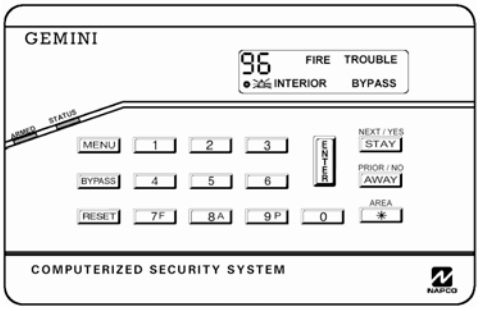
PROGRAMMING INSTRUCTIONS

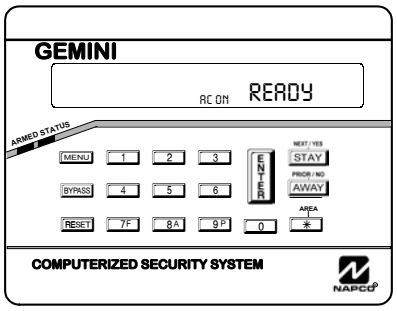
HARDWIRE GEMINI™ *WIRELESS*

GEM-P816
CONTROL PANEL/COMMUNICATOR

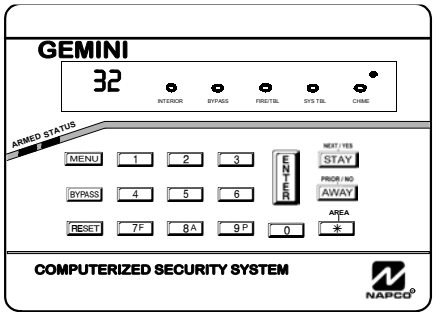
Programming the GEM-P816 Control Panel with the
"Classic" GEM-RP2ASe2, **GEM-RP3DGTL**, and **GEM-RP4RFC/GEM-RP4C** Keypads and
the **"K Series" GEM-K2AS**, **GEM-K3DGTL**, and **GEM-K4/GEM-K4RF** Keypads



"K Series" GEM-K4/GEM-K4RF



"K Series" GEM-K2AS



"K Series" GEM-K3DGTL

Quick Start (for GEM-K2AS):

1. **Refer to the wiring diagram, connect Siren, Aux. Power, PGM Output, Remote Bus, Earth Ground, Zone and Telephone Wiring. NOTE: See Installation Instructions (WI994).**
2. **Connect AC power first and then the battery.**
3. **Configure the keypad (see page 43).**
4. **Access the Easy Menu Driven (Dealer Program) Mode:**

Press

4 5 6 7F 8A 9P MENU

Dealer Code

***Press* NO until "TURNON PROG Y/N" appears on the keypad display.**

***Press* NEXT/YES to enter Dealer Program Mode. See p. 5**

Quick Start (for GEM-K3DGTL):

1. **Refer to the wiring diagram, connect Siren, Aux. Power, PGM Output, Remote Bus, Earth Ground, Zone and Telephone Wiring. NOTE: See Installation Instructions (WI994).**
2. **Connect AC power first and then the battery.**
3. **Configure the keypad (see page 43).**
4. **Access the Easy Menu Driven (Dealer Program) Mode:**

Press

4 5 6 7F 8A 9P MENU

Dealer Code

***Press* NO until "17" appears on the keypad display.**

***Press* NEXT/YES to enter Dealer Program Mode. See p. 5.**

© Napco 2004

THIS MANUAL INCLUDES FEATURES WHICH ARE ONLY AVAILABLE IN CONTROL PANEL FIRMWARE VERSION 10 OR LATER.

IMPORTANT NOTE

This manual supports the keypad programming of the GEM-P816 control panel with the NAPCO "classic" GEM-RP2ASe2, GEM-RP3DGTL and GEM-RP4RFC series keypads as well as the GEM-K2AS, GEM-K3DGTL and GEM-K4RF "K Series" keypads. The new "K Series" models offer the new STAY and AWAY buttons with simplified functionality, along with the new MENU and ENTER buttons. While the instructions in this manual are depicted using the "K Series" keypads, the manual applies to both the "classic" and the "K Series" keypads.

Program Mode is the same for both keypads--**only the button names have changed**, as follows:

- The [FUNCTION] button and the [MENU] button operate identically (in Program Mode) for both keypads.
- The [ON / OFF] button and the [ENTER] button operate identically (in Program Mode) for both keypads.
- The [NEXT / YES INTERIOR] button and the [NEXT / YES STAY] button operate identically (in Program Mode) for both keypads. The words "**NEXT/YES** button" are used in this manual.
- The [PRIOR / NO INSTANT] button and the [PRIOR / NO AWAY] button operate identically (in Program Mode) for both keypads. The words "**PRIOR/NO** button" are used in this manual.

CHANGES FROM PREVIOUS EDITION

The following changes have been made to this manual (WI1182A) since the previous edition (WI1182).

- Removed the following entries from the index: Change Pulse Output to Cadence, Enable Chirp on RF Arming, Enable Transmitter Telco 1, Enable Transmitter Telco 3, Select Bell Output on RF Arming.
- Page 4, top, "Downloading From a Computer", the following sentence was added: "Unattended downloading from a computer is not allowed for Fire Alarm or UL installations."
- Pages 4, 5, 7 and 14, the "50mS Loop Response Zones" entries now contain the following notation: "**Note:** 750mS is required for Loop Response time in UL installations."
- Page 8, the "Auto Bypass Re-entry Zones" entry was modified: "Not Evaluated by UL" notation was added.
- Page 9, the "Enter User Codes" entry was modified, and now states to "enter a code from 3 to 6 digits."
- In the Area Options/Explanation chart at the top of page 10, the following information was added: "Ambush: Allows user code to send Ambush signal to Central Station".
- Top of page 25, under the heading, "Output Timeouts", the following reference was added: "Not UL listed for Commercial Installations".
- Page 27, Address 0720, bit 7 (Change Pulse Output to Temporal Output) was modified with the following notation: "This feature must be programmed in Fire Alarm applications."
- Page 27--All references to 0720-Bit 6--"Enable PGM2 Chirp on Keyfob Arming" name changed to "Chirp Output on Keyfob Arm/Disarm".
- Page 27--All references to 0722-Bit 0--"Automatic Interior Bypass" name changed to "Automatic Interior Bypass/Easy Exit".
- Page 27--All references to 0721-Bit 7--"Enable Bell Output on Keyfob Arming" name changed to "Select Alarm Output for Keyfob Chirp".

GEM-P816 WIRING DIAGRAM 52

Refer to accompanying GEM-P816 Installation Instructions (WI994) for installation information.

NOTE: THESE PROGRAMMING INSTRUCTIONS ARE INTENDED AND WRITTEN FOR THE PROFESSIONAL INSTALLER HAVING SUITABLE EXPERIENCE AND INSTALLATION EQUIPMENT. THE UNIT IS DESIGNED TO BE PROGRAMMED USING AN IBM-COMPATIBLE COMPUTER WITH NAPCO PCD3000 SOFTWARE. AFTER PROGRAMMING, BE SURE TO RUN THE PCD3000 ERROR-CHECK UTILITY TO GUARD AGAINST PROGRAMMING CONFLICTS FOR THE TYPE OF SERVICE SELECTED FOR THE INSTALLATION.

SYSTEM PROGRAMMING OPTIONS

INTRODUCTION

The GEM-P816 control panel may be programmed by various means, each of which will be covered in detail in the sections that follow. Keypad displays shown are for a GEM-K2AS, GEM-K3DGTL and GEM-K4RF series keypads. With the GEM-RP2ASe2 and GEM-K2AS keypads, because of their reduced display capabilities, messages are abbreviated and will scroll through two or more screens. Zone descriptions cannot be programmed using GEM-K2AS or GEM-RP2ASe2 keypad, therefore a GEM-RP1CAe2/GEM-K1CA must be used (see WI995).

- ✓ **Downloading From a Computer.** This is the preferred method of programming. The panel may be downloaded from (or uploaded to) an IBM PC-compatible computer, either locally or remotely. Napco's PCD-Windows Quickloader software features context-sensitive help screens as well as an error-checking utility that prevents programming of incompatible or conflicting data to ensure proper panel operation. **Note:** Unattended downloading from a computer is not allowed for Fire Alarm or UL installations.
- ✓ **Easy Menu-Driven Program (Dealer Program) Mode - Keypad Programming.** The Easy Menu-Driven Program Mode allows keypad programming of number of zones in area 1, number of fire zones (both 4-wire and 2-wire), local or Central Station reporting, number of exit/entry zones, number of interior zones, number of 24 hour zones, number of chime zones, Chime 2 zones, Exit/Entry2 zones, 50ms loop response zones (**Note: 750mS is required for Loop Response time in UL installations**), aux output activated on alarm zones, sensor watch zones, keypad sounder on alarm zones, auto bypass re-entry zones, EOLR zones, number of keypads in area 1, Central Station telephone number, Central Station account number, Central Station receiver format, User Codes, RF transmitter points, RF keyfob transmitters, zone descriptions, dealer code, Telco line fault test, Burg output chirp on keyfob, enable CP-01, and clear dealer program/cold start. For new panels, a custom default program may be created at the keypad. A menu-driven utility prompts the installer to configure the system. Further detailed customization is accomplished in the Direct Address Program Mode.
- ✓ **Direct Address (Dealer Program) Program Mode - Keypad Programming.** The Direct Address Program Mode is an extension of the Dealer Program Mode wherein data is entered at the keypad by specific location. This mode is accessed from the Easy Menu Driven Program Mode by pressing the [RESET] button at any time.
- ✓ **User Program Mode - Keypad programming.** The User Program Mode is intended for authorized users and is limited to keypad programming of User Codes, Time, Date and Zone Descriptions.

