PROGRAM Y/N" appears on LCD screen.**

3. Press **To Enter User Program Mode**

4. Press **To Exit User Program Mode when finished**

USER PROGRAM MODE

USER CODES

GEM-K1CAe2 Keypad (Direct Entry)

Up to 48 User Codes may be programmed. **NOTE:** In this mode, only the code is programmable; the accompanying Area Options must be programmed in the Dealer Program Mode. **By default, User 1 is enabled in Area 1 and 2; Users 2-8 are enabled in Area 1, Users 9-16 are enabled in Area 2; Users 17-48 are not enabled in any areas (see page 10).**

Use the button to place the cursor over the User Number.

Enter a User Number (01–15) using the number buttons. The cursor will then advance to the User Code and read the existing code, if any.

Enter the new User Code using the number buttons (0-9). If an old code is displayed, program over it. To erase the digit at the cursor, press .

Press the button to save the code in memory.

Repeat this procedure for each user. To proceed to Zone-Description programming, press the NEXT button or the PRIOR button.

To Program User Codes

1. Set Cursor Position using the button.
2. Enter 2-digit User Number (01-96) directly using number buttons (0-9).
3. Enter Code (1-6 digits) directly using number buttons (0-9).
4. Press the button to save each code.

NOTE: Press button to clear character at cursor. To continue press or .

Programming User Codes with GEM-K1CAe2 Keypad

ZONE DESCRIPTIONS (GEM-RP1CAE2 / GEM-K1CA KEYPADS)

01-

Enter an identifying description for each zone. Buttons **1** and **2** set the cursor position; buttons **3** and **6** scroll numbers, letters, punctuation marks, etc.

 Position the cursor over the displayed Zone Number (i.e., "01") using buttons **1** and **2**.

 Change the Zone Number using buttons **3** and **6**.

 Position the cursor over the first character of the description field. Advancing the cursor between characters, program a description of up to two lines for the new zone using buttons **3** and **6**.

Press  to save. Advance to the next zone as in Steps 1 and 2 above and repeat this procedure until all zones have been programmed. After programming the user codes, press the NEXT button to proceed.

To Program Zone Descriptions

1. Set the Cursor Position using buttons **1** and **2**.
2. Select characters for zone description using buttons **3** and **6**.
3. Press the  button to save each descriptor.

NOTE: Press ***** **0** button to clear character at cursor.
To continue press **STAY** or **AWAY** button.

Programming Zone Descriptions

Enter Date
(/ /)
(Direct Entry)

Enter Date (Press the  button to set cursor.)
Enter the current date in the format MM/DD/YY, where MM = the month (01-12); DD=the day (01-31); and YY=the year. Press  to save. Press NEXT button to proceed.

Enter Time
(:)
(Direct Entry)

Enter Time (Press the  button to set cursor.)
Enter the current time in the format HH:MMA/P, where HH=hours (01-12); MM=minutes (00-59). Select Am or Pm by pressing any number button, then press  once again to save.

NOTE: To enter the date and time, GEM-RP1CAe2/GEM-K1CA keypad (version 6 or greater) must be used and "Enable Keypad Time/Date Display" (Address 3874) must be enabled.

USER PROGRAM MODE

KEYPAD CONFIGURATION MODE

This section will focus on configuring the GEM-RP1CAe2/GEM-K1CA Keypads. If there is more than one keypad in the system, *only Keypad No. 1 may be used for programming.*

KEYPAD INSTALLATION

Several types of keypads may be used with the GEM-P3200: the GEM-RP1CAe2/GEM-K1CA, the GEM-RP2ASe2/GEM-K2AS, the GEM-RP3DGTL/GEM-K3DGTL, and the GEM-RP4RFC/GEM-K4RF series (see WI1184). Each must be assigned an address number (1–15) and each requires its own configuration procedure (see CONFIGURING THE KEYPADS, which follows, and DIRECT ADDRESS KEYPAD AREA OPTIONS). At least 1 keypad must be used; only 1 is required for a single-area Commercial Burglary installation.

GEM-RP1CAe2/GEM-K1CA - is a 2-line combination fire/burglary/access keypad capable of supporting 4 EZM zones and a PGM output. The GEM-RP1CAe2 or GEM-K1CA is recommended for use as Keypad #1. See "Important Note" on page 2 for more information regarding the various buttons on the GEM-RP1CAe2/GEM-K1CA keypads.

