INTRODUCTION

**D8112 RESIDENTIAL CUSTOM TEXT BOOKLET  
For the Alpha Command Center**

This document contains special application bar codes. **Do Not Photocopy.**  
The manufacturer makes no warranty to the quality or performance of this product if photocopied.

## INTRODUCTION

This booklet contains several pages of bar codes used by the Omegalarm D5100 Bar Code Programmer to create custom displays for the Alpha Command Center. An Alpha custom display is an English language display of one to eight characters, usually formed to represent the name or title of a zone. Alpha displays are programmed into the D8112 Control/Communicator as described in the **8112:MAIN Program Entry Guide, Zone Function Codes & Alpha Custom Display Section**.

Alpha custom displays can be formed in two ways: either scan one character at a time using the Entry Bar Codes located on the front label of the Programmer, or scan an Alpha Text Bar Code in this booklet to form an entire entry at once.

The bar codes in this booklet are arranged in alphabetical order. The text above each bar code is the text that will appear in the Programmer's display when that bar code is entered. This is also the text that will appear in the Alpha display when the zone it represents is faulted.

The bar codes in this booklet cover Residential Alpha Text. See the **D8112 Commercial Custom Text Booklet for the Alpha Command Center** for more examples of custom Alpha text.