DOWNLOADING FROM A COMPUTER

The control-panel program may be downloaded from the computer by any of the following methods.

Local Downloading

(**Note:** This procedure should be used after installation, after peripheral devices are connected).
For direct high-speed data transfer to the control panel from a desktop computer, connect the download jack (JP2) on the panel to the LOCAL jack (J3) on the Napco PCI2000/3000 computer interface using the supplied 6-conductor cable. (Refer to PCI2000/3000 Installation Instructions WI443 for wiring diagram and procedures).
Similarly, a high-speed local download may be made in the field using a notebook or laptop computer. Connect JP2 on the control panel to a Napco PCI-MINI computer interface using the 6-conductor cable supplied. (Refer to PCI-MINI Installation Instructions WI767).

Remote Downloading

(Also see PCI2000/3000 Installation Instructions WI443). **Note:** Unattended downloading from a computer is not allowed for Fire Alarm or UL installations.

Function Mode.

Start by establishing a telco connection between the computer operator and the installer. During this procedure, voice contact will be lost, therefore both the installer and the computer operator should be familiar with the operation. When a steady high-pitched tone is heard at the site phone, access the "ACTIVATE DOWNLOAD" Function (see Keypad Programming Modes), then press the [ENTER] button or the YES button; the site phone will go dead. Hang up the phone and wait for a call from the central station confirming a successful download.

Callback Method.

An installed, unattended panel may be programmed or reprogrammed remotely using the Callback-Method Download feature of the PCD Windows software. Remote downloading requires a modem compatible with the PCI2000/3000. Upon answering the call from the computer, the panel will verify the Download Security Code and, if confirmed, will establish a connection. If a Callback Number is programmed into the panel, the panel will automatically disconnect and call the computer at this number before establishing a connection.

EASY MENU DRIVEN PROGRAM MODE

DEALER PROGRAM - PRELIMINARY INFORMATION

☞ Only Keypad #1 may be used for both Dealer and User programming, however this keypad may be located in any area.

☞ The Default Dealer Code is [4] [5] [6] [7F] [8A] [9P]. Use this code to enter the Dealer Program Mode to program a custom Dealer Code, which replaces the Default Dealer Code. If you clear your Dealer Code, use the Default Dealer Code once again to enter programming.

☞ After entering codes or data, press the save [ENTER] button. **Data will not be stored into memory unless [ENTER] is pressed**.

☞ If the keypad is in the Program Mode and no activity is detected for longer than 4 minutes, a steady tone will sound.

☞ Silence the sounder by the [*] button to continue, or by pressing the [RESET] button to exit.

☞ A panel that has been COLD STARTED (Address Location 1198) performs identically to a new panel.

☞ When programming a Multiple Area System, Direct Address Programming Mode must be used to complete the program.

KEYPAD #1: For ease of programming, it is recommended that a GEM-RP1CAe2 or GEM-K1CA be used as Keypad #1. (Regardless of which keypad is selected, all *new* keypads are configured as Keypad #1 out of the box). If a GEM-RP2ASe2/GEM-K2AS is used, configure address jumpers as Keypad #1 (see Configuring the GEM-RP2ASe2/GEM-K2AS Keypad, page 43).

ACCESSING DEALER PROGRAM MODE

1. Press [4] [5] [6] [7F] [8A] [9P] [MENU]

Dealer Code (Default = 456789)

2. Press **"PRIOR/NO" button until** "TURNON PROG Y/N" **(GEM-RP2ASe2/ GEM-K2AS) or** "17" **(GEM-RP3DGTL/GEM-K3DGTL or GEM-RP4RFC/GEM-K4RF) appears on the LCD screen.**

3. Press **"NEXT/YES" button to Enter Dealer Program Mode.**

4. Press [RESET] [RESET] **to exit Dealer Program Mode when finished.**

CUSTOMIZING A DEFAULT PROGRAM

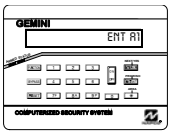
For new panels, you can design a default program that will best suit your application. Using this procedure, you will configure the panel for:

- Number of Zones in Area 1
- Fire Zones in Area 1
- 2-Wire Fire Zones in Area 1
- Local or Central Station Reporting System
- Exit/Entry Zones in Area 1
- Interior Zones in Area 1
- 24 Hour Zones in Area 1
- Chime Zones in Area 1
- Chime 2 Zones in Area 1
- Exit/Entry2 Zones in Area 1
- 50mS Loop Response Zones (Note: 750mS is required for Loop Response time in UL installations).
- Aux Output Activated on Alarm Zones
- Sensor Watch Zones
- Keypad Sounder on Alarm Zones
- Auto Bypass re-entry Zones
- Enable no EOLR Zones
- Number of Keypads in Area 1
- Central Station Receiver 1 Tel. Number
- Central Station Receiver 1 Account Number
- Central Station Receiver 1 Format
- Enter User Codes
- RF Transmitter Points
- Quick Method
- Key Fob Transmitters
- Enter Zone Descriptions
- Dealer Code
- Enable Telco Line Fault Test
- Enable Burg Output Chirp on Keyfob
- Enable CP-01
- Clear Dealer Program
- Cold Start

This procedure will automatically set up system keypads, EZMs, wireless transmitters, etc. After your basic default program has been loaded, you may alter it as necessary in the Direct Address Program Mode.

NEW PANELS: The custom default program may be created for new panels only. Once the panel has been programmed by any means, the number zones will be suppressed and cannot be changed. Should it be necessary to create a new custom default program, (a) from the Dealer Program Mode, press the [RESET] button to enter the Direct Address Program Mode; (b) access Location 1197 (Clear Program); (c) press the [ENTER] button and start over.

GEM-RP2ASe2/GEM-K2AS Keypad Easy Program Menu



Enter the Dealer Security Code (default = 456789) for a new panel or enter your custom Dealer Program Code if programmed. Press the PRIOR/NO button repeatedly until "TURNON/PROG" is displayed. **NOTE:** If you pass "TURNON/PROG", you can scroll back by pressing [BYPASS]. Press the NEXT/YES button to enter the Dealer Program Mode. In each of the following steps, press [MENU] to jump to the next screen, the NEXT/YES button to go forwards, the PRIOR/NO button to go backwards, [ENTER] to save and [RESET] twice to exit at any time.

(Direct Entry)

Total Number of Zones in Area 1 *(Appears for New Panel Only)*
Directly enter the total number of zones to be programmed for Area 1. Valid entries are from 01 to 32. Directly enter the total number of zones, including leading zeros. Use number buttons [1] through [9 P]. **NOTE:** Press [0] for a zero. The system is based on groups of 4 zones each (after the first 8 zones), and will automatically round up to the next group of 4. For example, if you enter 18, it will automatically convert this to 20 zones. Press [ENTER] to save. Press the NEXT/YES button to proceed.

NOTE: If you are programming a 2 Area system, enter the total number of zones required for Areas 1 & 2. The Direct Address Program Mode can then be used to remove zones from Area 1 and place them in Area 2. See Zone Options. If Programming a Wireless Only system, or using wireless only on Zones 9-32, enter the total number of zones in system. Enter the transmitter points in the RF Transmitter section of the Easy Menu Driven Programming Mode.

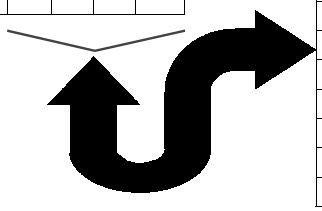
Enter User Codes *(Press the* ([MENU]) *button to set cursor.)*
For default program, enter up to 32 User Codes, with Area 1 and Area 2 Options.
Press [MENU] once to set the cursor to the User Code. Use the number buttons [1] through [9 P] to enter a code from 3 to 6 digits. Enter up to 6 digits (4 digits is recommended) in the first six boxes from left to right for each user code. Valid entries are: 0-9. **NOTE:** Press [0] for a zero and press [✳] [0] for a blank space (•). No blank spaces in between; leave blank (•) any trailing boxes. If "Enable Global Ambush Code" (Address 0720) is enabled and "Global Ambush Code" (Address 1054) is **not** left blank(•), *do not* program the first two digits of ANY User Code the same as the "Global Ambush Code". **Note:** If the programmed code was less than 6 digits, press [MENU] to set the cursor to the Area 1 Options Level (OPT). Refer to the table on the next page for the available area options. **Note:** Duplicate User Codes are not allowed; therefore a duplicate Code entered in the LCD Window will erase when [ENTER] is pressed.

USER OPTIONS									
USER CODE (UP TO 6 DIGITS)						AREA 1 OPTIONS		AREA 2 OPTIONS	



USER AREA OPTIONS		
DATA ENTRIES		OPTION ENABLED
L	R	
blank(•)	blank	Disabled
blank(•)	1	Arm/Disarm
blank(•)	2	Arm Only
blank(•)	3	Service
blank(•)	4	Access
blank(•)	5	Ambush
blank(•)	Add 8	* User Program

AREA OPTIONS: Area 1 and Area 2 Options may be programmed for all 32 users.

☞ Select the desired Area Options (Area 1 and Area 2) from the table shown and enter in the remaining four boxes for each user code.

Example: Program a code of "2222" for user 02, with area 1 options of "Arm/Disarm" and "User Program". Enter "2222" for a user code, "•(blank) 9" for area 1 options and "•(blank) •(blank)" for area 2 options.