CONFIGURING THE KEYPADS

A total of up to 7 keypads may be connected to the panel. GEM-RP1CAe2/GEM-K1CA, GEM-RP2ASe2/GEM-K2AS, GEM-RP3DGTL/GEM-K3DGTL, and the GEM-RP4RFC/GEM-K4RF keypads may be intermixed but require different configuration procedures, as described below and in WI1184.

Configuring the GEM-RP1CAe2/GEM-K1CA Keypad

Each GEM-RP1CAe2/GEM-K1CA keypad must be configured for (a) keypad tactile beep; (b) entry sounder; (c) keypad address; (d) compatibility number; (e) EZM address; and (f) zone response.

To enter the Keypad Configuration Mode:

1. Move jumper JP1 (located in the center of the control panel board) from Pins 1-2 (top two) to Pins 2-3 (bottom two). **NOTE:** See Wiring Diagram on [page 68](#).
2. After about 15 seconds, the display will read "XX OUT OF SYSTEM", where XX indicates the keypad address.
3. Press **1** **1** **1** **2** **3** **MENU** and proceed as follows. (Repeat the following procedure for all keypads).

NORMAL
KEYPAD
CONFIGURE

Keypad Tactile Beep

Upon entering the Keypad Configuration Mode, "KEYPAD BEEP ON" will be displayed, indicating that the tactile beep, which sounds when any button is pressed, is on. To turn off the tactile beep, press the **1** button (the **1** button will toggle the tactile beep on and off). Press **MENU** to continue or press **RESET** to exit.

Entry Sounder

To turn off the keypad entry sounder during entry time, press **1** (the **1** button will toggle the entry sounder on and off). Press **MENU** to continue or press **RESET** to exit.

Keypad Address

If more than one keypad is installed, each must be assigned a unique keypad address (that is, no two keypads may be numbered alike):

Keypads must be numbered consecutively (missing numbers are not permitted)

Only Keypad No. 1 may be used for programming.

To assign the keypad number, proceed as follows:

1. Enter the assigned keypad number 01–07, then press **1** to save. A valid number will be acknowledged by a short beep; an invalid number will be rejected by a long beep.
2. Press **MENU** to continue or press **RESET** to exit.

Compatibility Number

A 4-digit Compatibility Number, if programmed, will restrict this keypad to work on a panel programmed with a matching number.

1. Enter a 4-digit number
2. Press  to save. Press the  button to continue or press the  button to exit.

EZM Address

The keypad's internal EZM (Expansion Zone Module) may be utilized to provide four additional wired zones. Whether used alone or in conjunction with optional GEM-EZM series modules or other keypad EZMs, it must be assigned a unique address (or Group number, see Keypad Programming

Workbook) similar to its keypad address. If no other EZMs are to be used, designate the keypad as Group "01" at the "EZM ADDRESS 00" display. In multiple-EZM systems, enter an assigned group number "01" through "06". (Each EZM must have a unique assigned group number, starting with "01" and proceeding consecutively.) Press the  button to continue or press the  button to exit.

Zone Response

The normal loop response of each keypad expansion zone is 750mS, however the response time of any zone can be reduced to 50mS as follows.

1. Of the following, circle the number(s) in parentheses associated with the zone(s) to be changed: Zone 1=(1); Zone 2=(2); Zone 3=(4); Zone 4=(8)

2. Add up the circled numbers.
3. At the keypad, enter the sum as a two-digit number "01" through "15" on the display, then press .

Example. Change Zones 2, 3 and 4 to 50mS response.

1. Circle numbers for Zones 2, 3 and 4: (2), (4) and (8).
2. Add up the circled numbers: 2 + 4 + 8 = 14.
3. Enter "14" at the keypad, then press the .

Press the  button to continue or press the  button to exit.

Program Control Message

A code-keypad association can be programmed such that when the code is entered at a specific keypad, a PGM Lug will be activated for 7 seconds, and a selected message will be displayed on this keypad. Six different program control messages can be selected (0-6) as displayed in the following table:

Program Control Message	
0	(No Message)
1	**Enter Now**
2	Door Control
3	Gate Control
4	Light Control
5	Control #1
6	Control #2

1. Enter a message number
2. Press  to save.
3. Press the  button to continue (the display will loop back through selections, for changes) or press the  button to exit the Keypad Configuration Mode (display will read "01 OUT OF SYSTEM").
4. Replace Jumper JP1 across Pins 1-2 (top two).

