

Comprehensive Telehealth, Lifestyle and Safety Management Solution

Amber
Select

Growing numbers of seniors, people living alone and others with evolving health concerns are looking for solutions to help them manage their medication and safety and keep them in touch with emergency help. The goal: to maintain independent lives in their own homes and enable family members to continue their daily lives secure in the knowledge that their relatives are not alone.

Visonic's Amber®Select provides a uniquely complete answer by combining telehealth support as well as lifestyle and safety management in a single, attractive solution. It incorporates an advanced home safety and intrusion alarm and a full-featured activity

support system - so that emergency response, family contacts and health care providers are no further than a button click away.

With a sleekly designed, easy to use console, wearable remote transmitters, and a wide range of detection accessories, AmberSelect goes everywhere in the home the user goes. It detects safety threats such as smoke, floods, carbon monoxide (CO) and intrusions and provides medication reminders and monitoring of inactivity and falls. With comprehensive telehealth capabilities, AmberSelect provides the ideal lifestyle support solution for the high-end market

Sleek design for modern lifestyles

- Ultra-modern, streamlined design fits any décor
- Large-size buttons ensure confident, easy use

End to end telehealth

- Comprehensive support for health status monitors, including ECG, glucometer, blood pressure and weight scale
- Sends diagnostic data to designated health providers or monitoring services
- HHCCR server with secure Internet/PSTN connection is required to enable medical experts to review data

Personal safety and lifestyle support

- Programmable inactivity monitoring, enabling emergency contact notification if the user appears to have ceased regular daily activities
- Fall monitoring via wearable detector
- One emergency button and one button for outgoing calls
- Emergency call initiation and pick-up of incoming calls using wearable remote transmitters
- Built-in, two-way, high-volume speakerphone
 - High volume setting - ideal for hard-of-hearing people
 - High-sensitivity microphone - enables a frail voice to be heard, even from afar
- Up to 16 customizable voice and display reminders - for medicines, food, appointments, etc.

Home safety and security monitoring

- Comprehensive environmental safety detection, including, smoke, flood and carbon monoxide (CO)
- Intrusion monitoring option

Flexible, user-friendly system

- Displays time and date
- Large LCD screen with unlimited language options
- Console can be configured to support up to either 29 or 255 wireless transmitters (for private homes or group living facilities respectively)
- Fully upgradeable software – supports additional languages, capabilities
- Intuitive HHCCR utility enables system programming on-site* and easy remote programming and management via telephone line
- Optional Voice Box for extending the voice capabilities to other locations in the home
- Optional: AmberSelect-x model without LCD screen

Highly reliable

- Power failure and low/missing battery alerts
- 24-hour backup battery
- Programmable periodic test
- Low-battery indication for pendant

*Requires PC/laptop running Windows 2000 or later
