MAGNUM 800 SYSTEM

TO SET NEW CODE NUMBERS:

Open the computer box (located in a closet somewhere in the home) and look in the upper left hand corner for the black ON & OFF switch. Push it to the right ...Go to the arming panel(or key pad) and put in your new arming code number. (It can be from 2 to 5 didgits) Then go back to the computer box and put the black button back to the center position.
THAT IS ALL YOU HAVE TO DO.....

TO REMOVE THE INTERIOR DEVICES FROM THE SYSTEM AUTOMATICALLY:

Before arming the system, just push the S button (located at the bottom center of the key pad) once, and then arm the system.

*** when you do press the S button , the lower amber light on the panel will light up to show that you have forced the interior devices from the system.

TO ACTIVATE THE EMERGENCY SIGNAL OR PANIC SIGNAL:

Simply depress both the Star (*) and Pound (#) buttons at the same time. One without the other, will do nothing. Both are located on the bottom row of your arming panel or key pad. To disengage the audible noise of the siren, simply put your arming code in until the siren shuts off.

IF YOU SIMPLY GO TO THE ARMING PANEL AND ARM YOUR SYSTEM,WITHOUT BYPASSING THE INTERIORS FIRST, EVERYTHING , INCLUDING THE INTERIOR DEVICES WILL BE ARMED. THAT IS NORMALLY THE WAY WE SUGGEST YOU DO IT WHEN LEAVING THE HOME EMPTY OF ALL PERSONS.