GEM-P3200 WIRING DIAGRAM

NAPCO SECURITY SYSTEMS, INC
AMITYVILLE, N.Y. 11701

GEMINI GEM-P3200 / P3200M WIRING DIAGRAM

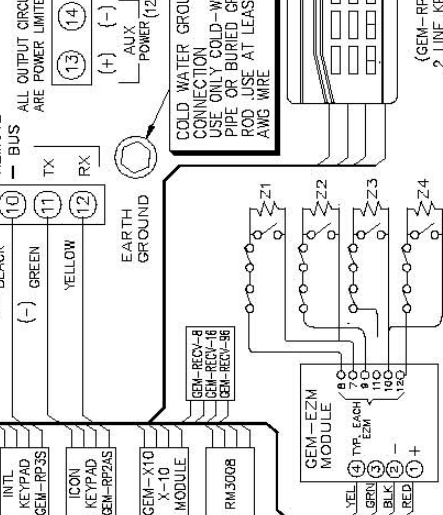

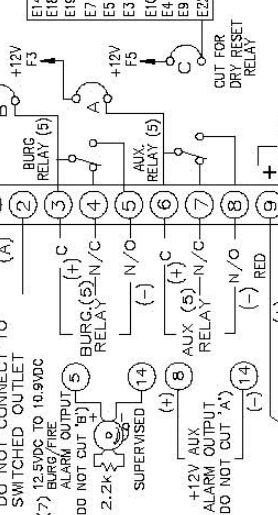

(REFER TO OPERATION AND INSTALLATION INSTRUCTIONS WB17)

- 1.) END-OF-LINE RESISTORS: 2200 OHMS, RED, RED, 5%, 1/2W, (EQ.2.2K) ALSO INSTALLED IF ZONE NOT USED IN PANEL OR ZONE (INCLUDING FIRE AND PANIC). DO NOT INSTALL EOL RESISTOR ON FIRE ZONE IF USING P12200 EOL RELAY.
- 2.) COMBINED STANDBY CURRENT=AUX POWER + REMOTE POWER + RESET RELAY + FIRE POWER. BELL CURRENT MAY BE INCREASED BY SUBTRACTING AN EQUAL AMOUNT FROM THE STANDBY CURRENT.
- 3.) SYSTEM MUST BE TESTED AT LEAST ONCE A WEEK IN THE AC/BATTERY MODE AND IN THE BATTERY-ONLY MODE. (CONTACT CENTRAL STATION PRIOR TO TESTING)
- 4.) CONTACTS 2A/24VDC RESISTIVE (CUT JUMPER FOR DRY CONTACT)
- 5.) FOR U.L. RESIDENTIAL FIRE, CUT 'PS' JUMPER AND INSTALL SHUNT ACROSS JP6 HEADER.
- 6.) FOR SUPERVISION PROGRAM 'SUPERVISED BELL OUTPUT' UNIT INTENDED TO BE MOUNTED ON THE WALL VERTICALLY
- 7.) REFER TO WB17 FOR COMPATIBLE TWO WIRE SMOKE DETECTORS. DO NOT MIX DIFFERENT MODELS.
- 8.) RECOMMENDED BATTERIES: YUASA NP4-12 AND NP7-12.
- 9.) BATTERIES MUST BE REPLACED EVERY FIVE YEARS.
- 10.) THIS PANEL SHALL BE CHECKED BY A QUALIFIED TECHNICIAN AT LEAST ONCE EVERY THREE YEARS.
- 11.) AUX. POWER AND FIRE POWER VOLTAGE RATING 12.5VDC TO 11.7VDC. PANEL STOPS PROCESSING ALARMS AT 6VDC.
- 12.) THIS PANEL SUPPORTS ONLY ONE SMOKE DETECTOR IN ALARM FOR EACH ZONE.
- 13.) CUT TO DISABLE BELL SUPERVISION. DO NOT CUT IN U.L. INSTALLATIONS.
- 14.) DISABLE AUTO-RESET ON NON-FIRE ZONES FOR SIA Q-01 INSTALLATIONS.