AREA OPTIONS	EXPLANATION
Disabled	User Code not active in this area.
Arm/Disarm	Allows User Code to arm/disarm this area.
Arm Only	Prevents User Code from disarming this area.
Service	A Service Code has restricted arm/disarm rights; if an area is armed with a Service Code, a "MONITOR ON" appears on the GEM-RP2ASe2 keypad and the area can be disarmed with any valid User Code, including a Service Code. If the area is armed with OTHER than a Service Code, it CANNOT be disarmed with a Service Code. This is typically used to allow tradesmen access to premises under control of the owner.
Access	This is normally used to activate a door strike while an area is disarmed. Also program "Access Control on PGM2 Output" (Address 0719) and "PGM2 Output Access Control Timeout" (Address 0711).
Ambush	Allows User Code to send Ambush signal to Central Station.
* User Program	User Program Option is enabled for Keypad 1 only, wherever it is connected (Area 1 or Area 2). To enable User Program Option for any user add 8 to the data entry for Area 1 Option (see example). Then, User Programming can be performed only at Keypad 1 by a user code with user program enabled.

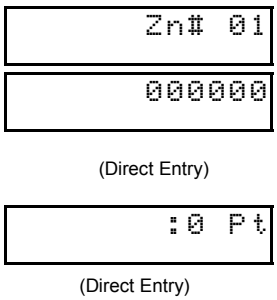
Related User Options: "Enable Global Ambush Code" (Address 0720), "Global Ambush Code" (Address 1054) & "Enable Managers Mode" (Address 0719).

☞ For Area 2 Options (ACC), press [FUNCTION] once again. Refer to the table above for available options. **NOTE:** Press [0] for blank space (•).

☞ Press [ENTER] to save. To proceed to the next User Code, press [MENU] to set the cursor to the User Number and change it using the number buttons.

Program a new User Code as previously described. Remember to record your user codes in the *Easy Menu Programming Worksheet* at the back of this manual.

CHANGING OR CANCELING A CODE: To change any code, merely program over the existing code as described above and press [ENTER] to save. Similarly, to cancel a code, blank out each number of the code press [ENTER] to save.



RF Transmitter Points *(Press the ([MENU]) button to set cursor.)*

(For wireless systems only. Also see Quick Method, which follows)

For each transmitter (key fob transmitters also), enter the **zone number** (01–32) to which the transmitter will be mapped, the **6-digit RF ID #**:**1-digit checksum number** printed on the transmitter and box, the **point number** (1–4); *enter "9" for unsupervised* (all points). **NOTE:** When programming the ID Code number, "0" through "9" = [0] through [9 P]; "A" = [✳] [0]; "B" = [✳] [1]; "C" = [✳] [2]; "D" = [✳] [3]; "E" = [✳] [4] and "F" = [✳] [5]. Press [ENTER] to save. Press the NEXT/YES button button to proceed.

Quick Method.

If a receiver is already installed in the panel, Napco transmitter wireless points can be programmed automatically ("enrolled") using the following procedure. **NOTE:** The transmitter point will be enrolled only if the signal strength is 3 or greater.

1. Enter the zone number to which the transmitter point will be mapped.
2. Press the [BYPASS] button to enter the Enroll Mode. The red and green LEDs on the keypad will flash.
3. Open the loop of the point that is to be programmed (GEM-TRANS2 only).
4. Install the transmitter battery. The keypad will beep to indicate that the point has been successfully enrolled. Multi-point transmitters can be mapped to successive zones simultaneously (Example).

Example. *A 2-point transmitter has the RF ID number 287613:1. Map point 1 to Zone 6 and point 2 to Zone 9.*

1. Enter the Enroll mode as described above.
2. Enter Zone "06".
3. Open point-1 loop.
4. Install the battery. The keypad will beep once to indicate that one point has been programmed. (Transmitter 287613:1, point 1 will be mapped to Zone 6).
5. Enter Zone "09".
6. Close point-1 loop and open point-2 loop.
7. Remove the transmitter battery, then re-install it. The keypad will beep once to indicate that one point has been programmed. (Transmitter 287613:1, point 2 is mapped to Zone 9).

KEY FOB ZONE ASSIGNMENT: Key fobs can also be assigned to zones to allow multiple wireless panic buttons on one alarm system, each reporting to a central station, a pager or having a description on the keypad that describes the person holding the key fob, the location where the person holding the key fob is stationed, or the special purpose of the key fob button being depressed. *See Key Fob Transmitters as Zone Input Devices .*

:0 0 0

(Direct Entry)

Key Fob Transmitters as Arm/Disarm & Control Devices
(Press [MENU] to set cursor).

Keyfobs can be programmed as "Arm/Disarm" devices using their On/Off buttons (refer to WI752). For each Key Fob Transmitter, enter:

☞ The **Key Fob Transmitter number** (01–08). Press [0] [1] through [0] [8A] for 01-08.

☞ **Area number** to which transmitter is assigned (0 to disable keyfob, 1 or 2). Press [0], [1] and [2] for 0, 1 and 2, respectively.

☞ The **6-digit RF ID #** printed on the transmitter (enter all numbers and/or letters, including leading "0"s, if any): "0" through "9" = [0] through [9P]; "A" = [*] [0]; "B" = [*] [1]; "C" = [*] [2]; "D" = [*] [3]; "E" = [*] [4] and "F" = [*] [5].

☞ 1-digit checksum number printed on the transmitter.

☞ **Aux 1 Option** (see key fob aux 1 & aux 2 options).

☞ **Aux 2 Option** (see key fob aux 1 & aux 2 options).

For Aux 1/Aux 2 Options: "0", "1", "2" and "9" = [0], [1], [2] and [9P], respectively; "A" = [*] [0]; "B" = [*] [1]; "C" = [*] [2] and "D" = [*] [3].

DATA ENTRY	AUX 1/AUX 2 OPTIONS
0	None
1	Relay Group 1 Toggle
2	Relay Group 2 Toggle
9	Keypad Panic
A	Keypad Aux.
B	Instant
C	PGM2 Ouput Toggle
D	Access on PGM2 Output
E	Arm Stay
F	Interior Button

If the Key Fob is converted for Two Button "Emergency Use" (by cutting an internal jumper), both top or bottom buttons must be depressed to activate an alarm. In this case, the Aux-1 and Aux-2 cannot be programmed. Press [ENTER] to save. Press the NEXT/YES button to proceed.

Key Fob Transmitters as Zone Input Devices
(refer to display as shown above: press the PRIOR/NO button to go backwards).

Each of the 4 key fob buttons can be assigned to a zone. For example, On button = point 1; Off button = point 2; A1 = point 3; A2 = point 4. Up to 32 key fobs (using 1 button) or 16 key fobs (using 2 buttons) or 8 key fobs (using all 4 buttons) or any combination up to a maximum of 32 controlled zones can be assigned, providing multiple wireless panic buttons on a system, each reporting to a Central Station or a pager and/or annunciating on a keypad the key fob zone number with description/location. *To assign a key fob to a zone:* program the keyfob as you would a transmitter, entering the keyfob's ID code, check sum and point number at the appropriate zone. The "Quick Method" is not allowed. The zone may be hardwired to an electrical sensor as well as assigned to a key fob (either one will activate the zone alarm output). **NOTE:** If assigning a key fob to a zone, the "ON/OFF" buttons on the key fob will no longer arm/ disarm the system. The key fob is converted to a "panic only" device.

ZONE DESCRIPTIONS: GEM-RP2ASe2 cannot be used to enter Zone Descriptions. To enter Zone Descriptions, you must use the *GEM-RP1CAe2 Keypad (See WI995) or the Napco Quickloader Software.*

(Direct Entry)

RE-ENT

(Direct Entry)

Dealer Code

Directly enter the Dealer Code (default = 456789), including leading zeros. Use the [1] through [9P] buttons. **NOTE:** Press [0] for a zero. Press [ENTER] to save. Re-enter the Dealer Code to verify the previous code. Press [ENTER] to save. Press the NEXT/YES button to proceed.

EXIT DEALER PROGRAM MODE: This completes the custom default program. Press the RESET button to enter the Direct Address Program Mode for further programming or press RESET once again to end all programming and resume normal keypad operation.

CLEAR PROGRAM: Should it be necessary to create a new custom default program, (a) from the Dealer Program Mode, press RESET to enter the Address Program Mode; (b) access Location 1197 (Clear Program) or 1198 (Cold Start); (c) press ENTER and then (d) press RESET to exit the Dealer Program Mode. A "SYSTEM TROUBLE/E09-00 SERVICE" will occur. Press RESET to silence the keypad.

1197 XX

(Direct Entry)

Clear Dealer Program (Erases Dealer Program)

This *erases the dealer program*. Use this feature to start a customized default program. Program Data and System Status Memory is erased where Scheduled Data and Zone Descriptions are maintained.

Access address 1197, then press the ENTER button. Data entry is not allowed. **NOTE:** Enter Easy Menu Driven Program Mode to program system again.

1198 XX

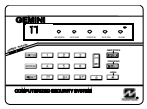
(Direct Entry)

Cold Start (Erases Entire Program)

This erases the entire program including Dealer Program by erasing Program Data, Zone Description Data and System Status Data (similar to a new panel).

Access address 1198, then press the ENTER button. Data entry is not allowed. **NOTE:** Some features (schedules) can only be programmed again with the Downloading Software.

GEM-RP3DGTL/GEM-K3DGTL and GEM-RP4RFC/GEM-K4RF Keypad Easy Program Menu



Enter the Default Dealer Program Code ("456789") for a new panel or enter your custom Dealer Program Code if programmed. Press [MENU], followed by [PRIOR/NO] repeatedly until "17" is displayed (you can scroll back by pressing [BYPASS]). Press [NEXT] to enter Dealer Program Mode. For the GEM-RP3DGTL/GEM-K3DGTL (and GEM-RP4RFC/GEM-K4RF), questions are in the form of a 2-digit number flashing in the display. Press [MENU] to set the cursor into the next field to answer the question. Press [MENU] again to scroll through each segment. Press [NEXT] to go to the next question. To review your Easy Program Mode responses (before pressing [ENTER] to save), press [MENU] until the 2-digit question number flashes in the display again. If the data is correct, press [ENTER] to save. If the data is incorrect, press [MENU] to set the cursor into the next field and again enter your data.

