Personal Emergency Response System

Amber
Basic

For seniors, knowing that they have a simple and dependable way to summon help in the event of an emergency is vital. Being confident that help is never more than a button-click away can enable them to continue living in their own familiar environment while also giving family members peace of mind.

Visonic's Amber®Basic is a convenient, highly affordable personal emergency response system (PERS) that is designed for simplicity of use.

It provides a dependable solution for anyone who needs an easy, one-step way to get assistance. In addition, it supports seniors' independent lives by providing medication reminders and inactivity monitoring.

Leveraging Visonic's industry-leading expertise, AmberBasic is part of Visonic's comprehensive range of high-quality product offerings for the safety, security and home health care market segments.
