

Wireless Keyfob for the Home

Honeywell's attractive, multi-functional WT400 Wall Transmitter can turn on alarms, control lights or operate garage doors with a single touch.

- Convenient fingertip control of lighting, relay or security system
- Uses four billion rotating encrypted codes for the ultimate in security
- Red LED blinks to confirm that signals have been sent
- Can be mounted on walls, placed on tabletops or hidden in drawers
- Installs quickly and easily and features single button programming
- Includes lithium coin cell battery
- Saves time in labor, costs and training

WT400 Thin-Style Wall Transmitter/Remote

www.streetsmarttechnologies.com

This easy-to-operate, quick-install wireless solution provides convenient fingertip control of up to six lighting, relay or automation devices.

The WT400 performs the same functions as other four-button keyfobs while providing the added convenience of two extra buttons to control lamp modules. It programs exactly like other Street Smart devices and is easy to attach—whether mounting on a standard electrical box or directly on the wall.

Contains user-replaceable coin-lithium battery

Easily controls lights and garage doors

Extra buttons make it easy to control lamp modules.