LA1499E

AC IN, 16.5V/60Hz VIA TRF11' OR TRF14. DO NOT CONNECT TO SWITCHED OUTLET

This equipment should be installed in accordance with Chapter 2 of the National Fire Alarm Code, ANSI/NFPA 72-1996 (National Fire Protection Association Batterymarch Park, Quincy, MA 02269), and local codes. Information describing proper installation, operation, testing, maintenance, evacuation planning, and repair service is to be provided with this equipment. U.L. Listed United Energy Cable is required.

J5 NORMAL KEYPAD CONFIGURE

THIS UNIT INCLUDES AN ALARM VERIFICATION FEATURE THAT WILL RESULT IN A DELAY OF THE SYSTEM ALARM BELL OUTPUT UNTIL THE SMOKE DETECTOR(S) SIGNAL DOES NOT EXCEED 60 SECONDS. NO OTHER SMOKE DETECTORS SHALL BE CONNECTED TO THESE CIRCUITS UNLESS APPROVED BY THE LOCAL AUTHORITY HAVING JURISDICTION. CIRCUIT CONTROL UNIT SMOKE DETECTORS ZONES DELAY-SEC. MODEL DELAY-SEC.

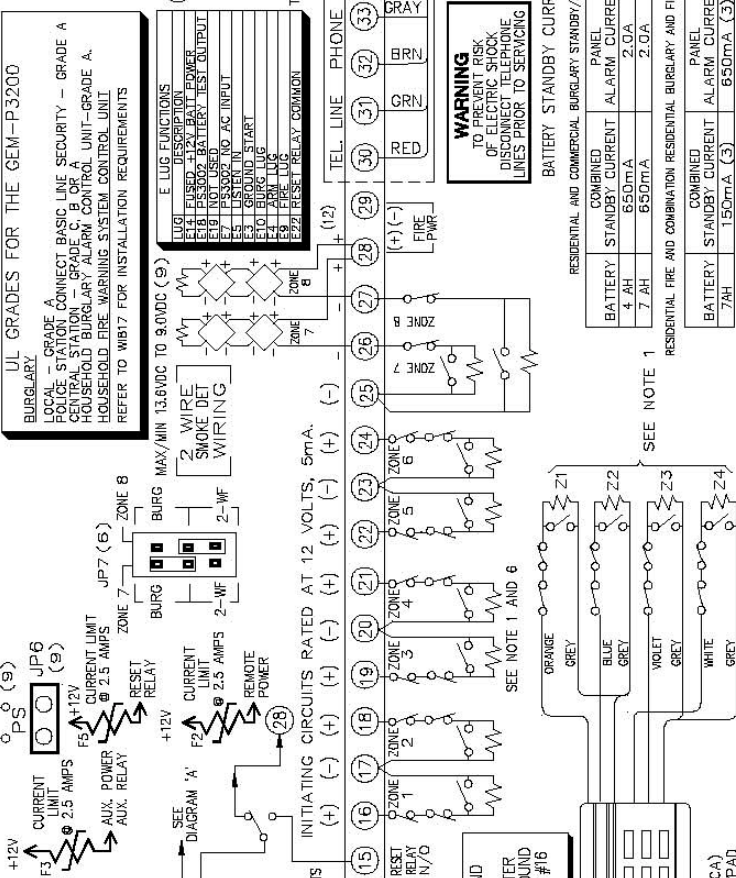

THE DELAY (POWER UP) (STARTUP) TIME MARKED ON THE INSTALLATION WIRING DIAGRAM OF THE SMOKE DETECTOR OR ON THE INSTALLED SMOKE DETECTOR(S) IS TO BE USED.

BATTERY STANDBY CURRENT

RESIDENTIAL AND COMMERCIAL BURGLARY/STANDBY/ALARM	STANDBY CURRENT	STANDBY TIME
4 AH	650mA	4 HOURS
7 AH	650mA	6 HOURS

RESIDENTIAL FIRE AND COMBINATION RESIDENTIAL BURGLARY AND FIRE	STANDBY/ALARM CURRENT	STANDBY TIME
7AH	1500mA (3)	24- HOURS
	650mA (3)	

WARNING
TO PREVENT RISK OF ELECTRIC SHOCK DISCONNECT TELEPHONE LINES PRIOR TO SERVICING.
