This course has been approved by the National Burglar and Fire Alarm Association for 6 CEU credits and by the State of Tennessee Alarm Systems Contractors Board for 8 CEU credits.

■ FÖNSAFE CERTIFICATION TEST ■

1. What radio frequency does the FÖNSAFE system use?
2. How many hours is the MCU backup battery rated for when it's fully charged?
3. How many sensor zones does the FÖNSAFE system have?
4. What is the purpose of the date code on the door/window sensor?
5. What is the primary advantage of Learn Mode technology?
6. What device can you connect to the WIS?

■ FÖNSAFE CERTIFICATION TEST ■

7. Name two mounting guidelines for the Smoke Sensor.

8. What is one common cause of false alarms?

9. What is the arming level that arms perimeter sensors but not interior sensors?

10. What is the method used to gain programming access to Interrogator if no answering machine is in use on the premises?

11. What is assigned to sensors to identify their specific location on the premises?

12. What must you do before programming a new house code for the WIS?

■ FÖNSAFE CERTIFICATION TEST ■

13. What is the feature that lets you arm the system when a sensor is open?

14. Why should you wire the ground lead and shielded cable to terminal 13 on Interrogator?

15. What is the maximum light bulb wattage that the X-10 Lamp Module can control?

16. What are the default house codes for the X-10 Lamp, the X-10 Appliance Module, and the WIS?

17. When using Interrogator, what device must you use two of?

18. What is the purpose of the Master Control Phone Options?

19. When wiring the MCU to the phone line, where must you wire the RJ-31X jack?

20. Name two mounting guidelines for the Motion Sensor.
