EVEN NUMBERED….. Contains the event code sent for Contact ID or SIA and chosen from the list on pg 16.   **4+2 Format Note:** If 4+2 format is being used, the number programmed in this location will be sent as the upper hex digit. The digit should be from 1 to 15 when using 4+2 formats. The zone ID or user ID will be the lower hex digit of the zone that is in alarm.

ODD NUMBERED........The defaults listed below represent the five segments of each of those locations. Use the data from location 111 (table on pg 32 and instructions on pg 23)
