ONE PROMISE

PERFORMANCE THAT PAYSSM

Our mission is simple – create profits for our customers. That's why we deliver products and services that give you a competitive edge and reduce your long-term costs.

Performance that PaysSM is our commitment to provide value throughout the useful life of our products – far beyond your initial product purchase. It's a dedication that Caddx shares with sensor-innovator Sentrol.

For starters, our False-Free Guarantee program offers a no-hassle performance warranty that covers you in the rare event of an unwanted alarm from any Sentrol sensor (or Caddx control.) We offer \$50 in product compensation

per sensor event. And if your Sentrol sensors are tied to a Caddx control panel, our support increases to \$150 per unwanted alarm and \$500 in the unlikely event of a non-detect incident.

Performance that PaysSM is also evident in our ongoing service and product support. Our renowned technical service and field training staff speaks your language and understands the tough environments you face. So we can solve your problem swiftly and give you the confidence to meet new challenges. Plus, you'll have an advantage with our professional end-user materials that make it easy for you to sell and keep customers longer.

ONE SOLUTION