Note: Review your Easy Program Mode responses after the initial programming of the control, except for questions marked "For New Panel Only". These questions set up the basic structure of the panel program ("Number of Zones in an Area", etc.) and cannot be viewed or altered once set. To exit the Dealer Program Mode, press [RESET] twice to resume normal keypad operation. To return the panel to the factory default, enter the Direct Address Program Mode, go to location 1198 and press [ENTER].

(Direct Entry)

Exit/Entry Zones *(Appears for New Panel Only)*
Directly enter the zone numbers which are to be used as Exit/Entry zones. Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros. Use number buttons [1] through [9 P]. **NOTE:** Press the [0] button for a zero. Press [ENTER] to save and then repeat for any additional zone(s). Press the NEXT/YES button to proceed.
NOTE: Exit/Entry Zones will have an entry delay of 30 seconds and an exit delay of 60 seconds.

(Direct Entry)

Interior Zones *(Appears for New Panel Only)*
Directly enter the zone numbers which are to be used as Interior Zones. Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros. Use number buttons [1] through [9 P]. **NOTE:** Press the [0] button for a zero. Press [ENTER] to save and then repeat for any additional zone(s). Press the NEXT/YES button to proceed.
NOTE: All Interior zones will also be automatically programmed as “Exit/Entry Follower” and "Power Up Delay" zones.

(Direct Entry)

24 Hour Zones in Area 1 *(New Program Only)*
- Enter the zone numbers of zones to be used as 24 Hour zones.
- Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros.
- Press [ENTER] to save and repeat for any additional zone(s); press the NEXT/YES button to proceed.

(Direct Entry)

Chime Zones in Area 1 *(New Program Only)*
- Enter the zone numbers which are to be used as Chime Zones.
- Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros.
- Press [ENTER] to save and then repeat for any additional zone(s), press the NEXT/YES button to proceed.

NOTE: A chime time of 2 seconds will be automatically programmed.

(Direct Entry)

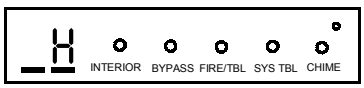
Chime 2 Zones in Area 1 *(New Program Only)*
- Enter the zone numbers which are to be used as Chime 2 Zones.
- Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros.
- Press [ENTER] to save and then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

NOTE: A chime time of 2 seconds will be automatically programmed.
Chime 2 zones give a distinct pulsating tone when zone is faulted.

(Direct Entry)

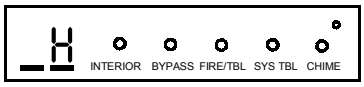
Exit/Entry2 Zones in Area 1 *(New Program Only)*
- Enter the zone numbers of zones to be used as Exit/Entry zones.
- Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros.
- Press [ENTER] to save and repeat for any additional zone(s); press the NEXT/YES button to proceed.

NOTE: An Exit/Entry 2 Entry Time of 30 sec. will automatically be programmed.



(Direct Entry)

50 mS Loop Response Zones *(New Program Only)*
- Enter the zone numbers of zones to be have a 50mS loop response.
- Valid entries are from 01 to 8. Directly enter each zone number, including leading zeros.
- Press [ENTER] to save and then repeat for any additional zone(s), press the NEXT/YES button to proceed. **Note: 750mS is required for Loop Response time in UL installations.**



(Direct Entry)

Aux Output Activated on Alarm Zones *(New Program Only)*
- Enter the zone numbers of zones to activate the PGM2 Output upon alarm.
- Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros.
- Press [ENTER] to save and then repeat for any additional zone(s), Press the NEXT/YES button to proceed.

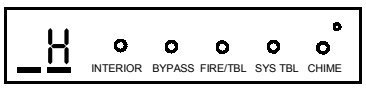
NOTE: A PGM2 Output Timeout of 15 Minutes will automatically be programmed.

(Direct Entry)

Sensor Watch Zones *(New Program Only)*

- Enter the zone numbers of zones to be Sensor Watch zones.
- Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros.
- Press ENTER to save and then repeat for any additional zone(s), press the NEXT/YES button to proceed.

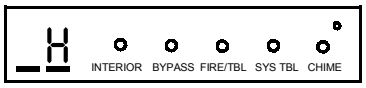
NOTE: A Sensor Watch Time of 24 hours will automatically be programmed.



(Direct Entry)

Keypad Sounder On Alarm Zones *(New Program Only)*

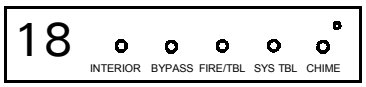
- Enter the zone numbers of all zones to activate the Keypad Sounder upon alarm.
- Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros.
- Press ENTER to save and then repeat for any additional zone(s), press the NEXT/YES button to proceed.



(Direct Entry)

Auto Bypass Re-entry Zones *(New Program Only)* ***(Not evaluated by UL)***

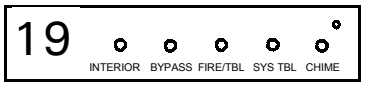
- Enter the zone numbers of zones to be Auto Bypass Re-entry zones.
- Valid entries are from 01 to 32. Directly enter each zone number, including leading zeros.
- Press ENTER to save and then repeat for any additional zone(s), press the NEXT/YES button to proceed.
- Auto Bypass Re-entry Zones allow the system to be armed with the zone faulted but come back into the system (armed) when the zone is subsequently closed.



(Press YES or NO)

Enable No EOLR Zones *(New Program Only)*

- Press the NEXT/YES button to program all zones except 24 Hr & fire zones for No End Of Line Resistor. Press the PRIOR/NO button to continue.
- Do not program this feature for UL Installations.

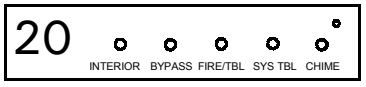


(Press YES or NO)

Enable Telco Line Fault Test?

- Press the NEXT/YES button to enable Telco Line Fault Test.
- Press the PRIOR/NO button to continue.

NOTE: There is a preset 60 second Telco Line Fault Test Delay.

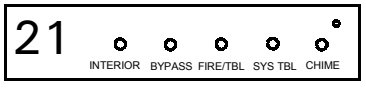


(Press YES or NO)

Enable Burg Output Chirp on KeyFob?

- Press the NEXT/YES button to enable Burg Output Chirp on KeyFob Arm / Disarm.
- Press the PRIOR/NO button to continue.

NOTE: The Burg Output will chirp once on Keyfob Arm and twice on Keyfob Disarm.



(Press YES or NO)

Enable SIA CP-01?

- Press the NEXT/YES button to enable.
- Press the PRIOR/NO button to continue.

The SIA CP-01 Features are designed to reduce the incidence of false alarms. **NOTE:** Do not enable unless reporting, otherwise system trouble *Fail to Communicate* may occur.

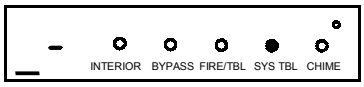
(Direct Entry)

Number of Keypads
Directly enter the total number of Keypads to be installed. Valid entries are from 01 to 07. Directly enter the number of keypads, including leading zeros. Use number buttons [1] through [9 P].

NOTE: Press [0] for a zero. Press [ENTER] to save. Press the NEXT/YES button to proceed.

(Direct Entry)

Central Station Receiver 1 Telephone Number
Using number buttons, enter telephone number of up to 16 digits including prefix letters, if necessary, for receiver 1. Use number buttons [1] through [9 P] for digits 1–9; press [*] [0] for a zero and [*] [1] through [*] [5] for letters B–F, respectively. **NOTE:** Pre-Dial Delay = "D"; Dial-Tone Detection = "E". Pressing [0] will produce a blank space (•). Press [ENTER] to save. Press the NEXT/YES button to proceed. **NOTE:** Central Station Receiver 2 and 3 Telephone Numbers can only be entered in Direct Address Programming. See CS Receiver Options.



(Direct Entry)

Central Station Receiver 1 Account Number
Enter an account number of up to four digits. Use number buttons [1] through [9 P] for digits 1–9. **NOTE:** Press the [0] button for a zero and press the [*] [0] buttons for a blank space (•). Press [ENTER] to save. Press the NEXT/YES button to proceed. **NOTE:** Central Station Receiver 2 and 3 Account Numbers can only be entered in Direct Address Programming. See CS Reporting Options.

(Direct Entry)

Central Station Receiver 1 Format
From the table below, enter the central station's receiver format. Use number buttons [1] through [9 P]. **NOTE:** Press the [0] button for a zero and press [*] [0] for a blank space (•). Press [*] [1] through [*] [4] for letters B–E, respectively. Press [ENTER] to save. Press the NEXT/YES button to proceed.

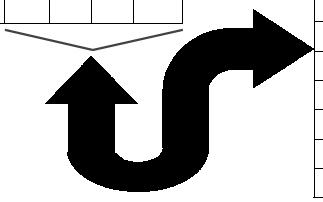
Enter User Codes *(Press the* ([MENU]) *button to set cursor)*
Enter up to 32 User Codes with User Options for each code. Refer to the tables below for available data entries for User Options.

☞ Press [MENU] once to set cursor to the User Number and enter the desired User Number. Press [MENU] once again to set the cursor to the User Code. Use the number buttons [1] through [9 P] to enter a code from 3 to 6 digits. Enter up to 6 digits (4 digits are recommended) in the first six boxes from left to right for each user code. Valid entries are: 0-9. **Note:** Press [0] for a zero. No blank spaces in between; leave blank (•) any trailing boxes. If an "Ambush Prefix" (Address 0495) is entered, *do not* program the first two digits of ANY User Code as the same digits entered for the "Ambush Prefix".

