- Hardwire Expansion Up To 8 Zones.
- Supports SIA And Contact ID Communication Formats

NX-1308E KEYPAD

NX-108E KEYPAD

# The Power of One — from CADDX

### **Overview**

The NX-4 is a feature-rich, entry level security system. The NX-4 uses advanced technology for burglary, fire and environmental detection without the high cost of similar controls. The NX-4 is a flexible security system that is both easy to install and simple to use. With up to eight zones, the NX-4 is ideal for apartment, small residential and small commercial applications.

## **High Standards**

The panel comes standard with four hardwire zone inputs. Four programmable outputs can be set up to activate external devices during an alarm or other system event. The Modular design allows for complete integration of multiple systems within one enclosure. Adding more zones or expanding capability is fast and easy.

## **Easy Expansion**

Expand the NX-4 capabilities by adding one of a variety of optional expansion modules. Modular design allows NetworX modules to slide into the enclosure easily for quick installations.

The NX-320E Smart Power Supply and Bus Expander, the NX-508E Output Module and the NX-534E Two-Way Voice Module are just a few of the flexible options for the NX-4.

Expand the system even further with a phone interface/voice module for on-site and off-site system control using touchtone phones.

## **Effortless Programming**

Conduct quick and easy on-site programming with alphanumeric keypads and a menu driven text interface. Off-site programming is also available with the DL-900 software for Windows.
