WIZARD™ II

INTERACTIVE PHONE MODULE
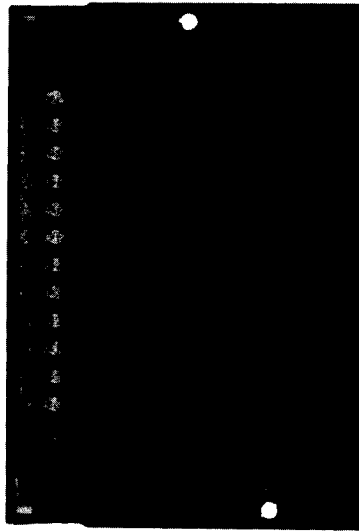

The Wizard II is an advanced, voice prompted, phone module that works with your Gemini™ Security System to make any phone a talking, interactive keypad!

When you add the Wizard II Talking Remote Controller to a Gemini System, any Touch-tone™ phone is an interactive "talking", "virtual keypad", even your cellular phone! The Wizard II enables you to easily control your security system wherever you may be, on the way home from work, school, or even when you are away on vacation anywhere in the world.

With the Wizard II, wherever you are, you're always in complete control of your security system and automated appliance(s).
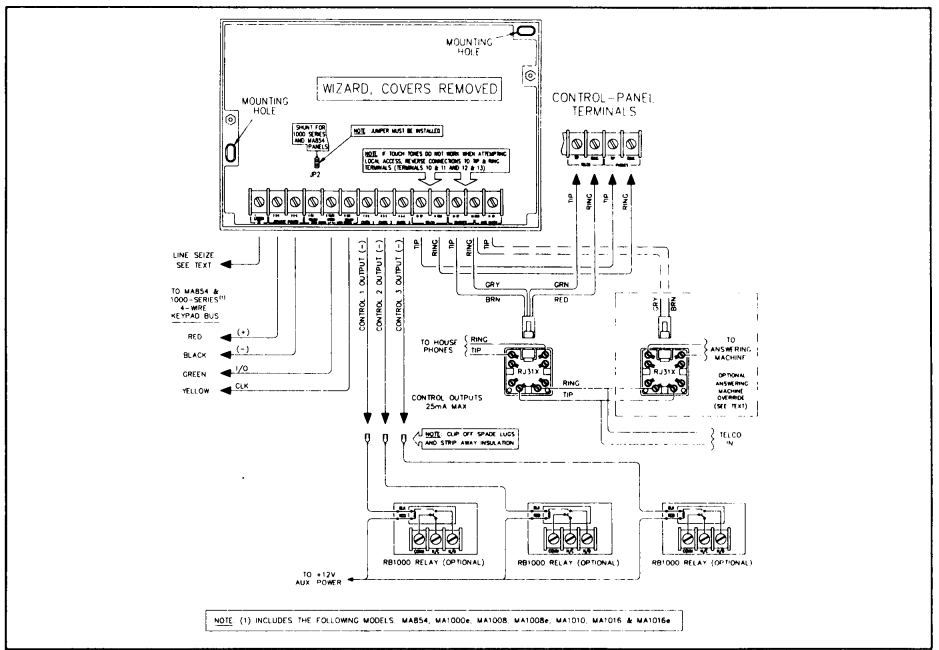

The Wizard II also features three individual home automation/appliance outputs for convenient optional control of lighting, air conditioning and heating systems, etc. You can easily phone into the Wizard II for complete "spoken" alarm system/appliance status reporting and control! The Wizard II's commands are easily activated by answering its YES or NO questions, using just 2 phone keys. The Wizard II fully supports Gemini Hardwire/Wireless Systems, and brings you the convenience of "remote controlling" your security system right to your fingertips!

• *NAPCO original Wizard, as above, for use with Magnum Alert® Systems, also available.*