☞ If the programmed code is less than 6 digits, press [MENU] to set the cursor to USER OPTIONS.

☞ Refer to the tables on the next page for the available User Option data entries.

USER CODE (UP TO 6 DIGITS)						AREA 1 OPTIONS	AREA 2 OPTIONS



USER OPTIONS		
DATA ENTRIES		OPTION ENABLED
L	R	
blank(•)	blank	Disabled
blank(•)	1	Arm/Disarm
blank(•)	2	Arm Only
blank(•)	3	Service
blank(•)	4	Access
blank(•)	5	Ambush
blank(•)	Add 8	* User Program

CODE TYPE	EXPLANATION
Disabled	User Code not active.
Arm/Disarm	Allows User Code to arm/disarm.
Arm Only	Prevents User Code from disarming.
Service	A Service Code has restricted arm/disarm rights; if an area is armed with a Service Code, a "SERVICE ON" appears on the GEM-RP2ASe2 keypad and the area can be disarmed with any valid User Code, including a Service Code. If the area is armed with OTHER than a Service Code, it CANNOT be disarmed with a Service Code. This is typically used to allow tradesmen access to premises under control of the owner.
Access	This is normally used to activate a door strike. Also program "Access Control on PGM2 Output" (Address 0719) and "PGM2 Output Access Control Timeout" (Address 0711).
Ambush	This code is entered by user to disarm and activate an "Ambush Alarm", causing a report to be sent to central station. Also program Ambush to report to C.S., Report Code, Sub I.D.
* User Program	User Program Option is enabled for Keypad 1 only, wherever it is connected. To enable User Program Option for any user add 8 to the data entry Option (see example). Then, User Programming can be performed only at Keypad 1 by a user code with user program enabled.

Related User Options: "Enable Global Ambush Code" (Address 0720) & "Global Ambush Code" (Address 1054).

USER OPTIONS: Area 1 and 2 options for 32 Users:

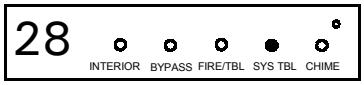
☞ Select the desired options from the table shown and enter in the remaining two boxes for each user code.

Example: Program a code of "1234" for user 02, with Area 1 options of "Arm/Disarm" and "User Program":

With "27" displayed in keypad window, press [MENU], [0] [2] (User 2), [MENU] [1] [2] [3] [4], [*] [0] [*] [0] (User Code), [0] [9 P] (User Area 1 options), [0] [0] (User Area 2 Options), and [ENTER] (save).

Notes: (1) For **User Code**, press [*] [0] for Blank Space; (2) For **User Options**, press [0] for Blank Space.

CHANGING OR CANCELING A CODE: To change any code, merely program over the existing code as described above and press [ENTER] to save. Similarly, to cancel a code, blank out each number of the code and press [ENTER] to save. **Note:** Duplicate User Codes are not allowed; therefore a duplicate Code entered in the LCD Window will erase when [ENTER] is pressed.



RF Transmitter Points *(Press the* ([MENU]) *button to set cursor)*

(For wireless systems only. Also see Quick Method, which follows).

For each transmitter (key fob transmitters also), enter the zone number (01–48) to which the transmitter will be mapped, the 6-digit RF ID#: 1-digit checksum number printed on the transmitter and box, the point number (1–4); *enter "9" for unsupervised* (all points). **NOTE:** When programming the ID Code number, "A" = [*] [0]; "B" = [*] [1]; "C" = [*] [2]; "D" = [*] [3]; "E" = [*] [4]; "F" = [*] [5]. Press [ON OFF] to save. Press NEXT ([INTERIOR]) to proceed.

Quick Method.

If a receiver is already installed in the panel, Napco transmitter wireless points can be programmed automatically ("enrolled") using the following procedure. **NOTE:** The transmitter point will be enrolled only if the signal strength is 3 or greater.

1. Enter the zone number to which the transmitter point will be mapped.
2. Press the [BYPASS] button to enter the Enroll Mode. The red and green LEDs on the keypad will flash and the window will display as shown at left.
3. Open the loop of the point that is to be programmed (GEM-TRANS2 or GEM-TRANS4 only).
4. Install the transmitter battery. The keypad will beep to indicate that the point has been successfully enrolled. Multi-point transmitters can be mapped to successive zones simultaneously (Example 1) or to selected zones point by point (Example 2).

Example 1. *A 4-point transmitter has the RF ID number 410078:1. Map the first three points to Zones 11–13, respectively.*

1. Enter the Enroll mode as described in step 2 above.
2. Enter Zone "11".
3. Open the loops of points 1, 2 and 3.
4. Install the transmitter battery. The keypad will beep 3 times to indicate that three points have been programmed.

☞ Transmitter 410078:1, point 1 will be mapped to Zone 11.

☞ Transmitter 410078:1, point 2 will be mapped to Zone 12.

☞ Transmitter 410078:1, point 3 will be mapped to Zone 13.

The keypad will now display Zone 13, the last zone enrolled.

Example 2. *A 2-point transmitter has the RF ID number 287613:1. Map point 1 to Zone 6 and point 2 to Zone 9.*

1. Enter the Enroll mode as described above.
2. Enter Zone "06".
3. Open point-1 loop.
4. Install the battery. The keypad will beep once to indicate that one point has been programmed. (Transmitter 287613:1, point 1 will be mapped to Zone 6).
5. Enter Zone "09".
6. Close point-1 loop and open point-2 loop.
7. Remove the transmitter battery, then re-install it. The keypad will beep once to indicate that one point has been programmed. (Transmitter 287613:1, point 2 is mapped to Zone 9).

KEY FOB ZONE ASSIGNMENT: Key fobs can also be assigned to zones to allow multiple wireless panic buttons on one alarm system, each reporting to a central station, a pager or having a description on the keypad that describes the person holding the key fob, the location where the person holding the key fob is stationed, or the special purpose of the key fob button being depressed. *See the next page on key fob Zone Assignment.*

Key Fob Transmitters *(Press [MENU] to set cursor).*

Keyfobs can be programmed as "Arm/Disarm" devices (refer to WI752).
For each Key Fob Transmitter, enter:

☞ The Key Fob Transmitter number (01–08).

☞ Area number to which transmitter is assigned (1 or 2); enter 0 to disable keyfob.

☞ The 6-digit RF ID # printed on the transmitter (enter all numbers and/or letters, including leading "0"s, if any).

☞ 1-digit checksum number printed on the transmitter (enter all numbers and/or letters, including leading "0"s, if any).

DATA ENTRY	AUX 1/AUX 2 OPTIONS
0	None
1	Relay Group 1 Toggle
2	Relay Group 2 Toggle
9	Panic
A	Auxiliary
B	Instant
C	PGM2 Output Toggle
D	Access on PGM2 Output
E	Arm Stay
F	Interior Button

☞ Aux-1 Option (see key fob aux 1 & aux 2 options).

☞ Aux-2 Option (see key fob aux 1 & aux 2 options).

Press [ENTER] to save. Press the NEXT/YES button to proceed.

NOTE: Key fobs 1-8 report openings and closings as Users 25-32.

Note: If the Key Fob is converted for Two Button "Emergency Use" (by cutting an internal jumper), both top or bottom buttons must be depressed to activate an alarm. In this case, the Aux-1 and Aux-2 cannot be programmed.

Key Fob Transmitters as Zone Input Devices *(refer to display above: press the PRIOR/NO button to go backwards).*

Each of the 4 key fob buttons can be assigned to a zone. For example, On button = point 1; Off button = point 2; A1 = point 3; A2 = point 4. Up to 32 key fobs (using 1 button) or 16 key fobs (using 2 buttons) or 8 key fobs (using all 4 buttons) or any combination up to a maximum of 32 controlled zones can be assigned, providing multiple wireless panic buttons on a system, each reporting to the Central Station or a pager and/or annunciating on a keypad the key fob zone number with description/location. *To assign a key fob to a zone:* program the key fob as you would a transmitter, entering the key fob's ID code, check sum and point number at the appropriate zone. The "Quick Method" is not allowed. The zone may be hardwired to a sensor as well as assigned to a key fob (either one will activate the zone alarm output). **NOTE:** If assigning a key fob to a zone, the "ON/OFF" buttons on the key fob will no longer arm/disarm the system. The key fob is converted to a "panic only" device.

ZONE DESCRIPTIONS: GEM-RP3DGTL cannot be used to enter Zone Descriptions. To enter Zone Descriptions, you must use the *GEM-RP1CAe2 Keypad or the Napco Quickloader Software.*
DATE ENTRY: GEM-RP3DGTL cannot be used to enter the date. To enter Date, you must use the *GEM-RP1CAe2 Keypad (Version 5 or later) or the Napco Quickloader Software.*
TIME ENTRY: GEM-RP3DGTL cannot be used to enter the time. To enter Time, you must use the *GEM-RP1CAe2 Keypad (Version 5 or later) or the Napco Quickloader Software.*

(Direct Entry)

Dealer Code

Directly enter the Dealer Code, including leading zeros. Use the [1] through [9 P] buttons. **NOTE:** Press [0] for a zero. Press [ENTER] to save.

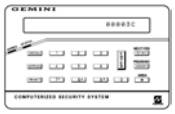
Re-enter the Dealer Code to verify the previous code. Press [ENTER] to save. Press the NEXT/YES button to proceed. **NOTE:** The Dealer Code can be two or more digits (up to 6 digits).

EXIT DEALER PROGRAM MODE: This completes the custom default program. Press [RESET] to enter the Direct Address Program Mode for further programming or press [RESET] once again to end all programming and resume normal keypad operation.

