Subject: Remoting Simon Voice

---

Simon 2.0 and more current versions allow panel voice functions (status, chime, etc.) to be used away from the panel using the AVM 200 cable assembly (part number 49-453) and a speaker. Connect the two blue wires from the cable assembly to a speaker. Then plug the cable connector into the AVM 200 jack on Simon panel.

If Panel Voice (Option 02) is disabled, chime and status sounds will not be heard at the panel or remotely; programming voice will remain enabled.

ITI has added the following two part numbers for remoting Simon voice:

13-453	Speaker, 8 Ohm, Wall Mount Enclosure
13-454	Speaker, 8 Ohm, Flush Mount Enclosure

Please contact me with any additional questions you may have.