CLEAR PROGRAM: Should it be necessary to create a new custom default program, (a) from the Dealer Program Mode, press [RESET] to enter the Address Program Mode; (b) access Location 1197 (Clear Program) or 1198 (Cold Start); (c) press [ENTER] and then (d) press [RESET] to exit the Dealer Program Mode. A System Trouble Condition will occur. Press [RESET] to silence the keypad.

This Page Intentionally Left Blank

DIRECT ADDRESS PROGRAM MODE



This is an extension of the Dealer Program Mode. This method of programming is used in conjunction with the Keypad Programming Worksheets that follow. Refer to these worksheets to identify the 4-digit location (address) of the feature to be programmed. An illustrative example is provided on the next page.

ADDRESS LOCATIONS	DATA ENTRY LOCATIONS	
	LEFT DIGIT	RIGHT DIGIT
0000	3	C

0000 TO 1198

HEXADECIMAL DATA:
- **BLANK (•) = No Options**
- **1 to 9 = Entries 1 to 9**
- **0 = Entry of 10**
- **B to F = Entries 11 to 15**

KEYPAD PROGRAMMING OVERVIEW

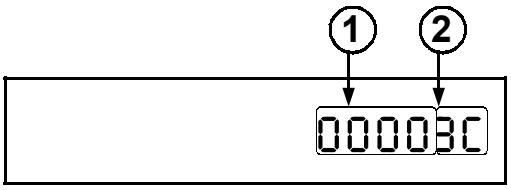
Direct Address Programming allows you to go directly to the address locations and change the data entries to customize your control panel options. Whereas the Easy Menu Program Mode is a simple quick start guide with limited options, the Direct Address Program Mode is more flexible allowing you to change all the options.
It consists of multiple address locations with two data entry locations each (left and right) as shown in the adjacent diagram.

ACCESSING DIRECT ADDRESS PROGRAM MODE

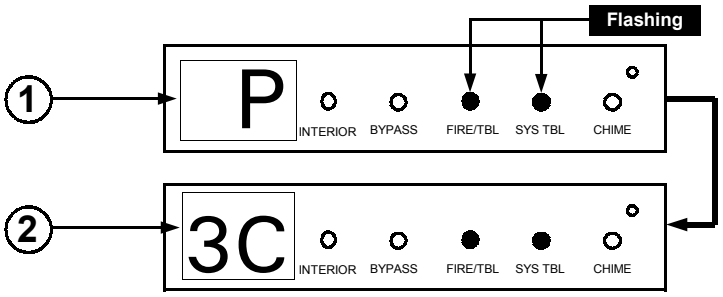
1. ***Press*** [ ][ ][ ][ ][ ][ ] [MENU]
   Dealer Security Code (Default is 456789)
2. ***Press the PRIOR/NO*** ([AWAY]) ***button*** **until:**
   "TURNON PROG Y/N" **(GEM-RP2ASe2/GEM-K2AS)**
   --or--
   "17" **(GEM-RP3DGTL/GEM-K3DGTL or GEM-RP4RFC/GEM-K4RF) appears on the keypad display.**
3. ***Press the NEXT/YES*** ([STAY]) ***button*** **to enter Dealer Program Mode.**
   (The panel and keypad version appears briefly on the keypad display).
4. ***Press*** [RESET] **to exit Easy Menu Driven Program Mode & enter Direct Address Program Mode.**

   (For keypad display examples when in Program Mode, see next page).

KEYPAD ADDRESS PROGRAM MODE DISPLAY

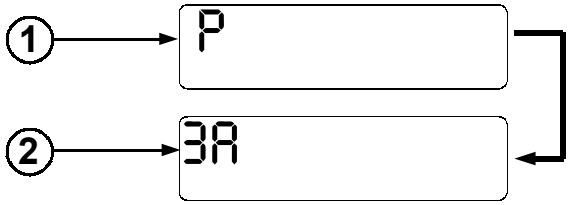


GEM-RP2ASe2/GEM-K2AS Keypads



Press [MENU] followed by (1) the 4 digit address location, and (2) the corresponding data shown.

GEM-RP3DGTL/GEM-K3DGTL Keypads



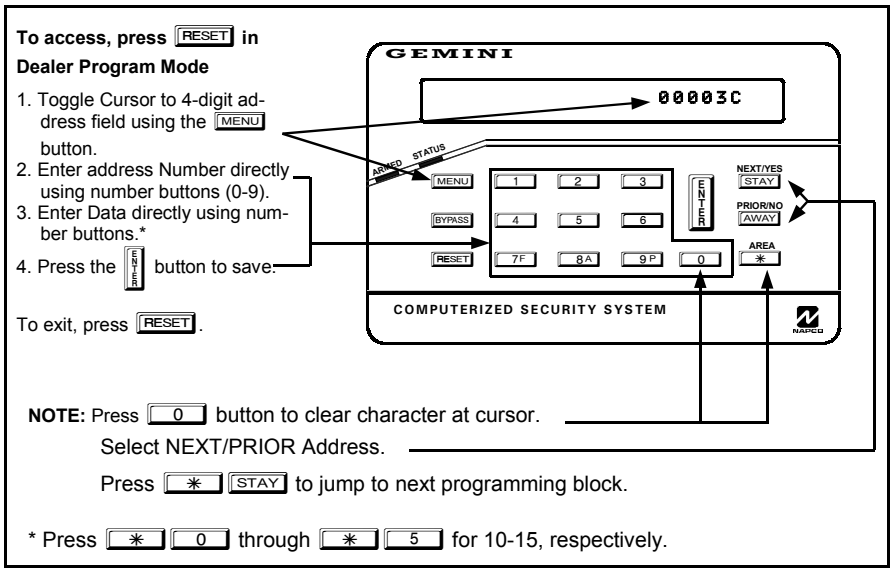
Press [MENU] followed by (1) the 4 digit address location, and (2) the corresponding data shown. **Note:** A long beep sounds when in Address Program Mode.

GEM-RP4RFC/GEM-K4RF Keypads

(1) = ADDRESS LOCATION (2) = DATA ENTRY LOCATION (Left and Right Digits)

DIRECT ADDRESS PROGRAM MODE KEYPAD COMMANDS

A. GEM-K2AS (and GEM-RP2ASe2) Keypad

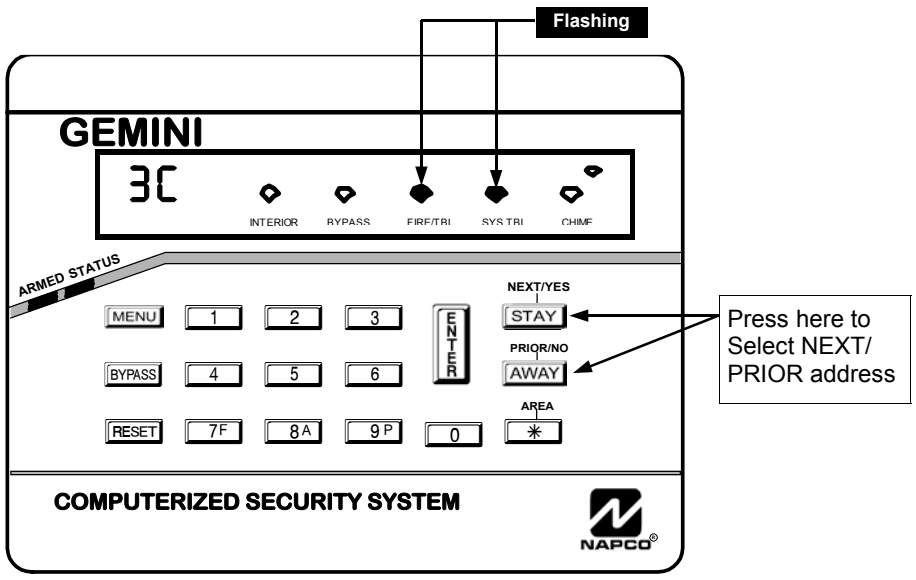


B. GEM-K3DGTL/GEM-RP3DGTL and GEM-RP4RFC/GEM-K4RF Keypads

To access Direct Address Program Mode, press [RESET] in the Easy Menu Mode.

1. Press [MENU].
2. Enter the 4 digit Address location directly using number buttons (0-9).
3. Enter the 2 digit data directly using number buttons (0-9).
4. Press [ENTER] to save.

To exit, press [RESET].



NOTE: "A" = [✳] [0]; "B" = [✳] [1]; "C" = [✳] [2]; "D" = [✳] [3]; "E" = [✳] [4]; "F" = [✳] [5]. Press [0] for a zero or to clear.

Example: GEM-RP2ASe2 / GEM-RP3DGTL / GEM-RP4RFC--Direct Address Programming

Program Zones 6, 7 and 8 as Exit/Entry Follower Zones.

DETERMINE THE DATA ENTRIES

☞ 1. Referring to ZONE FEATURES in the Programming Worksheets that follow, Exit/Entry Follower for Zones 5 through 8 are located at address 0506, left digit. Circle ✎ the data values for Zones 5–8.

☞ 2. Add the data values for Zones 6, 7 and 8: 2+4+8=14. From Tables 1 and 2, "14" (E) is entered as press [✳] [4]. The right digit (for Zones 1 through 4, none of which are Exit/Entry Follower Zones) is entered as a blank (•).

ZONE OPTION	ZONES LEFT DATA VALUES SUM = 14 (CIRCLE ✎)				ADDRESS 0506			ZONES RIGHT DATA VALUES SUM = 0 (CIRCLE ✎)			
	ZN08	ZN07	ZN06	ZN05	L	ADDR	R	ZN04	ZN03	ZN02	ZN01
EXIT/ENTRY FOLLOWER	⑧	④	②	1	E	0506	BLANK (•)	8	4	2	1

ENTER DATA ✎

PROGRAM THE DATA ENTRIES

1. Enter the panel's Dealer Security Code (Address 0500), then press [MENU].
2. Answer NO ([INSTANT]) to all questions until "ACTIVATE PROGRAM Y/N" is displayed; then press the NEXT/YES button. **NOTE:** If you pass "ACTIVATE PROGRAM", scroll backward using [BYPASS].
3. Press [RESET] to enter the Address Program Mode. Address "0000" will display.
4. Press [0] [5] [0] [6] to access Address 0506. *The data for both digits will display and the cursor will advance to the data field.*
5. Press [✳] [4] to enter an "E" in the left digit and press [0] to enter a blank (•) in the right digit.
6. Press [ENTER] to save. Address 0506 is now programmed with "E •".
7. Enter another 4-digit address to continue programming or press [RESET] to exit and resume normal keypad operation.

The displays shown on the previous pages will appear after a brief delay.

☞ Use [MENU] to toggle the cursor between the 4-digit address field and the data entry locations.

☞ Enter the address directly using the number buttons.

☞ The contents of the address will be read automatically, along with the feature name and programming information. The cursor will advance to the data field. Enter the required data directly using the number buttons.

☞ Press [ENTER] to save the contents of each address.

EXIT DIRECT ADDRESS PROGRAM MODE: When done, press [RESET] to exit and resume normal keypad operation.

CONVENTIONS USED IN THIS MANUAL

The Keypad Programming Worksheets in the back are provided as an address-programming reference to help the installer modify his custom default program or to make minor field alterations to an existing panel program. It is recommended that the panel be uploaded to NAPCO's PCD-Windows software following any keypad programming and that the PCD3000's error-check feature be utilized to reduce the possibility of programming omissions or conflicts.

Note: Most of the addresses shown comprise two data entry locations, left and right digits. Program the left digits on the left data-display segment, and the right digit on the right segment. For those addresses having only one programmable nibble, program the right segment only; the left segment should display a blank (•).

Keep the Keypad Programming Worksheets on file for future reference.

General Programming Steps

☞ 1. Contact the central station to ascertain receiver format, data format, event codes, subscriber numbers and telephone number(s).

☞ 2. Select the desired features by circling the respective "address" boxes. Refer to the Programming Options and Worksheets for guidance in selecting the "data" (1,2,4,8) to be entered into those boxes.

☞ 3. Program the data entered in the boxes on the worksheets into the respective addresses. The display will show the entry numerically, but will display "0" for the number 10, and letters "B", "C", "D", "E", and "F" for the numbers 11 through 15, respectively. To program a 10, press [✳] [0]. To program 11 through 15, press [✳] [1] through [✳] [5], respectively.

DATA ENTRY SELECTIONS (BINARY VALUE CIRCLED)				ENTRY TOTAL	PRESS	KEYPAD DISPLAYS
8	4	2	1	blank	[0]	•
8	4	2	①	1	[1]	1

Table 1 (above). Determining data entry for a location (each "nibble"). Numbers in parentheses indicate data for selected zones or features. (See Programming Worksheets that follow).

NOTE: See the Direct Address Programming Example on the previous page.

SYSTEM DELAYS & TIMEOUTS (ADDRESS 0000-0002, 0711, 0715, 1059 & 1179)

EXIT DELAY (sec.)	ADDRESS 0000 LEFT	RIGHT

[Default = 3 C]

ENTRY DELAY 1 (sec.)	ADDRESS 0001 LEFT	RIGHT

[Default = 1 E]

ENTRY DELAY 2 (sec.)	ADDRESS 0002 LEFT	RIGHT

[Default = 1 E]

PGM2 Output Access Cntrl Timeout (sec.)	ADDRESS 0711 LEFT	RIGHT

[Default = blank (•) blank (•)]

ABORT DELAY (sec.)	ADDRESS 0715 LEFT	RIGHT

[Default = 1 E]

DATA ENTRIES LEFT	RIGHT	DELAY/ TIMEOUT
blank (•)	blank (•)	0 sec.
blank (•)	F	15 sec.
1	E	30 sec.
2	D	45 sec.
3	C	60 sec.
5	0	90 sec.
7	8	120 sec.
↓	↓	↓
F	F	255 min.

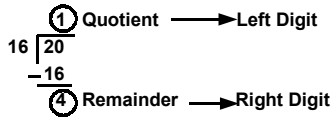
☞1. Select delay/timeout (0-255 sec.) from the table shown.

☞2. Enter in corresponding address locations above (left and right digits).

☞3. For a desired delay/timeout not listed do the following:

A. Choose a desired delay/timeout, ex: 20 sec.
B. Divide it by 16

☞4. Press ENTER or ON/OFF to save.



EXIT/ENTRY DELAYS: Apply only to zones programmed with the following options "Exit/Entry 1, Exit/Entry 2, Exit/Entry Follower". For UL Installations, the maximum exit delay is 60 seconds and the maximum entry delay is 45 seconds. **NOTE:** Sensor Watch Time Options are similar to above table, except in hours.

Sensor Watch Time (Hrs.)	ADDRESS 1059 LEFT	RIGHT

[Default = 24 HRS = 1 8

Report Cancel Window (min.)	ADDRESS 1179 LEFT	RIGHT

[Default = blank (•) blank (•)]
See **Maximum Program Time** table (below)

PROGRAMMING TIMEOUTS: Either use the tables provided or calculate your own timeout using the steps indicated. WARNING: Timers have uncertainty of +/-1sec, so a "time" of 1 second may actually timeout IMMEDIATELY.

Maximum Program Time		
Address	Units	Max Prog Time
1179	VERSION 10 - MIN VERSION 9A - SEC	VERSION 10 - 254 MIN VERSION 9A - 254 SEC

SYSTEM DELAYS & TIMEOUTS (ADDRESS 0716 & 0717)

CHIME TIMEOUT (¼sec.)	ADDRESS 0716 LEFT	RIGHT

[Default = 2 sec. = blank (•) 8]

AC Fail Report Delay (min.)	ADDRESS 0717 LEFT	RIGHT

[Default = 60 mins. = 3 C]

DEFAULTS: The defaults shown on this page and on the following pages are automatically set after exiting the Easy Menu Driven Mode.

CHIME TIMEOUT OPTIONS DATA ENTRIES LEFT	RIGHT	TIMEOUT

blank (•)	5	5
blank (•)	6	6
blank (•)	7	7
↓	↓	↓
F	F	255 min. = 4 Hr., 30 min.

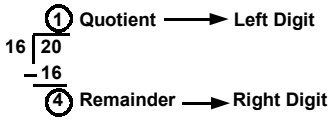
☞ 1. Select delay/timeout from the table shown.

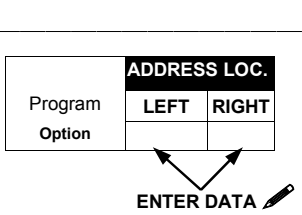
☞ 2. Enter in corresponding address locations above (left and right digits).

☞ 3. For a desired delay/timeout not listed do the following:

A. Choose a desired delay/timeout, ex: 20
B. Divide it by 16

☞ 4. Press ENTER or ON/OFF to save.





PROGRAMMING STEPS:

1. Lookup desired Programming Option by Address Location (highlighted in black).

2. Select the programming option data entry from the tables shown.

3. Enter the selected data entry in the boxes shown.

4. For more information on a programming option refer to the Glossary at the end of this manual.

SYSTEM OUTPUT TIMEOUTS (ADDRESS 0710, 0712, 0713 & 0714)

PGM2 Output Timeout (min.)	ADDRESS 0710 LEFT	ADDRESS 0710 RIGHT

[Default = blank (•) blank (•)]

Alarm Output Timeout (min.)	ADDRESS 0712 LEFT	ADDRESS 0712 RIGHT

[Default = 15 mins. = (blank) F]

Pulse Alarm Output Timeout (min.)	ADDRESS 0713 LEFT	ADDRESS 0713 RIGHT

[Default = 15 mins. = (blank) F]

PGM1 Output Timeout (min.)	ADDRESS 0714 LEFT	ADDRESS 0714 RIGHT

[Default = blank (•) blank (•)]

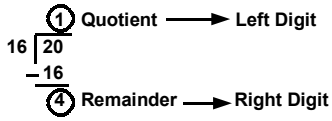
DATA ENTRIES LEFT	DATA ENTRIES RIGHT	DELAY/ TIMEOUT
blank (•)	blank (•)	0 min.
blank (•)	1	1 min.
blank (•)	2	2 min.
blank (•)	3	3 min.
blank (•)	4	4 min.
blank (•)	5	5 min.
blank (•)	6	6 min.
1	blank (•)	16 min.
↓	↓	↓
F	F	255 min.

☞ 1. Select delay/timeout (0-255 min.) from the table shown.

☞ 2. Enter in corresponding address locations above (left and right digits).

☞ 3. For a desired delay/timeout not listed do the following:
A. Choose a desired delay/timeout, ex: 20 min.
B. Divide it by 16

☞ 4. Press [ENTER] or [ON/OFF] to save.



OUTPUT TIMEOUTS: If a timeout of "0 min." is selected, then the output will remain active (ON) until the system is reset or disarmed. For UL Residential Installations, the minimum timeout is 4 minutes. Not UL listed for Commercial Installations.

DOWNLOAD/CALLBACK OPTIONS (ADDRESS 1183 & 0236-0255)

No. Rings Before Pickup	ADDRESS 1183 LEFT	ADDRESS 1183 RIGHT
	blank (•)	

[Default = blank (•) blank (•)]

NUMBER OF RINGS BEFORE PICKUP: Enter the number of rings before automatic pickup by the control panel when downloading from a computer (see Glossary at the back for more information).

☞ 1. Enter in right digit only (left digit is not used).

☞ 2. Valid entries are: 3-9, 0 = 10, B = 11, C = 12, D = 13, E = 14, F = 15

NOTE: Default is 15 Rings. Dark shaded data shows option not available.

☞ 3. Press [ENTER] or [ON/OFF] to save.

CALLBACK Telephone Telephone (Digits 1-20)	ADDRESS 0236-0255 (RIGHT DIGITS 1-20)																			
	0236	0237	0238	0239	0240	0241	0242	0243	0244	0245	0246	0247	0248	0249	0250	0251	0252	0253	0254	0255
	R	R	R	R	R	R	R	R	R	R	R	R	R	R	R	R	R	R	R	R

[Default = blank (•) for all digits 1-20]

CALLBACK TELEPHONE NUMBER: Enter telephone number to be used when downloading from a computer (see Glossary at the back for more information).

☞ 1. Enter in right digit only (left digit is not used).

☞ 2. Enter up to 20 digits from left to right. **NOTE:** Leave trailing boxes blank (•). For a zero, press [*] [0].

☞ 3. Valid entries are: 1-9, B = [*] button, C = [#] button, D = 3 sec. pause, E = Wait for dial tone, F = ignore location.

☞ 4. Press [ENTER] or [ON/OFF] to save.

PAGER FORMAT OPTIONS (ADDRESS 0256 & 0257)

Leading Digits for Pager Format (1st Digit)	ADDRESS 0256 LEFT	ADDRESS 0256 RIGHT
	blank (•)	

Leading Digits for Pager Format (2nd Digit)	ADDRESS 0257 LEFT	ADDRESS 0257 RIGHT
	blank (•)	

[Default = blank (•) blank (•)]

LEADING DIGITS FOR PAGER FORMAT: In Pager Format reporting, the message typically begins with "00". However, for some pager services, this will cause the Pager's Voice Mail feature to activate. This option allows you to program these digits to any number desired. A typical Pager report is "003 22 1234", where 3 is the Event, 22 is the zone, and 1234 is the Subscriber ID number. For example, if the Leading Digits are programmed as "98", the Pager report will now appear as "983 22 1234". **NOTE:** See CS Receiver Options to select Pager Format.

☞ 1. Enter in 1st and 2nd Leading Digits in right digit only (left digit is not used) as shown.

☞ 2. Valid entries are: 0-9.

☞ 3. Press [ENTER] or [ON/OFF] to save.

blank (•)	C	360 min.
blank (•)	D	390 min.
blank (•)	E	420 min.
blank (•)	F	450 min.

RF SUPERVISORY TIMERS: RF Supervisory Timers may be programmed for each type of transmitter used. A transmitter will send a transmission every time it is tripped, when there is NO activity, the transmitter sends a status transmission about once an hour. If the receiver does NOT receive ANY signal (a trip or a status) from a transmitter in the time specified for transmitter type, a system trouble "WIRELESS TROUBLE/E04-NN SERVICE" will be displayed at the keypad.

☞1. Select timer delay from the table shown. Timers are programmed in increments of 30 minutes each. Valid entries are [blank (•)3]-[blank (•)F], 90 minutes-450 minutes.

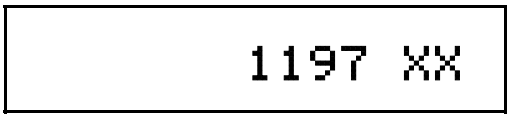
☞2. Enter in corresponding address locations above right digit only (left digit is not used).

☞3. Press ENTER or ON/OFF to save.

NOTE: These timers apply only to Supervised RF Transmitters (see RF Transmitters in Easy Menu Driven Mode Programming).

CLEAR PROGRAM OPTIONS (ADDRESS 1197 & 1198)

GEM-RP1CAe2 Keypad



GEM-RP2ASe2 Keypad

Clear Dealer Program (Erases Dealer Program)

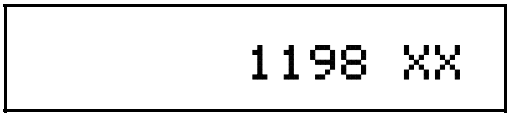
WARNING

This *erases the dealer program*. Use this feature to start a customized default program. Program Data and System Status Memory is erased where Scheduled Data and Zone Descriptions are maintained.

Access address 1197, then press the ENTER button. Data entry is not allowed.

NOTE: Enter Easy Menu Driven Program Mode to program system again.

GEM-RP1CAe2 Keypad



GEM-RP2ASe2 Keypad

Cold Start (Erases Entire Program)

WARNING

This erases the entire program including Dealer Program by erasing Program Data, Zone Description Data and System Status Data (similar to a new panel).

Access address 1198, then press the ENTER button. Data entry is not allowed.

NOTE: Some features (schedules) can only be programmed again with the Downloading Software.

USER PROGRAM MODE

PRELIMINARY INFORMATION

The User Program Mode is covered in detail in the operating instructions for the keypad in use.

- ☞ Only Keypad #1 may be used for programming, however this keypad may be located in any area.
- ☞ The Program Mode cannot be accessed while the communicator is transmitting except during the first three minutes after power-up.
- ☞ After entering codes or data, press the save ENTER button. *Data will not be stored into memory unless this button is pressed.*
- ☞ If the keypad is in the Program Mode and no activity is detected for longer than 4 minutes, a steady tone will sound.
- ☞ Press the RESET button to silence the sounder and exit the User Program Mode.

If a GEM-RP2ASe2 or GEM-K2AS keypad is used, configure address jumpers as Keypad #1 (see page 43, "Configuring the Keypads). Use the MENU or FUNCTION button to manually scroll the display at the end of each programming line.

NOTE: For ease of programming, it is recommended that a GEM-RP1CAe2 or GEM-K1CA be used as Keypad #1. (A new GEM-RP1CAe2/GEM-K1CA is automatically configured as Keypad #1). See Keypad Configuration Mode and WI897 for more information.

ACCESSING USER PROGRAM MODE

1. Press [ ][ ][ ][ ][ ][ ] MENU

New Panel (Default User Code = 123)

Existing Panel (Any Code with User Program Option Enabled)

2. Press AWAY **Until "TURNON PROG Y/N" (GEM-RP2ASe2/GEM-K2AS) or "?" (GEM-RP3DGTL/GEM-K3DGTL or GEM-RP4RFC/GEM-K4RF) appears on the LCD screen.**

3. Press STAY **To Enter User Program Mode.**

4. Press RESET **To Exit User Program Mode when finished.**

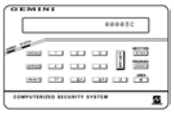
KEYPAD CONFIGURATION MODE



This section will focus on configuring the GEM-RP2ASe2/GEM-K2AS, GEM-RP3DGTL/GEM-K3DGTL and GEM-RP4RFC/GEM-K4RF Keypads. If there is more than one keypad in the system, only Keypad No. 1 may be used for programming. For ease of programming, it is recommended that a GEM-RP1CAe2 or a GEM-K1CA be selected as Keypad #1 (see WI995 for Programming Instructions).

KEYPAD INSTALLATION

Each keypad must be assigned an address number (1–7) and each requires its own configuration procedure (see CONFIGURING THE KEYPADS, which follows, and DIRECT ADDRESS KEYPAD AREA OPTIONS). At least 1 keypad must be used; only 1 is required for a single-area Commercial Burglary installation.

GEM-RP2ASe2/GEM-K2AS - are utility LCD keypads combining several preset LCD words with a limited message line. **NOTE:** Due to space constraints, available messages are abbreviated and will scroll automatically.

CONFIGURING THE KEYPADS

Configuring the GEM-RP2ASe2/GEM-K2AS, GEM-RP3DGTL/GEM-K3DGTL and GEM-RP4RFC/GEM-K4RF Keypads

Up to 7 GEM-RP2ASe2/GEM-K2AS, GEM-RP3DGTL/GEM-K3DGTL and/or GEM-RP4RFC/GEM-K4RF keypads may be connected to the panel (Keypads 1–7). Each must be configured for a keypad address. In addition, the keypad may be configured to disable (a) touchpad backlight; (b) LCD backlight; and (c) entry sounder. Keypads are configured by the proper selection of jumpers. Refer to the label on the circuit board insulation paper for jumper locations and a summary of settings.

KEYPAD ADDRESS

If more than one keypad is installed:

- ☞ Each must be assigned a unique address (that is, no two keypads may be numbered alike).
- ☞ Keypads must be addressed consecutively (that is, missing numbers are not permitted).
- ☞ Only Keypad No. 1 may be used for programming. (However, for ease of programming, it is recommended that a GEM-RP1CAe2/ GEM-K1CA be selected as Keypad #1).

KEYPAD NUMBER	KEYPAD ADDRESS SETTING			
	1	2	3	PARK
1	OFF **or ON***	OFF	OFF	**STORE SPARE JUMPER AT THIS POSITION**
2	OFF	**ON**	OFF	
3	**ON**	**ON**	OFF	
4	OFF	OFF	OFF	
5	**ON**	OFF	**ON**	
6	OFF	**ON**	**ON**	
7	**ON**	**ON**	**ON**	

Assign the keypad address number by selecting Jumpers J1–3 in accordance with the table at right.

***Note:** (1) Keypads are factory supplied with no jumpers installed and as such are automatically configured as Keypad No. 1. (2) Only one keypad in the system may be configured as Keypad No. 1, otherwise none will function.

TOUCHPAD BACK LIGHT

Cut Jumper A to disable touch pad backlighting to conserve 11mA standby current.

LCD BACKLIGHT

Cut Jumper B to disable LCD backlighting.

DISABLE SOUNDER

Cut Jumper C to disable the sounder. (Do not disable in UL applications.)
